Great Exit Projects on the Vietnam War and the Antiwar Movement Carolyn DeCarlo,2019-07-15 The Vietnam War began an incredibly divisive moment in the United States, as many Americans questioned whether the war was necessary and morally legitimate. In this instructive book, readers will examine important topics involving the Vietnam War and the anti-war movement through project-based learning. Step-by-step exit projects are provided as models for students to use, and they inspire new creative, investigative projects as well. Colorful photographs and informative sidebars further illustrate the importance of this historical movement on our politics today.

Chicka Chicka Boom Boom Bill Martin,John Archambault,2020-06-30 This award-winning, exuberantly illustrated picture book is now available as an oversized classroom edition Chicka chicka boom boom Will there be enough room? There is always enough room for this rollicking alphabet chant that has been a children's favorite for over twenty years Bill Martin, Jr., and John Archambault's rhythmic text keeps the beat with Caldecott Honor illustrator Lois Ehlert's bold, cheerful art. This winning combination has made the Chicka Chicka series a classic.

Daily STEM Chris Woods,2020-09-07 From The Author: Has your school added a STEM class, or are you hoping to build more STEM into your school community? Buying a bunch of 3D printers and robot kits is a good start, but what does a sustainable STEM learning culture look like? This book will challenge you to think past the Daily STEM acronym and think about what it means to build a culture of STEM thinking in your school. You'll find plenty of practical tips and examples to make STEM relevant for every kid and infuse it into every classroom and every home in your community. Editorial Reviews: STEM can seem like such a big challenge for teachers and school leaders alike. We all want students engaged in meaningful, hands-on learning. But where do we begin? Start with Daily STEM. This awesome gift to educators by author Chris Woods is packed full of practical, logical, and easy steps teachers can and should take to bring STEM to life. It's like having Chris right there coaching you, helping you find STEM in everyday life. Daily STEM will have you building a culture of STEM in your school or classroom and bringing relevant learning to life. Darrin M Peppard, Ed.D. - Superintendent - Author of Road To Awesome - Renaissance Hall of Fame Chris' book Daily STEM is exactly what every teacher needs to promote curiosity and hands-on learning in the classroom. He prompts critical thinking and offers experiences that are fun and engaging for students. It is packed full of cool ideas and STEM inspiration-a must read!!! Jacie Maslyk - Educator - Author - STEM Enthusiast I absolutely love Daily STEM!! You will never be able to look at the world the same way after you read this gem! Hundreds of ideas will swirl through your head after each page. If you are searching for your teaching style, here it is: curiosity and connections. This is a book you will read more than once. Chris's personal stories will put a smile on your face as you reflect on your own stories. WOW Factor!! Epic! Dr. Frank Rudnesky - Educator - Author - Speaker - Consultant Daily STEM is a book I would normally have an aversion to! Teachers either love the idea of STEM, or they run as fast as they can when they hear the term. I used to run! Daily Stem offered me significant insight into so many ways educators can continue to provide STEM instruction/ideas and exploration across content areas and beyond the classroom walls. The Q and A style made Daily Stem an easy read. It also provided opportunity to revisit a question -and the answer- quite readily. A noisy classroom is a collaborative classroom. A messy classroom is an inventing classroom, sums up best practice and is a powerful reminder as we plan for the new school year! Science Curriculum Topic Study Page Keeley,Joyce Tugel,2019-09-11 Today’s science standards reflect a new vision of teaching and learning. | How to make this vision happen Scientific literacy for all students requires a deep understanding of the three dimensions of science education: disciplinary content, scientific and engineering practices, and crosscutting concepts. If you actively engage students in using and applying these three dimensions within curricular topics, they will develop a scientifically-based and coherent view of the natural and designed world. The latest edition of this best-seller, newly mapped to the Framework for K-12 Science Education and the Next Generation Science Standards (NGSS), and updated with new standards and research-based resources, will help science educators make the shifts needed to reflect current practices in curriculum, instruction, and assessment. The methodical study process described in this book will help readers intertwine content, practices, and crosscutting concepts. The book includes: • An increased emphasis on STEM, including topics in science, technology, and engineering • 103 separate curriculum topic study guides, arranged in six categories • Connections to content knowledge, curricular and instructional implications, concepts and specific ideas, research on student learning, K-12 articulation, and assessment Teachers and those who support teachers will appreciate how Curriculum Topic Study helps them reliably analyze and interpret their standards and translate them into classroom practice, thus ensuring that students achieve a deeper understanding of the natural and designed world.

What's the Big Deal About Addictions? James J. Crist,2021-08-30 Help teens make informed decisions about their health and wellness with judgment-free information about addictions. From drugs and alcohol to pervasive use of electronic devices, more teens are exhibiting addictive behaviors. What’s the Big Deal About Addictions? provides teens with lecture-free, reliable, and factual information about a range of addictions, from drugs and alcohol to electronic devices, social media, and other addictive activities, such as pornography, eating, gambling, and sex, among others. A practicing psychologist and a certified substance abuse counselor, Dr. Crist shares advice for teens who are having serious troubles with addiction and for teens with casual levels of use who may be concerned about their use. With teen stories and quotes included, What’s the Big Deal About Addictions? speaks directly to teens about the real-life struggles with casual use and addictions they’re seeing and experiencing among peers in school and in the broader community. Packed full of information to help teens make informed decisions, What’s the Big Deal About Addictions? covers: The difference between casual use and addictive use, and the consequences of using The types of addictions, addictive behavior, and the risks associated with each How to overcome an addiction and the types of treatments available How to know and accept when recovering from addiction may require giving up certain friendships Tips for preventing relapse or developing a secondary addiction Additional resources for help and information are provided at the back of the book.
