Protests, Pandemic, and Security Predicaments Wei-chin Lee, 2023-06-27 This book examines how Asian countries have responded to urgent challenges against a backdrop of climactic political developments, as well as the effects of issue linkage in policy making. Chapters are arranged according to localities but interlinked through their thematic and critical analyses. The section on Hong Kong focuses on the theme of protests, highlighting its intersection with identity and generational shifts in addition to legal, political and economic changes before and after the adoption of Hong Kong National Security Law. The section examining Taiwan's policies discusses electoral calculations, identity reconstruction, cross-Strait stalemate and alliance maneuvers within USA-China-Taiwan triangular international relations, providing an overview of its domestic and external policies. Through their analysis, the authors here determine that China has emphasized the prerogatives of history, culture and territorial sovereignty in its dealings with the Hong Kong protests and Taiwan, and that cross-Strait analysis must be deliberated and ultimately determined within the USA-China-Taiwan triangular framework. In the final section, authors examine the USA's role and policy in dealing with both sides of the Taiwan Strait. Hegemonic power transition has been a primary concern in both countries with the USA's hegemonic status facing daunting challenges from China, increasingly perceived as an ascending revisionist power waiting to overtake the USA in the future.

Multicriteria and Multiagent Decision Making with Applications to Economics and Social Sciences Aldo G. S. Ventre, Antonio Maturo, Šárka Hošková-Mayerová, Janusz Kacprzyk, 2013-12-06 The book provides a comprehensive and timely report on the topic of decision making and decision analysis in economics and the social sciences. The various contributions included in the book, selected using a peer review process, present important studies and research conducted in various countries around the globe. The majority of these studies are concerned with the analysis, modeling and formalization of the behavior of groups or committees that are in charge of making decisions of social and economic importance. Decisions in these contexts have to meet precise coherence standards and achieve a significant degree of sharing, consensus and acceptance, even in uncertain and fuzzy environments. This necessitates the confluence of several research fields, such as foundations of social choice and decision making, mathematics, complexity, psychology, sociology and economics. A large spectrum of problems that may be encountered during decision making and decision analysis in the areas of economics and the social sciences, together with a broad range of tools and techniques that may be used to solve those problems, are presented in detail in this book, making it an ideal reference work for all those interested in analyzing and implementing mathematical tools for application to relevant issues involving the economy and society.

Atmosphere/Atmospheres Tonino Griffero, 2019-02-01 T00:00:00+01:00 What is an "Atmosphere"? As part of the book series "Atmospheric Spaces", this volume analyses a new phenomenological and aesthetic paradigm based on the notion of the "Atmosphere", conceived as a feeling spread out into the external space rather than as a private mood. The idea of "Atmosphere" is here explored from different perspectives and disciplines, in the context of a full valorization of the so-called "affective turn" in Humanities.

The Global and Social Consequences of the COVID-19 Pandemic Gottfried Schweiger, 2022-06-30 This book directly addresses the social and economic consequences of the COVID-19 pandemic. It does so by focusing on both the immediate effects during the pandemic and the lockdowns, as well as the issues related to the long-term social consequences that are likely to result from the economic crisis in the coming years. To date, most philosophical essays and books have focused on the health aspects of the pandemic, and in particular on the fields of medical ethics and public health ethics.

Containing a truly international and interdisciplinary group of scholars, a unique and global perspective is offered on the rarely discussed social and economic consequences of the pandemic. This book is of great interest to academic philosophers, but also to researchers from the social sciences.

European Regional Policy and Development María del Carmen Sánchez-Carreira, Paulo Jorge Reis Mourão, Bruno Blanco-Varela, 2023-07-18 The shortcomings of traditional regional policies led to a major policy. Thus, regions have become more active in the design and implementation of policies, following a bottom-up approach and involving the participation of the local community in strategic planning, as opposed to the traditional top-down method. This book addresses regional development theories and policies, with a special focus on forgotten places, and raises emerging questions about recent theoretical advances, as well as trends and challenges in the field. It examines two main and related issues: the crucial role of regional actors for development and the role of Forgotten Spaces. It emphasizes the spatial/territorial approaches from different theoretical perspectives, underlining place-based approaches and compares the experiences of both successful and failed cases, attempting to identify lessons and policy recommendations, as well as adding empirical evidence to this field. The different cases presented, which focus on Forgotten Spaces, allow the reader to assess the role of different actors for regional development as well as some sectoral approaches. While there is a clear focus on European countries with different geographical, institutional and sociocultural characteristics, the book also examines good and bad examples of regional development and policies related to forgotten places from different regions worldwide, including developed and developing countries. The book benefits from contributions from over 20 authors from different nationalities, and a rich diversity of case studies, approaches and methods of discussion. The authors discuss practical examples and more complex theoretical approaches, involving techniques of spatial analysis, spatial econometrics, social networks, content analysis as well as regional planning techniques. The book will appeal to an interdisciplinary audience and will provide academicians, politicians, and policy designers with original and detailed analyses.

