In/security in Colombia Josefina A. Echavarría, 2013-07-19 Based on geo- and biopolitical analyses, this book reconsiders how security policies and practices legitimate state and non-state violence in the Colombian conflict. Using the case study of the official Democratic Security Policy (DSP), Echavarría examines how security discourses write the political identities of state, self and others. She claims that the DSP delimits politics, the political, and the imaginaries of peace and war through conditioning the possibilities for identity formation. In/security in Colombia offers an innovative application of a large theoretical framework on the performative character of security discourses and furthers a nuanced understanding of the security problematique in a postcolonial setting. This wide-reaching study will benefit students, scholars and policy-makers in the fields of security, peace and conflict, and Latin American issues.

salvi a casa, lo fareste? The Stronghold Xan Fielding,2013 During the Second World War, Xan Fielding served for two years as an officer in the British Special Operations Executive on German-occupied Crete, where he ran an intelligence network in co-operation with the Cretan resistance movement. Seven years later, Fielding returned to Crete to spend a year travelling in the island's White Mountains (the stronghold of the title), revisiting sites of his wartime exploits and seeking out former comrades who had returned to their peacetime lives. His sojourn resulted in this remarkable memoir, a documentary-like record of days spent among Cretan peasants blended with history and literature -- a travelogue like no other. The Stronghold is a blending of history and culture with experience, but one wedded to fidelity. Fielding never arrives; there is no great journey of self. There is just a question answered about the war and youth ... he can't shake Crete, as no man can shake the formative experience of his youth. -- from the new foreword by Robert Messenger

Overcoming James J. Rondinone,2012-04 Overcoming teaches those from every walk of life how to experience God's presence, love, joy, and peace. God wants to help us learn how to think differently about ourselves according to his word in whatever area that we have weakness in. He wants to help us by providing a new way of thinking. This new way of thinking is contained in his word, and is applied here in this book to help you target and root out potential areas of weakness. Apply God's divine prescription for each one and this verse will become a reality in your life: John 8:32 And ye shall know

the truth, and the truth shall make you free.

The King's songs are a treasure-chest of jewels, telling not mere history but timeless truths about the King of Kings himself, David's magnificent God. With warmth and insight, the author draws out the lessons David learned in his turbulent life with the Lord and the rich gems he has bequeathed to followers of God today.

Environmental Change and the World's Futures Jonathan Paul Marshall,Linda H. Connor,2015-08-27 Climate change and ecological instability have the potential to disrupt human societies and their futures. Cultural, social and

ethical life in all societies is directed towards a future that can never be observed, and never be directly acted upon, and yet is always interacting with us. Thinking and acting towards the future involves efforts of imagination that are linked to our sense of being in the world and the ecological pressures we experience. The three key ideas of this book - ecologies, ontologies and mythologies - help us understand the ways people in many different societies attempt to predict and shape their futures. Each chapter places a different emphasis on the linked domains of environmental change, embodied experience, myth and fantasy, politics, technology and intellectual reflection, in relation to imagined futures. The diverse geographic scope of the chapters includes rural Nepal, the islands of the Pacific Ocean, Sweden, coastal Scotland, North America, and remote, rural and urban Australia. This book will appeal to researchers and students in anthropology, sociology, environmental studies, cultural studies, psychology and politics.
