Scientific Babel Michael D. Gordin, 2015-04-13 English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With *Scientific Babel*, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and *Scientific Babel* reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

Post-cholecystectomy Bile Duct Injury Vinay K. Kapoor, 2021-04-18 This book provides detailed insight to the readers into various aspects of bile duct injury. Bile duct injury is a common complication of cholecystectomy to treat gall stone disease prevalent all over the world. Risk of bile duct injury is more during a laparoscopic procedure as compared to open procedure and most cholecystectomies today are performed laparoscopically. Bile duct injury causes major morbidity and may even result in death, additionally it increases the healthcare costs and impairs quality of life. It is therefore important that every surgeon who performs cholecystectomy knows how to suspect, diagnose, manage and prevent bile duct injury. This book provides practical information and offers assistance in managing patients with difficult cases of bile duct injury. It summarises Dr Kapoor's experience with management of more than 1,000 patients with post-cholecystectomy bile duct injury/ biliary stricture. Chapters cover anatomy, epidemiology, mechanism, pathophysiology, clinical presentation, investigations, classification, diagnosis, management and prevention of bile duct injury. It also includes non-medical issues including health care, socio-economic, costs and quality of life.

Textbook of Hernia William W. Hope, William S. Cobb, Gina L. Adrales, 2017-04-07 This textbook provides a comprehensive, state-of-the art review of the field of hernia surgery, and will serve as a valuable resource for clinicians, surgeons and researchers with an interest in both inguinal and ventral/incisional hernia. This book provides an overview of the current understanding of the biologic basis of hernia formation as well as laying the foundation for the importance of hernia research and evaluating outcomes in hernia repair. Diagnosis and management strategies for inguinal and ventral hernia are discussed in detail with separate techniques sections for the most widely used procedures in this field as well as emerging technologies such as robotic and single incision surgery. Pertinent associated topics to inguinal hernia surgery such as chronic groin and athletic pubalgia are covered in detail. For incisional hernias, associated topics such as hernia prevention and enhanced recovery protocols are discussed. For both inguinal and ventral/incisional hernias mesh choices and available mesh technologies are discussed in detail as this remains an often confusing matter for the general surgery. When appropriate, chapters to highlight controversies in care are featured such as the use of synthetic mesh in contaminated surgery and laparoscopic closure of defects in laparoscopic ventral hernia repair. Current recommendations and outcomes data are highlighted when available for each technique. *Textbook of Surgery* will serve as a very useful resource for physicians and researchers dealing with, and interested in, abdominal wall

hernias. It will provide a concise yet comprehensive summary of the current status of the field that will help guide patient management and stimulate investigative efforts.

Taking Offense Birgit Meyer, Christiane Kruse, Anne-Marie Korte, 2018 What makes a picture offensive to some people and not to others? In diverse, pluralistic societies around the world, images are triggering heated controversy as never before. Their study offers a perfect entry point into the clashes between different values, ideas, and sensibilities. How is the relation between regimes of visibility in art, journalism, politics, and religion negotiated in plural settings? Situated at the interface of art history, anthropology and religious studies, this volume unravels the dynamics of taking offense in current politics and aesthetics of cultural representation in Europe and beyond.

Dictionary of Minor Planet Names Lutz D. Schmadel, 2009-06-23 The history and rapid development of minor planet discovery In addition to citing the bibliographic source of the name coveries constitute a fascinating story and one with a long, we also provide the source of numbering. A spectacular breathtaking evolution. By October 2005, the official concordance list will enable the evaluation of the total of numbered planets exceeded the remarkable record respective publication dates. The complete work is, cornerstone of 100,000 objects and only three years later of course, a thoroughly revised and considerably enhanced in November 2008 we are even faced with minor planet larged data collection and every effort has been made () 200000 . This dramatic evolution must be compared to check and correct each single piece of information () with the huge time span of two centuries 1801-2000 again. Siting Futurity Susan Ingram, 2021-05-03 It also shows how work with a connection to Vienna by international stars like David Bowie, Wes Anderson, and Christoph Schlingensiefel has absorbed the same principles. While the overwhelming scale of technological development and the ensuing problems and crises may not have been deliberately designed to induce resignation, passivity, and despair, those who benefit from the related hyperobjects of financialization and climate change must find it convenient that they do, as demoralization reduces resistance to their profit-making machinations. It is in this context that Red Vienna's proud tradition of social engagement and long tradition of resistance and radicality deserves to be better known. Susan Ingram is Professor in the Department of Humanities at York University, Toronto, where she coordinates the Graduate Diploma for Comparative Literature and is affiliated with the Canadian Centre for German and European Studies and the Research Group on Language and Culture Contact. .

