The Changing Face of Management in Thailand Tim Andrews,Sununta Siengthai,2009-05-19 In the decade following the Asian financial crisis of 1997-1998, the management of organizations in Thailand has undergone significant change and development. The Changing Face of Management in Thailand examines in-depth the development of management during this pivotal period in the country's recent history. The book draws together an impressive assortment of scholars, consultants and practitioners, whose experience and expertise significantly enhance our knowledge and understanding of this complex, multi-faceted Asian economy. The book is divided into 3 main sections: an examination of the political, economic, social and technological changes from 1997-2008 specialist chapters that contextualise these developments from the marketing, HR and finance perspectives concluding sections focusing on public sector organizations, women managers, corporate governance, e-communication and the 'Thailand Brand'. With a wealth of vignettes, anecdotes and illustrative quotations bringing each chapter to life, this volume offers a refreshing, updated and in-depth analysis of this rich, diverse and fascinating nation.

**Marketization in ASEAN** C. Y. Ng,Norbert Wagner,1991 How can public enterprises be made more efficient? Where should the line between public and private production be drawn? What can countries do to minimize the losses sustained by public enterprises? What is the current perception of the role of the state in production in Southeast Asia, and particularly in ASEAN? What are the political, legal and administrative constraints pertaining to the divestment and/or marketization of public enterprises? Is the situation in Southeast Asia different from that in Europe? These are some of the questions this volume tackles.

*Soviet Occupation of Romania, Hungary, and Austria 1944/45?1948/49* Csaba Bekes,Laszlo Borhi,Peter Ruggenthaler,Ottmar Trasca,2015-08-30 This book compares the various aspects ? political, military economic ? of Soviet occupation in Austria, Hungary and Romania. Using documents found in Austrian, Hungarian, Romanian and Russian archives the authors argue that the nature of Soviet foreign policy has been misunderstood. Existing literature has focused on the Soviet foreign policy from a political perspective; when and why Stalin made the decision to introduce Bolshevik political systems in the Soviet sphere of influence. This book will show that the Soviet conquest of East-Central Europe had an imperial dimension as well and allowed the Soviet Union to use the territory it occupied as military and economic space. The final dimension of the book details the tragically human experiences of Soviet occupation: atrocities, rape, plundering and deportations.

**Citizen Designs** Eli Elinoff,2021-03-31 What does it mean to design democratic cities and democratic citizens in a time of mass urbanization and volatile political transformation? Citizen Designs: City-Making and Democracy in Northeastern Thailand addresses this question by exploring the ways that democratic urban planning projects intersect with emerging political aspirations among squatters living in the northeastern Thai city of Khon Kaen. Based on ethnographic and historical research conducted since 2007, Citizen Designs describes how residents of Khon Kaen's railway squatter communities used Thailand's experiment in participatory urban planning as a means of reimagining their citizenship, remaking their communities, and acting upon their aspirations for political equality and the good life. It also shows how the Thai state used participatory planning and design to manage both situated political claims and emerging politics. Through ethnographic analysis of contentious collaborations between residents, urban activists, state planners, participatory architects, and city officials, Eli Elinoff's analysis reveals how the Khon Kaen's railway settlements became sites of contestation over political inclusion and the meaning and value of democracy as a political form in the first decades of the twenty-first century. Elinoff examines how residents embraced politics as a means of enacting their equality. This embrace inspired new debates about the meaning of good citizenship and how democracy might look and feel. The disagreements over citizenship, like those Elinoff describes in Khon Kaen, reflect the kinds of aspirations for political equality that have been fundamental to Thailand's political transformation over the last two decades, which has seen new political actors asserting themselves at the ballot box and in the streets alongside the retrenchment of military authoritarianism. Citizen Designs offers new conceptual and empirical insights into the lived effects of Thailand's political volatility and into the current moment of democratic ambivalence, mass urbanization, and authoritarian resurgence.

**Creating Smart Enterprises** Vivek Kale,2017-10-25 Vivek Kale's Creating Smart Enterprises goes smack-dab at the heart of harnessing technology for competing in today's chaotic digital era. Actually, for him, it's SMACT-dab: SMACT (Social media, Mobile, Analytics and big data, Cloud computing, and internet of Things) technologies. This book is required reading for those that want to stay relevant and win, and optional for those that don't. —Peter Fingar, Author of Cognitive Computing and business technology consultant Creating Smart Enterprises unravels the mystery of social media, mobile, analytics and big data, cloud, and Internet of Things (SMACT) computing and explains how it can transform the operating context of business enterprises. It provides a clear understanding of what SMACT really means, what it can do for smart enterprises, and application areas where it is practical to use them. All IT professionals who are involved with any aspect of a SMACT computing project will profit by using this book as a roadmap to make a more meaningful contribution to the success of their computing initiatives. This pragmatic book: Introduces the VUCA (volatility, uncertainty, complexity, and ambiguity) business ecosystem confronted by the businesses today. Describes the challenges of defining business and IT strategies and of aligning them as well as their impact on enterprise governance. Provides a very wide treatment of the various components of SMACT computing, including the Internet of Things (IoT) and its constituting technologies like RFID, wireless networks, sensors, and wireless sensor networks (WSNs). This book addresses the key differentiator of SMACT computing environments and solutions that combine the power of an elastic infrastructure with analytics. The SMACT environment is cloud-based and inherently mobile. Information management processes can analyze and discern recurring patterns in colossal pools of operational and transactional data. Analytics, big data, and IoT computing leverage and transform these data patterns to help create successful, smart enterprises.

