A Dredging in Swann Tim Garvin,2020-01-28 Two investigations start at the same time in Swann County, North Carolina, one by the FBI, the other by the sheriff. The feds want to know who stole three Stinger missiles during a helicopter crash. The sheriff wants to know who hanged a black ex-con in a well.

Seb Creek, a sheriff's detective, gets involved in both investigations and fights through lies, secrets, and murder to find the killer. The trail involves a long-ago axe murder, the ravages of combat, an outdoor gas chamber, a mystery at the bottom of a well, and finally a last killing and an ancient testament. *A Dredging in Swann* is a tale that deals powerfully with themes of war, race, justice, and, in the end, with healing. Sometimes justice has to wait. Sometimes it won't.

The Light Ages: The Surprising Story of Medieval Science Seb Falk, 2020-11-17 Named a Best Book of 2020 by The Telegraph, The Times, and BBC History Magazine An illuminating guide to the scientific and technological achievements of the Middle Ages through the life of a crusading astronomer-monk. Falk's bubbling curiosity and strong sense of storytelling always swept me along. By the end, *The Light Ages* didn't just broaden my conception of science; even as I scrolled away on my Kindle, it felt like I was sitting alongside Westwyk at St. Albans abbey, leafing through dusty manuscripts by candlelight. —Alex Orlando, *Discover Soaring* Gothic cathedrals, violent crusades, the Black Death: these are the dramatic forces that shaped the medieval era. But the so-called

Dark Ages also gave us the first universities, eyeglasses, and mechanical clocks. As medieval thinkers sought to understand the world around them, from the passing of the seasons to the stars in the sky, they came to develop a vibrant scientific culture. In *The Light Ages*, Cambridge science historian Seb Falk takes us on a tour of medieval science through the eyes of one fourteenth-century monk, John of Westwyk. Born in a rural manor, educated in England's grandest monastery, and then exiled to a cliff-top priory, Westwyk was an intrepid crusader, inventor, and astrologer. From multiplying Roman numerals to navigating by the stars, curing disease, and telling time with an ancient astrolabe, we learn emerging science alongside Westwyk and travel with him through the length and breadth of England and beyond its shores. On our way, we encounter a remarkable cast of characters: the clock-building English abbot with leprosy, the French craftsman-turned-spy, and the Persian polymath who founded the world's most advanced observatory. *The Light Ages* offers a gripping story of the struggles and successes of an ordinary man in a precarious world and conjures a vivid picture of medieval life as we have never seen it before. An enlightening history that argues that these times weren't so dark after all, *The Light Ages* shows how medieval

ideas continue to color how we see the world today.

Development in Spirit Seb Rumsby,2023

Seb's Surrender Carol Lynne,2010-01-11 After a lifetime of abuse, Jared Grant was rescued by Brier Blackstone and taken to one of the safest places he knew, the bodyguard dormitory of the Three Partners Protection Agency. For the first time, Jared is surrounded by men whose job it is to protect, not hurt him. One of his protectors, Sebastian James, knows a little something about abuse. Once a victim of abuse before he and his brother were taken from an abusive household and put into separate foster homes, Seb learned to harden his heart as a way of survival. Now, the soft spoken and scared Jared threatens the shell Seb spent years fortifying. When Jared's tormentor threatens him from jail, it's up to Seb and the rest of the bodyguards to keep Jared safe until he can testify at his abuser's trial. However, the close contact might be more than Seb's hard shell can withstand.

The Digitally Disposed Seb Franklin,2021-06-22 Locates the deep history of digitality in the development of racial capitalism Seb Franklin sets out a media theory of racial capitalism to examine digitality's racial-capitalist foundations. *The Digitally Disposed* shows how the promises of boundless connection, flexibility, and

prosperity that are often associated with digital technologies are grounded in racialized histories of dispossession and exploitation. Reading archival and published material from the cybernetic sciences alongside nineteenth-century accounts of intellectual labor, twentieth-century sociometric experiments, and a range of literary and visual works, *The Digitally Disposed* locates the deep history of digitality in the development of racial capitalism. Franklin makes the groundbreaking argument that capital's apparently spontaneous synthesis of so-called free individuals into productive circuits represents an "informatics of value." On the one hand, understanding value as an informatic relation helps to explain why capital was able to graft so seamlessly with digitality at a moment in which it required more granular and distributed control over labor—the moment that is often glossed as the age of logistics. On the other hand, because the informatics of value sort populations into positions of higher and lower capacity, value, and status, understanding their relationship to digitality requires that we see the digital as racialized and gendered in pervasive ways. Ultimately, *The Digitally Disposed* questions the universalizing assumptions that are maintained, remade, and intensified by today's dominant digital technologies. Vital and far-reaching, *The*

Digitally Disposed reshapes such fundamental concepts as cybernetics, informatics, and digitality.

How to Be a Better Person Seb Hunter, 2010-02-01 Why is it so difficult to find the time to help others? When Seb Hunter became aware of a nagging ache in the place where his soul ought to be, he embarked on a two year odyssey of volunteering &– with hilarious results. He collects litter, teaches pensioners how to use the internet, works at Oxfam (where he meets Gladys, his septuagenarian nemesis), mans a steam train line, becomes a star DJ on hospital radio, visits prisoners, and runs a very long way for charity... But will his quest for self-improvement be successful? *How to Be a Better Person* is the tale of a cynic's attempt to become a better person by helping others. For nothing. It's a volunteering call-to-arms! Oh no it's not! Well it is, sort of...

