Recent Development in Energy Conversion Systems Sunday Olayinka Oyedepo,Fidelis Ibiang Abam,Olusegun David Samuel,Oluseyi Olanrewaju Ajayi,Abimbola Patricia Popoola,Diana-Andra Borca-Tasciuc,2024-03-15 In this industrial and technological age, energy plays a principal role in sustainable development. This is connected to issues regarding availability, production processes, utilization, and environmental impact. Due to the increased rate of population growth, the energy demand in the entire world is getting to the level that it may not be sustained in the nearest future if drastic action is not taken to address the situation, especially from research and development perspectives. None of the millennium development goals (MDGs) can be completed without considerable improvements in the quality and quantity of energy services in developing countries, according to the United Nations Development Programme (UNDP). Based on this fact, UNDP is making efforts, especially in developing countries to ensure that people have access to sustainable sources of clean, reliable, and affordable energy since every aspect of human development is highly impacted by this vital resource.

Food-Energy-Water Systems: Achieving Climate Resilience and Sustainable Development in the 21st Century Charles Vörösmarty,Richard Lawford,Pietro Elia Campana,Donald Wuebbles,Graham Jewitt,2024-01-23
extreme weather will mean ongoing challenges to the capacity of these sectors to support human well-being, grow the economy, and provide critical environmental services. Society has yet to evaluate the resilience of FEWS to climate, environmental, and management stresses as it shapes strategies to support sustainable development over the next decades. These issues constitute a quintessential interdisciplinary research challenge and require a well-structured science agenda and supportive information services for implementing key findings that governments and stakeholders can adopt. Integrated policy pathways require usable research findings, applications, models, real-time information systems, and decision support systems. In addition, stakeholder engagement is essential to communicate the benefits and results of these approaches and to engage appropriate groups in their implementation.