Report of the National Workshop on Micro-Enterprise Development in Coastal Communities in the Philippines Food and Agriculture Organization of the United Nations,2007 The goals of the National Workshop on Micro-

enterprise Development in Coastal Communities in the Philippines were to exchange experiences and good practices and to identify financial and institutional support services and facilities to sustain livelihoods and micro-enterprise development in coastal areas. The workshop was attended by 45 participants from people's organizations, fisherfolk cooperatives, non-governmental organizations, national government agencies and financing institutions. The discussions at the workshop showed that livelihood diversification and the improvement of income and employment opportunities in coastal fishing communities are crucial for their participation in the conservation and management of aquatic resources. Key elements of sustainable micro-enterprise development as identified by the workshop include capability building of fisherfolk organizations such as cooperatives and associations to implement livelihood projects, the preparation of feasibility studies and business plans, technical skills development, sound financial management practices, development of innovative and high quality products, access to new markets including urban and regional markets and the full participation of fisherfolk in the identification of livelihood activities and micro-enterprises. The Pilot Project in Support of the Development of Micro-enterprises in Banate Bay, Iloilo and Southern Iloilo was implemented by the University of the Philippines in the Visayas in cooperation with the Banate Bay Resource Management Council Inc. and the Southern Iloilo Coastal Resource Management Council with support from FAO. A number of microenterprises were introduced and supported in the municipalities of Banate Bay and Southern Iloilo including fish ball production, shrimp paste production, oyster and mussel culture, salt production and iodization, fish marketing and fish sauce production. Training programmes were conducted for fisherfolk on product development and marketing of their products. Good coordination with local government units, active participation of all stakeholders and conduct of appropriate training programmes are considered essential for the sustainability of the micro-enterprises. The involvement of fisherfolk in livelihood activities and micro-enterprises is strengthening their participation in the fisheries and aquatic resources management councils of Banate Bay and Southern Iloilo. The experiences of the pilot project also suggest that in order to make various income generating livelihood initiatives sustainable and stand on their own feet, many of these need to develop further into full-fledged micro-enterprises. Considerable scope lies in farming of aquatic organisms such as seaweed, shellfish and various fish species as well as in fisheries related value adding activities such as fish processing and marketing. As far as the relationship between the conservation of aquatic resources and the generation of income is concerned, the quality of the aquatic environment and the economic success of mariculture micro-enterprises and activities are directly related. This should create a strong motivation for fisherfolk entrepreneurs involved in such type of enterprises to be strong advocates and stewards of a healthy coastal ecology. In the long term, fisherfolk will benefit from the development of various micro-enterprise initiatives. It is clearly in their interest.

Network Science, Nonlinear Science and Infrastructure Systems Terry L. Friesz,2007-06-10 This book is written by leading scholars in Network Science, Nonlinear Science and Infrastructure Systems, expressly to develop common theoretical underpinnings for better solutions to modern infrastructural problems. The book is dedicated to the formulation of infrastructural tools that will better solve problems from transportation networks to telecommunications, Internet, supply chains and more.

Third World Cities John D. Kasarda,Allan M. Parnell,1993 It took New York City (the world's largest metropolis in 1950) nearly a century and a half to expand by eight million residents. Mexico City and Sao Paulo will match this growth in less than fifteen years. Asia's mega-cities, too, are exploding in number and size. This kind of unprecedented growth is being echoed in the urban centers of developing nations around the globe. The essays in this volume address the wide array of problematic issues--as well as the opportunities and advantages--that are the natural outgrowth of such rapid urbanization. Third World Cities examines three sets of vital issues. Drawing on the experience and evidence of the past two decades, the book's initial chapters assess theoretical frameworks upon which urban and migration policies are based. The authors of the middle section press for fresh approaches to the increasing demands placed on institutions and individuals in the largest cities of the developing world. The final chapters examine the complex demographic, social, and economic processes of urban growth. Students, professionals, and policymakers in development and urban studies, public administration, sociology, political science and comparative politics, geography, and ethnic studies will find Third World Cities to be a refreshing and innovative look at this growing concern. Third World Cities offers a range of new ideas on the demographic, social spatial, and environmental changes that are 'occurring so quickly that up-to-date evidence is elusive' . . . Third World Cities is both thought-provoking and highly readable. -The Economic Times