The Selection and Use of Essential Medicines WHO Expert Committee on the Selection and Use of Essential Medicines, 2004 This report presents the recommendations of the WHO Expert Committee responsible for updating the WHO Model List of Essential Medicines. The first part contains a progress report on the new procedures for updating the Model List and the development of the WHO Essential Medicines Library. It continues with a section on changes made in revising the Model List followed by a review of some sections such as hypertensive medicines and fast track procedures for deleting items. Annexes include the 13th version of the Model List and items on the list sorted according to their 5-level Anatomical Therapeutic Chemical classification codes.

The Wondrous Story of Anesthesia Edmond I Eger II, Lawrence J. Saidman, Rod N. Westhorpe, 2013-09-14 Edited and written by an international who's who of more than 100 authors, including anesthesiologists, nurse anesthetists, bench scientists, a surgeon, and representatives of industry, this text provides a comprehensive history of anesthesia, unique in its focus on the people and events that shaped the specialty around the world, particularly during the past 70 years when anesthesia emerged from empiricism and developed into a science-based practice.

Planet Dialectics Wolfgang Sachs, 2015-03-12 All effects of human action will inevitably be played out within our planet's limits; any hope of infinity is an illusion. And yet, as Wolfgang Sachs warned almost twenty years ago, environmental concerns have been assimilated into the rhetoric, dynamics and power structures of development. This classic collection of trenchant and elegant explorations addresses the crisis of the Western world's relations with nature and social justice. Examining the notions of efficiency, speed, globalization and development, Sachs shows that sustainability, truly conceived, is incompatible with the worldwide rule of economism. Planet Dialectics reveals that the Western development model is fundamentally at odds with both the quest for justice among the world's people and the aspiration to reconcile humanity and nature.

The Eradication of Infectious Diseases Donald Hopkins, 1998-03-06 In 1993, an International Task Force for Disease Eradication evaluated over 80 potential candidate diseases and made recommendations. However, little has been done to develop the science of eradication systematically. This book reports the findings of a multidisciplinary workshop on the eradication of infectious diseases. It reviews the history of eradication efforts and lessons from previous campaigns and distinguishes among eradication, elimination, and control programs and extinction of an etiologic agent. It addresses a wide range of related issues, including biological and socio-political criteria for eradication, costs and benefits of eradication campaigns, opportunities for strengthening primary health care in the course of eradication efforts, and other aspects of planning and implementing eradication programs. Finally, it stresses the importance of global mechanisms for formulating and implementing such programs.

Seamounts Tony J. Pitcher, Telmo Morato, Paul J. B. Hart, Malcolm R. Clark, Nigel Haggan, Ricardo S. Santos, 2008-04-15 Seamounts are ubiquitous undersea mountains rising from the ocean seafloor that do not reach the surface. There are likely many hundreds of thousands of seamounts, they are usually formed from volcanoes in the deep sea and are defined by oceanographers as independent features that rise to at least 0.5 km above the seafloor, although smaller features may have the same origin. This book follows a logical progression from geological and physical processes, ecology, biology and biogeography, to exploitation, management and conservation concerns. In 21 Chapters written by 57 of the world's leading seamount experts, the book reviews all aspects of their geology, ecology, biology, exploitation, conservation and management. In Section I of this book, several detection and estimation techniques for tallying seamounts are reviewed, along with a history of seamount research. This book represents a unique and fresh synthesis of knowledge of seamounts and their biota and is an essential reference work on the topic. It is an essential purchase for all fisheries scientists and managers, fish biologists, marine biologists and ecologists, environmental scientists, conservation biologists and oceanographers. It will also be of interest to members of fish and wildlife agencies and government departments covering conservation and management. Supplementary material is available at: www.seamountsbook.info

