International Production Networks in Asia Michael Borrus, Dieter Ernst, Stephan Haggard, 2003-09-02 The economic crisis of 1997 called East Asia's economic miracle into question and generated widespread criticism of the region's developmental models. However, the crisis did little to alter the growing economic integration of American, Japanese and Chinese firms who have created cross-border production networks. This book addresses the changing nature of high-tech industries in Asia, particularly in the electronics sector, where such networks are increasingly designed to foster and to exploit the region's highly heterogeneous technology, skills and know-how.

Merger Masters Kate Welling, Mario Gabelli, 2018-11-06 Merger Masters presents revealing profiles of monumentally successful merger investors based on exclusive interviews with some of the greatest minds to practice the art of arbitrage. Michael Price, John Paulson, Paul Singer, and others offer practical perspectives on how their backgrounds in the risk-conscious world of merger arbitrage helped them make their biggest deals. They share their insights on the discipline that underlies their fortunes, whether they practice the “plain vanilla” strategy of announced deals, the aggressive strategy of activist investment, or any strategy in between on the risk spectrum. Merger Masters delves into the human side of risk arbitrage, exploring how top practitioners deal with the behavioral aspects of generating consistent profits from risk arbitrage. The book also includes perspectives from the other side of the mergers and acquisitions divide in the form of interviews with a trio of iconic CEOs: Bill Stiritz, Peter McCausland, and Paul Montrone. All three took advantage of M&A opportunities to help build long-term returns but often found themselves at odds with the short-term focus of Wall Street and merger investors. Told in lively, accessible prose, with bonus facts and figures for transaction junkies, Merger Masters is an incomparable set of stories with plenty of unfiltered lessons from the best managers of our time.

Managing Convergence in Innovation Kong-rae Lee, 2016-09-01 Technology in several forms, especially Information Technology (IT), has a strong tendency to converge at varying degrees. This phenomenon of converging innovation is likely to deepen and widen in the future due to intense competition in global markets. Asian manufacturing firms in particular lead the global industrial innovation. Convergent innovation exists as a constant disequilibrium between reference technology and matching technology; innovations of these technologies occur at different degrees to attain an optimal balance. Innovations as a result of convergence are often beneficial, improving welfare and employment. This book sheds light on the little-discussed idea of convergent innovation with examples hailing from Asia. The book also proposes new theories and investigates convergence at the micro level – guaranteed food for thought for academics interested in innovation economics and management.
