**Scandinavian AIRLINES SYSTEM Aircraft Fleet Development 1946-2016** Birger Holmer Ulf,2016-02-23 SCANDINAVIAN AIRLINES SYSTEM (SAS) was established 1 August 1946. Three individuals that were involved since 1946 until recently in the development, evaluation, specifications and the acquisition process of all aircraft used by SAS over the 70 years are telling the stories how it happened. Many yet untold episodes from the discussions and negotiations with the major airframe and engine manufacturers reveal some interesting background why some aircraft were selected and some others not. SAS and the development people at the airline have over time also influenced the aviation industry which this book also has documented. The book was originally published in Swedish as the Swedish Aviation Historical Society 2014 Yearbook and was in 2015 awarded the Aviation book of the year in Sweden. The English translation now published 23 February 2016 is aimed at the international aviation community.

**IT and Business** Jens Christensen,2000 Industrialised societies have changed enormously since World War II. Business enterprises have laid the foundation for this process as well as adapted to a world where industrialisation and internationalisation have spread rapidly. It is probably safe to say that without IT this expansion would not have been possible, and the air transport industry has played a substantial and significant role in this development. This book follows the development and the interplay between information technology and business during the second part of the twentieth century. SAS has been selected as the central theme of this publication because the company, being a deeply integrated part of this general development, has also been an outstanding representative of business life, and especially the revolutionary progress of IT towards globalisation and the Internet towards the turn of the millennium.

**Strategic Relationship Marketing** Søren Hougaard,Mogens Bjerre,2002 There is more and more evidence that economic effectiveness and quality in customer relations must be viewed as a separate strategic issue in marketing. The attributes of exchanges, i.e. reciprocity, interdependence, partnership and transparency vis-a-vis every single customer create more profit and value for the company than do negotiating power and market dominance. This book encompasses strategical as well as operational points of view and gives a complete overview of strategic relationship marketing and the theoretical rationals and paradigms. The authors introduce the concept of relationship networks and discuss how to deal with the influence of relationship. Relationship marketing is dealt with as a real marketing discipline integrating economics, institutional factors, behavioral aspects and strategy.