Competing Germanies Robert Kelz, 2020-02-15 Following World War II, German antifascists and nationalists in Buenos Aires believed theater was crucial to their highly politicized efforts at community-building, and each population devoted considerable resources to competing against its rival onstage. *Competing Germanies* tracks the paths of several stage actors from European theaters to Buenos Aires and explores how two of Argentina's most influential immigrant groups, German nationalists and antifascists (Jewish and non-Jewish), clashed on the city's stages. Covered widely in German- and Spanish-language media, theatrical performances articulated strident Nazi, antifascist, and Zionist platforms. Meanwhile, as their thespian representatives grappled onstage for political leverage among emigrants and Argentines, behind the curtain, conflicts simmered within partisan institutions and among theatergoers. Publicly they projected unity, but offstage nationalist, antifascist, and Zionist populations were rife with infighting on issues of political allegiance, cultural identity and, especially, integration with their Argentine hosts. *Competing Germanies* reveals interchange and even mimicry between antifascist and nationalist German cultural institutions.

Furthermore, performances at both theaters also fit into contemporary invocations of diasporas, including taboos and postponements of return to the native country, connections among multiple communities, and forms of longing, memory, and (dis)identification. Sharply divergent at first glance, their shared condition as cultural institutions of emigrant populations caused the antifascist Free German Stage and the nationalist German Theater to adopt parallel tactics in community-building, intercultural relationships, and dramatic performance. Its cross-cultural, polyglot blend of German, Jewish, and Latin American studies gives *Competing Germanies* a wide, interdisciplinary academic appeal and offers a novel intervention in Exile studies through the lens of theater, in which both victims of Nazism and its adherents remain in focus.

The Selection and Use of Essential Medicines World Health Organization, 2017 This report presents the recommendations of the WHO Expert Committee responsible for updating the WHO Model Lists of Essential Medicines. It contains a summary of the Committee's considerations and justifications for additions and changes to the Model Lists, including its recommendations. Annexes to the main report include the revised version of the WHO Model List of Essential Medicines (20th edition) and the WHO Model List of Essential Medicines for Children (6th edition). In addition there is a list of all the items on the Model Lists sorted according to their Anatomical Therapeutic Chemical (ATC) classification codes.

Sustainable Logistics Wolf-Rüdiger Bretzke, Karim Barkawi, 2012-12-14 Currently the notion of sustainability is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

Doing Fieldwork in Japan Theodore C. Bestor, Patricia G. Steinhoff, Victoria Lyon Bestor, 2003-07-31 *Doing Fieldwork in Japan* taps the expertise of North American and European specialists on the practicalities of conducting long-term research in the social sciences and cultural studies. In lively first-person accounts, they discuss their successes and failures doing fieldwork across rural and urban Japan in a wide range of settings: among religious pilgrims and adolescent consumers; on factory assembly lines and in high schools and wholesale seafood markets; with bureaucrats in charge of defense, foreign aid, and social welfare policy; inside radical political movements; among adherents of New Religions; inside a prosecutor's office and the JET Program for foreign English teachers; with journalists in the NHK newsroom; while researching race, ethnicity, and migration; and amidst fans and consumers of contemporary popular culture. Contributors: David M. Arase, Theodore C. Bestor, Victoria Lyon Bestor, Mary C. Brinton, John Creighton Campbell, Samuel Coleman, Suzanne Culter, Andrew Gordon, Helen Hardacre, Joy Hendry, David T. Johnson, Ellis S. Krauss, David L. McConnell, Ian Reader, Glenda S. Roberts, Joshua Hotaka Roth, Robert J. Smith, Sheila A. Smith, Patricia G. Steinhoff, Merry Isaacs White, Christine R. Yano.

Endoscopic Surgery Frederick L. Greene, Jeffrey L. Ponsky, 1994 Written by the authorities in endoscopic surgery, this text presents all diagnostic and therapeutic endoscopic procedures in a single volume. The book covers all applications of this technology with particular emphasis on the role of endoscopy in the care of the individual patient and how the technique complements routine surgical practice. Well illustrated, with over 400 color photographs to aid in the interpretation of the procedures.

Nutrition and Health in Developing Countries Richard David Semba, Martin W. Bloem, 2008-06-26 This updated and expanded book was written with the underlying conviction that

global health and nutrition problems can only be solved through a firm understanding of the different levels of causality and the interactions between the various determinants. This volume provides policy makers, nutritionists, students, scientists, and professionals with the most recent and up-to-date knowledge regarding major health and nutritional problems in developing countries.