Global Activism Ruth Reitan, 2012-08-21 This comprehensive study traces the transnationalization of activist networks, analyzing their changing compositions and characters and examining the roles played by the World Social Forum in this process. Comparing four of the largest global networks targeting the 'neoliberal triumvirate' of the World Bank, the IMF and the World Trade Organization: the Jubilee anti-debt campaigners Via Campesina peasant farmers Our World Is Not For Sale and the anarchistic Peoples' Global Action. Written by a scholar-activist, the book highlights that despite their diversity, these collective actors follow a similar globalizing path and that networks in which solidarity is based on a shared identity perceived as threatened by neoliberal change are gaining strength. Social forums are depicted as a fertile ground to strengthen networks and a common ground for cooperative action among them, but also a battleground over the future of the forum process, the global anti-neoliberal struggle, and 'other possible worlds' in the making. Global Activism will appeal to students and scholars interested in globalization, international relations, IPE and social movements.

Public Financial Management in the European Union Marta Postuła, 2022-04-19 This book reveals how to create efficient institutions and coordinate policy on a transnational scale to ensure that European Union integration can best meet social needs. It offers a combined technocratic and humanist perspective on the discussion of public financial management. The state, as part of its public policy, should seek to preserve our social and environmental values, yet there are mounting imbalances in society which point to the growing role of the state in minimising them. Under such circumstances, it is worth reflecting on how new challenges could require updated, more complex formulas, to deal

with crises in current times and for social and economic policy making by states and the European Union generally, which would ensure their compatibility with the world financial markets. The work offers an in-depth and unique performance analysis of European Union institutions compared to the national entities of EU Member States. It contributes to the ongoing debate on global public goods and the processes involved in managing their provision. Further, it discusses public finance management instruments, indicating their historical evolution in practice and their effectiveness measured with the Human Development Index. The author presents a proposal of how to manage global, European and national public goods across three areas: environmental protection, transnational infrastructure projects and social policy. The book analyses public financial management instruments used during the recent pandemic, making a distinction between regular and emergency instruments and assessing their effectiveness in specific economic situations. This will be of interest to researchers and students of economics and finance, as well as decision makers and practitioners from governments, international organisations and specific non-governmental organisations concerned with issues of public finance management.

MASSONERIOPOLI Antonio Giangrande, E' comodo definirsi scrittori da parte di chi non ha arte né parte. I letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta...." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso...." e parlare di cose reali con nomi e cognomi. Impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del Potere in generale, che per logica ti perseguitano per farti cessare di scrivere. Devastante è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati, pretendendo aiuto. Io da vittima non racconto di me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Los valientes están solos Roberto Saviano, 2023-11-15 Saviano escribe la novela del juez Falcone: dos hombres enfrentados a la Mafia. La novela de Giovanni Falcone. El libro sobre un luchador contra la Mafia escrito por otro de sus combatientes. Falcone falleció en 1992 -junto con su esposa y tres escoltas- cuando su coche voló por los aires en la autopista que lleva a Palermo desde el aeropuerto. Saviano sigue vivo -escribiendo y denunciando-, pero amenazado, bajo protección y con guardaespaldas. Dos explosiones enmarcan la novela: la primera se produce en 1943 en el pueblo de Corleone, cuando una familia manipula una bomba aliada que no ha explotado para desmontarla y venderla. Algo sale mal, la bomba estalla y mueren todos menos un niño. El superviviente es Totò Riina, futuro capo dei capi, el hombre que ordenará el asesinato de Falcone en 1992 con la segunda explosión del libro. Saviano reconstruye un episodio trascendental de la lucha contra la Mafia, una guerra que todavía continúa. Falcone dio pasos de gigante, siguió la pista del dinero, buscó arrepentidos que confesaran y orquestó un macrojuicio. Pese a los palos en las ruedas que le ponían algunos desde las altas instancias, logró asestar severos golpes a la organización. Esta juró matarlo y lo acabó consiguiendo. La reconstrucción que aquí se hace de su vida abarca otros dos aspectos relevantes: la intimidación, las dudas y las acusaciones de divismo que tuvo que soportar el juez, y también la importantísima presencia de quienes lo acompañaron en su gesta, porque no la llevó a cabo solo, sino apoyado por un equipo de colaboradores entregados a la causa. ¿Quién sino Roberto Saviano podía escribir el libro definitivo sobre Giovanni Falcone?