Seb Jarrot 3 X 7 Seb Jarrot, 2004 Seb Jarrot creates stunningly fresh illustrations that are simultaneously contemporary and timeless. While his style is minimal, a few well-placed lines radiate dynamism and movement. To best capture the personal and almost intimate quality of his art, dgv has created a small size book to showcase Jarrot's work. Spanning 192 pages, this hardcover contains an impressive range of illustrations while its

lower price makes it a perfect way for those yet unfamiliar with Seb Jarnot to discover him. The book's appealing size also makes it easy to take along - to give as a gift or for readers to find inspiration wherever they happen to be. Seb Jarnot's talent has already been recognized in acclaimed projects such as the international advertising campaign that he did for Nike. In addition to creating various covers for French electronica label F Communication (Laurent Garnier, Llorca, The Youngsters, etc.), Jarnot is also featured in *Romantik* and *Übersee* 1.

Control Seb Franklin, 2015-09-20 An examination of digitality not simply as a technical substrate but also as the logical basis for reshaped concepts of labor, subjectivity, and collectivity. Is there a cultural logic of what we have come to call the information age? Have the technologies and techniques centered on the computer provided not only tools but also the metaphors through which we now understand the social and economic formation of our world? In *Control*, Seb Franklin addresses the conditions of knowledge that make the concept of the “information economy” possible while at the same time obscuring its deleterious effects on material social spaces. In so doing, Franklin traces three intertwined threads: the relationships among information, labor, and social management

that emerged in the nineteenth century; the mid-twentieth-century diffusion of computational metaphors; and the appearance of informatic principles in certain contemporary socioeconomic and cultural practices. Drawing on critical theory, media theory, and the history of science, Franklin names control as the episteme grounding late capitalism. Beyond any specific device or set of technically mediated practices, digitality functions within this episteme as the logical basis for reshaped concepts of labor, subjectivity, and collectivity, as well as for the intensification of older modes of exclusion and dispossession. In tracking the pervasiveness of this logical mode into the present, Franklin locates the cultural traces of control across a diverse body of objects and practices, from cybernetics to economic theory and management styles, and from concepts of language and subjectivity to literary texts, films, and video games.

The Cucumber for Java Book Seb Rose, Matt Wynne, Aslak Helleoy, 2015-02-06 Teams working on the JVM can now say goodbye forever to misunderstood requirements, tedious manual acceptance tests, and out-of-date documentation. Cucumber - the popular, open-source tool that helps teams communicate more effectively with their customers - now has a Java version, and our bestselling Cucumber Book has been updated to match. The Cucumber for Java Book has the same great advice about how to deliver rock-solid applications collaboratively, but with all code completely rewritten in Java. New chapters cover features unique to the Java version of Cucumber, and reflect insights from the

Cucumber team since the original book was published. Until now it's been difficult for teams developing Java applications to learn how to benefit from Behaviour-Driven Development (BDD). This book changes all that by describing in detail how to use Cucumber to harness the power of plain language specifications in your development process. In part 1, you'll discover how to use Cucumber's Gherkin DSL to describe the behavior your customers want from the system. You'll also learn how to write Java code that interprets those plain language specifications and checks them against your application. Part 2 guides you through a worked example, using Spring, MySQL, and Jetty. Enhanced chapters teach you how to use Selenium to drive your application and handle asynchronous Ajax calls, and new chapters cover Dependency Injection (DI) and advanced techniques to help keep your test suites fast. Part 3 shows you how to integrate Cucumber with your Continuous Integration (CI) system, work with a REST web service, and even use BDD with legacy applications. Written by the creator of Cucumber and two of its most experienced users and contributors, The Cucumber for Java Book is an authoritative guide that will give you and your team all the knowledge you need to start using Cucumber with confidence.

Even the dealers peddling the pills don't know what long term effects the drug will have on its users. For Markus Olsen, Synth offers an easy escape to his crumbling life. Markus, an ex-hacker, has been caught red-handed, and while his friends were sent to jail for thirty years, Markus decided to cooperate, agreeing to lend his services and particular criminal expertise to Viborg City's secret service, aiding the oppressive state power he'd been fighting to break in exchange for his relative freedom. Running My Life – The Autobiography Seb Coe, 2012-11-08

One second in time may separate the great athlete from the merely good. Seb Coe has made every second count. From an early age he has been driven to be the best at everything he does. Since the moment Coe stood alongside a 'scrubby' municipal running track in Sheffield, he knew that sport could change his life. It did. Breaking an incredible twelve world records and three of them in just forty-one days, Seb became the only athlete to take gold at 1500 metres in two successive Olympic Games (Moscow 1980 and Los Angeles 1984). The same passion galvanised Coe in 2005, when he led Britain's bid to bring the Olympic and Paralympic Games to London. He knew that if we won it would regenerate an East London landscape and change the lives of thousands of young people. It has. Born in Hammersmith and coached by his engineer father, Coe went from a secondary modern school and

Loughborough University to become the fastest middle-distance runner of his generation. His rivalry with Steve Ovett gripped a nation and made Britain feel successful at a time of widespread social discontent. From sport Coe transferred his ideals to politics, serving in John Major's Conservative government from 1992 to 1997 and developing 'sharp elbows' to become chief of staff to William Hague, leader of the Party from 1997 to 2001 and finally a member of the House of Lords. *Running My Life* is in turns exhilarating, inspiring, amusing, and extremely moving. Everyone knows where Sebastian Coe ended up. Few people realise how he got there. This is his personal journey.
