Neurobiology of Grooming Behavior Allan V. Kalueff,Justin L. La Porte,Carisa L. Bergner,2010-05-20 Grooming is among the most evolutionary ancient and highly represented behaviours in many animal species. It represents a significant proportion of an animal's total activity and between 30-50% of their waking hours. Recent research has demonstrated that grooming is regulated by specific brain circuits and is sensitive to stress, as well as to pharmacologic compounds and genetic manipulation, making it ideal for modelling affective disorders that arise as a function of stressful environments, such as stress and post-traumatic stress disorder. Over a series of 12 chapters that introduce and explicate the field of grooming research and its significance for the human and animal brain, this book covers the breadth of grooming animal models while simultaneously providing sufficient depth in introducing the concepts and translational approaches to grooming research. Written primarily for graduates and researchers within the neuroscientific community.

It covers the largest number of microalgal products of commercial relevance, including biogas, biodiesel, bioethanol, biohydrogen, single-cell protein, single-cell oil, biofertilizers, pigments, polyunsaturated fatty acids, bioactive proteins, peptides and amino acids, bioactive polysaccharides, sterols, bioplastics, UV-screening compounds, and volatile organic compounds. Moreover, it presents and discusses the available engineering tools applied to microalgae biotechnology, such as process integration, process intensification, and techno-economic analysis applied to microalgal processes and products, microalgal biorefineries, life cycle assessment, and exergy analysis of microalgae-based processes and products. The coverage of a broad range of potential microalgae processes and products in a single volume makes this handbook an indispensable reference for engineering researchers in academia and industry in the fields of bioenergy, sustainable development, and high-value compounds from biomass, as well as graduate students exploring those areas. Engineering professionals in bio-based industries will also find valuable information here when planning or implementing the use of microalgal technologies. Covers theoretical background information and results of recent research. Discusses all commercially relevant microalgae-based processes and products. Explores the main emerging engineering tools applied to microalgae processes, including techno-economic analysis, process integration, process intensification, life cycle assessment, and exergy analyses.

A Research Agenda for Environmental Management Kathleen E. Halvorsen,Chelsea Schelly,Robert M. Handler,Erin C. Pischke,Jessie L. Knowlton,2019 The understanding of global environmental management problems is best achieved through transdisciplinary research lenses that combine scientific and other sector (industry, government, etc.) tools and perspectives. However, developing effective research teams that cross such boundaries is difficult. This book demonstrates the importance of transdisciplinarity, describes challenges to such teamwork, and provides solutions for overcoming these challenges. It includes case studies of transdisciplinary teamwork, showing how these solutions have helped groups to develop better understandings of environmental problems and potential responses.

Cardiovascular Surgery Rui Manuel de Sousa Sequeira Antunes de Almeida,Fabio Biscegli Jatene,2018-12-14 This clinical casebook is comprised of surgical cases involving the most important cardiovascular diseases in a concise, easy-to-read format (5x8 in trim size, like other titles in this burgeoning, informal product line in the Springer clinical medicine program). Each chapter is a case that opens with a unique clinical presentation, followed by a description of the diagnosis, assessment and management techniques used to treat it, as well as questions and answers (between 8 and 10) about relevant aspects related to the diagnosis and treatment of the addressed disease. The Q&A section will broaden discussion and increase the title's pedagogical value. The casebook features 40 surgical cases in the following thematic areas: Aortic Disease, Arrhythmias, Cardiac Tumors, Coronary Insufficiency, Congenital Heart Disease, Endovascular Therapies, Heart Failure, Heart Transplantation, Mechanical Circulatory Support, Pericardial Disease, Pulmonary Embolism and Valvular Heart Disease. This book will be prepared by the Brazilian Department for Academic Leagues of Cardiovascular Surgery, within the Brazilian Society of Cardiovascular Surgery (BSCVS). This department is the section within BSCVS that consists of the academic leagues of cardiovascular surgery from each university throughout the country. In Brazil, medical academic leagues are organizations that gathers students, interns and residents to discuss a certain topic and promote research and teaching-oriented extra-class activities, supervised by a group of professors. Thus trainees will have involvement in writing the chapters and the senior professor supervisors will edit and finalize the work. Basically, each chapter is written by an intern or resident and, ultimately, his/her supervisor. As the books volume editors, doctors Almeida and Jatene will have final responsibility for the cases and overall manuscript.

