Don't Burn This Country Dave Rubin,2022-04-12 A guide for anyone who wants to revive the American dream while the woke mob tries to burn down the country. You don't

have to be a conspiracy theorist to see that something dark is happening in America. Just look around: Massive corporations monitor our every move. The Thought Police stand ready to cancel any who dare think for themselves. Brainwashed activists openly attack the American experiment. The dystopian future we've been warned of is here. Dave Rubin has been on the front lines of the culture wars for years. Now, he offers tactics you can use to protect yourself from today's authoritarian rule—from resisting the grip of Big Tech to staying sane in a post-truth world. What's more, he offers a vision for the next generation of patriots who will need to face the future head-on, holding fast to their values and creating a meaningful life no matter how frenzied and fabricated the news of the day is. In order for free-thinking people to thrive in this era of woke lunacy, we need to step up and create freedom for ourselves. While exposing Progressive lies and offering practical advice you can employ right now, this book is a call for Americans to live the freest life possible—and a roadmap for saving the greatest country in the history of the world.

Changing Fortunes Karl S. Zimmerer,2023-04-28 Two of the world's most pressing needs—biodiversity conservation and agricultural development in the Third World—are addressed in Karl S. Zimmerer's multidisciplinary investigation in geography. Zimmerer challenges current opinion by showing that the world-renowned diversity of crops grown in the Andes may not be as hopelessly endangered as is widely believed. He uses the lengthy history of small-scale farming by Indians in Peru, including contemporary practices and attitudes, to shed light on prospects for the future. During prolonged fieldwork among Peru's Quechua peasants and villagers in the mountains near Cuzco, Zimmerer found

convincing evidence that much of the region's biodiversity is being skillfully conserved on a de facto basis, as has been true during centuries of tumultuous agrarian transitions. Diversity occurs unevenly, however, because of the inability of poorer Quechua farmers to plant the same variety as their well-off neighbors and because land use pressures differ in different locations. Social, political, and economic upheavals have accentuated the unevenness, and Zimmerer's geographical findings are all the more important as a result. Diversity is indeed at serious risk, but not necessarily for the same reasons that have been cited by others. The originality of this study is in its correlation of ecological conservation, ethnic expression, and economic development.
