**Feeding in Domestic Vertebrates** V. L. Bels, 2006

Domestication of vertebrates is based on the understanding of the needs of animals in their natural environment. Thus the success of this domestication throughout human history is largely dependant of the knowledge of the animal feeding behaviour. The aim of this volume is to provide advanced students and researchers with a review of current knowledge of feeding in domestic mammals and birds. The book also presents chapters on feeding behaviour in particular species; the scope is wide, covering not only ruminants, poultry and pigs, but also more specifically horses, rabbits and ostrich. Contributors include leading research workers from Europe, USA, Australia and South Africa.

**Agenda for a New Economy** David C. Korten, 2009 Today's economic crisis is the worst since the Great Depression. However, as David Korten shows, the steps being taken to address it do nothing to deal with the reality of a failed economic system. It's like treating cancer with a bandage. Korten identifies the deeper sources of the failure: Wall Street institutions that have perfected the art of creating wealth without producing anything of real value: phantom wealth. Our hope lies not with Wall Street, Korten argues, but with Main Street, which creates real wealth from real resources to meet real needs. He outlines an agenda to create a new economy-- locally based, community oriented, and devoted to creating a better life for all, not simply increasing profits. It will require changes to how we measure economic success, organize our financial system, even the very way we create money, an agenda Korten summarizes in his version of the economic address to the nation he wishes Barack Obama were able to deliver.

Isenberg,Mary Renck Jalongo,2006 Creative Thinking and Arts-Based Learning prepares preservice and inservice teachers to know why children's creative thinking and play are so important, know about children's play and creative thinking, and also know how to provide these experiences within the curriculum. It contains extensive coverage of the roles, responsibilities, and strategies that lead to a more child-centered, play-based

curriculum. An Applied Approach Many instructional guidelines and classroom strategies are presented throughout the text for integrating creative thinking and play into learning. Cases about preschoolers, K-2nd graders, and 3rd-4th graders open each chapter and show readers how teachers infuse the arts into learning. Meeting Standards. This new feature discusses how to provide for creativity in classrooms while also meeting state and national standards. Frequently Asked Questions. Another new feature poses common questions about issues, such as what materials and resources to use, how to adapt environments for diverse learners, and how to foster and assess creative thought. Misconceptions are dispelled with research-based answers. A Theoretical Approach Solid theory underlies all of the content. The authors' experience as university professors and practitioners is evident in their clear presentation of relevant theory. A Reflective Approach Teacher's Reflections in each chapter tell readers what other preservice and inservice teachers are thinking and doing in their classrooms relative to their experiences with the arts.
