Natsukashii: Uchinaa Nu Umui Stephen A. Mick McClary, 2021-05-21 NATSUKASHII:

Uchinaa nu umui / Old Times: Reflections of Okinawa offers you an extensive up close and personal experience as you follow me day by day, throughout my last five trips to Okinawa. I detail what it's like to live and play on the island by way of reading daily accounts complemented by historical details that are woven into my dialogue as well as links to hundreds of my videos that allow you to accompany me on adventures from underwater caves to the majestic top of Rainmaker Mountain. Ride along as I take you on windshield tours along the Okinawa Expressway and down country roads of remote outlying islands. Sail with me as I ferry to Ieshima or slog through the mud with me at a rice field festival. Traipse along through tall grass or laze at a chimujiruban. This book will get you as close as you can get to the real Okinawa without actually being there - which is kinda nice now since COVID has shut the door on vacation travel to Japan.

Robot Operating System (ROS) Anis Koubaa,2018-07-05 Building on the successful first and second volumes, this book is the third volume of the Springer book on the Robot Operating System (ROS): The Complete Reference. The Robot Operating System is evolving from year to year with a wealth of new contributed packages and enhanced capabilities. Further, the ROS is being integrated into various robots and systems and is becoming an embedded technology in emerging robotics platforms. The objective of this third volume is to provide readers with additional and comprehensive coverage of the ROS and an overview of the latest achievements, trends and packages developed with and for it. Combining tutorials, case studies, and research papers, the book consists of sixteen chapters and is divided into five parts. Part 1 presents multi-robot systems with the ROS. In Part 2, four chapters deal with the development of unmanned aerial systems and their applications. In turn, Part 3 highlights recent work related to navigation, motion planning and control. Part 4 discusses recently contributed ROS packages for security, ROS2, GPU usage, and real-time processing. Lastly, Part 5 deals with new interfaces allowing users to interact with robots. Taken together, the three volumes of this book offer a valuable reference guide for ROS users, researchers, learners and developers alike. Its breadth of coverage makes it a unique resource.

Surveillance Tracking Systems Dinesh Peter, Amir Alavi, Bahman Javadi, Steven L. Fernandes, 2020-03-14 The Cognitive Approach in Cloud Computing and Internet of Things Technologies for Surveillance Tracking Systems discusses the recent, rapid development of Internet of things (IoT) and its focus on research in smart cities, especially on surveillance tracking systems in which computing devices are widely distributed and huge amounts of dynamic real-time data are collected and processed. Efficient surveillance tracking systems in the Big Data era require the capability of quickly abstracting useful information from the increasing amounts of data. Real-time information fusion is imperative and part of the challenge to mission critical surveillance tasks for various applications. This book presents all of these concepts, with a goal of creating automated IT systems that are capable of resolving problems without demanding human aid. Examines the current state of surveillance tracking systems, cognitive cloud architecture for resolving critical issues in surveillance tracking systems, and research opportunities in cognitive computing for surveillance tracking systems Discusses topics including cognitive computing architectures and approaches, cognitive computing and neural networks, complex analytics and machine learning, design of a symbiotic agent for recognizing real space in ubiquitous environments, and more Covers supervised regression and classification methods, clustering and dimensionality reduction methods, model development for machine learning applications, intelligent machines and deep learning networks includes coverage of cognitive computing models for scalable environments, privacy and security aspects of surveillance tracking systems, strategies and experiences in cloud architecture and service platform design

Life is an Adventure of Beauty n Grace Ashwini Kumar Aggarwal, 2021-02-16 A friend once asked me to say something. I told him that Light and Absence of Light are construed as desirable or

undesirable depending on one's current state. Both are powered by the same Brahman, both are willed by Him alone. Such words are galore in the scriptures and soften the heart. However the scriptures also go on to say that troubled times are the result of one's own making, faulty living, and being a willing slave to the shad vikaras. This is what I couldn't tell him. However know that we all have 400 years of life, then we merge into Brahman and become one with the Divine. At the end of 400 years it doesn't matter how we played our role, if we were good actors or if we were plain dumb. Hope a few can tune the thoughts expounded here and make them theirs, not in thought but in action. These are from a life well-lived, graciously shared, and richly blessed. In fact it is the story of most humans. The story of a sojourn to planet earth. Om Svasti

TUY?N T?P M?T ??I NGÔ TÔN LONG, 2014 About the Book: The third millennium of the Christian era came with wars, one against infidels and another on terrorism, which were more than enough for a miserable Vietnamese, Ngô Tôn-Long-former lecturer on pedagogy and philosophy at Dalat University, 1968-1975, born in the beginning of the Second World War, grown up during the French revived colonial war, and terminated at the end of the American anticommunist war. Born again neither by might nor by power and having lived his faith for thirty years now, he was moved to study scriptures ancient and not so ancient and has been enabled to have his studies printed (on demand)-a dozen or so of the titles are dedicated to the uprooted, displaced, and dispersed people like him as well as peoples like his-yet not so appropriately published that most of his old acquaintances scattered to North America actually know only of his death forty years ago. Being no native speaker of English, he had never thought of writing anything whatsoever in this language till

the day he was planted in the capital Adelaide of South Australia. Neither religions nor theology had been of his studies; instead, it was mathematics and physics, pedagogy and philosophy. Better read no books than believe only one, he used to seriously study every of all the books that happened to fall into his hands or to run on to himself-the written whatsoever and the living whomsoever. Years ago, he was kept on an island of refuge in a time just enough for him to study the accusation bold and public Christians and Jews are infidels; People of the Book, they have distorted their Scripture! Twenty years of self-incarceration inside Adelaide assured him of his in-depth studies on the books of each people-the Holy 22 or 24 (scriptures) and the Holy 46 or 39 (of a dozen bibles) plus dozens of not-so-holy books. Then he was brought on the eagles' wings-from a southeastern island of the old world-across the ocean Pacific and crossing both the International Time Line and the Equator at about a same night time (so that he could see nothing down there, Pacific or not) to some northwestern lands of the new world (of names like Angels and Real-Mount). There, in the spirit of Yeh-Vah, he was set down amidst very many bones that were indeed very dry, as they themselves acknowledged it, saying, Our bones are dry, our hope is lost, and we are cut off. They were actually eating and drinking and enjoying their death on the day of their independence from Yeh-Vah while he was standing on level 102 of the Empire State Building with a Holy Scripture . . . comparable to the Bible . . . the Most Correct . . . containing the Fullness of the Everlasting Gospel.