Sergio Y. Alexandre Vidal Porto,2016 Winner of the Paran Literary Prize for Best Novel Sergio Y. is a prize-winning inspirational work of fiction about gender, identity, self-reinvention, what it means to live a full life, and the search for happiness. Armando, one of the most renowned therapists in S o Paulo, is nearing the end of a long, illustrious career. Against his better judgment he

agrees to take on a new patient: Sergio, the teenage son of a wealthy Brazilian businessman. Sergio suffers from malaise and his parents are concerned. But after a number of sessions, Sergio abruptly interrupts his course of therapy following a trip to New York, saying only that he has found his own path to happiness and must pursue it alone. Though perplexed, and somewhat annoyed, Armando lets the matter rest without further ado. That is, until he learns from Sergio's mother that the boy has moved to New York and is transitioning. Sergio is becoming Sandra. How could he have missed that? Something so big? An accomplished therapist like him, how could he not have seen... Armando embarks on a journey to discover the truth about his former patient and about himself. Along the way, he will learn that compassion is sometimes conveyed in the most mysterious ways. Exotic Nations Renata Wasserman,2018-03-15 In this highly original and critically informed book, Renata R. Mautner Wasserman looks at how, during the first decades following political independence, writers in the United States and Brazil assimilated and subverted European images of an exotic New World to create new literatures that asserted cultural independence and defined national identity. Exotic Nations demonstrates that the language of exoticism thus became part of the New World's interpretation of its own history and natural environment.

Structural Equation Modelling with Partial Least Squares Using Stata and R Mehmet Mehmetoglu,Sergio Venturini,2020-12-22 Partial least squares structural equation modelling (PLS-SEM) is becoming a popular statistical framework in many fields and disciplines of the social sciences. The main reason for this popularity is that PLS-SEM can be used to estimate models including latent variables, observed variables, or a combination of these. The popularity of PLS-SEM is predicted to increase even more as a result of the development of new and more robust estimation approaches, such as consistent PLS-SEM. The traditional and modern estimation methods for PLS-SEM are now readily facilitated by both open-source and commercial software packages. This book presents PLS-SEM as a useful practical statistical toolbox that can be used for estimating many different types of research models. In so doing, the authors provide the necessary technical prerequisites and theoretical treatment of various aspects of PLS-SEM prior to practical applications. What makes the book unique is the fact that it thoroughly explains and extensively uses comprehensive Stata (plssem) and R (cSEM and plspm) packages for carrying out PLS-SEM analysis. The book aims to help the reader understand the mechanics behind PLS-SEM as well as performing it for publication purposes. Features: Intuitive and technical explanations of PLS-SEM methods Complete explanations of Stata and R packages Lots of example applications of the methodology Detailed interpretation of software output Reporting of a PLS-SEM study Github repository for supplementary book material The book is primarily aimed at researchers and graduate students from statistics, social science, psychology, and other disciplines. Technical details have been moved from the main body of the text into appendices, but it would be useful if the reader has a solid background in linear regression analysis.

Biographical dictionary of refugees of nazi fascism in Brazil Casa Stefan Zweig,2022-04-27 They were musicians, writers, painters, actors, scientists, mathematicians, architects, doctors, photographers, dancers, businessmen and even circus clowns, police officers and football coaches. All refugees from nazi fascism, who sought salvation from 1933 onwards. They are remembered in 300 illustrated biographies, representing the thousands of fugitives who made or remade their lives and careers in Brazil and contributed so much to Brazilian society. Each trajectory, an epic,

from birth and training in the Old World, the terrible dangers and sufferings faced with the arrival of Nazism, the struggles and adventures to escape, obtain visas and embark towards freedom. The Dictionary of Refugees from Nazi fascism in Brazil reports all this. It is yet another publication by Casa Stefan Zweig, based in Petrópolis and dedicated to the dissemination and study of the work of the great Austrian writer who died here and the role of refugees who, like him, escaped from the totalitarianism.

Doing Business 2012 World Bank,2011-10-18 Ninth in a series of annual reports comparing business regulations in 183 economies, *Doing Business 2012* measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall ease of doing business, and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. *Doing Business 2012* includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since *Doing Business 2006* was published in 2005. A new distance to frontier measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of *Doing Business* is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The *Doing Business* report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [*Doing Business* started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [*Doing Business*] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist
