La science de l'information : Origines, théories et paradigmes IBEKWE-SANJUAN Fidelia, 2012-10-01

Cet ouvrage de synthèse sur les fondements théoriques et épistémologiques de la science de l'information répond à trois questions : - existe-t-il une science de l'information à part entière ? - comment se définit l'information, objet de cette science ? - y a-t-il une spécificité française de la science de l'information ? Ce livre compare les chemins parcourus par la science de l'information en France et dans le reste du monde. Il contextualise cette évolution à l'aune d'une diversité d'inscriptions disciplinaires. L'enjeu de la science de l'information est de concilier l'approche réaliste de la connaissance, l'approche individualiste des sciences cognitives et l'approche collectiviste où les domaines sont façonnés et les comportements sont modulés par les environnements, les cultures et les construits sociaux partagés. Cette étude sera utile à tous les chercheurs, étudiants et professionnels désirant approfondir leurs connaissances sur les fondements théoriques de la science de l'information.

Commande des procédés (3e ed.) CORRIOU Jean-Pierre, 2012-09-11 Cette troisième édition a été enrichie par l'introduction de nouveaux exemples et de méthodes récentes. En un volume unique, le livre propose une synthèse progressive et approfondie des principales méthodes de commande exposées sous forme théorique et illustrées sur des exemples variés de procédés : réacteurs chimiques, biologiques, de polymérisation, craqueur catalytique, colonne de distillation. Les six parties couvrent la modélisation et la commande continue monovariable, la commande multivariable par fonction de transfert, l'identification et la commande en temps discret, la commande optimale et prédictive multivariable,

la commande non linéaire et les observateurs d'état. Cet ouvrage s'adresse aussi bien aux étudiants de 2e et 3e cycle qu'aux chercheurs, enseignants et ingénieurs.

Primer amor (Sintonías # 2) Patricia Sutherland, Mark Brady fue el primer amor adolescente de Shannon, y la única vez que él se dignó a quedar con ella, lo hizo para ligar con su hermana. Cuando trece años después vuelven a verse, él no la reconoce. Pero las cosas son diferentes ahora. Ella es la asistente social encargada de los niños que Mark tiene en acogimiento... Y la primera mujer de la que se enamora en su vida.

Cornfield Laughter Dennis L. Siluk Ed.D., 2009-04
The novella, *Cornfield Laughter*, is an interesting parody, and tale of the lives of a number of characters, in particular, two: Shannon O'Day, a retired labour worker in the Midwest (a man direct, with little social trappings), who seems to have led an arduous life of drinking, brawling, to a point, womanizing. And Poggi Ingway, past-middle age, a foundry worker; it is 1966. Both are searching for contentment in life. Shannon thought he had it, until his wife left. Poggi seems to have left it in San Francisco, in an afternoon affair. For that matter, all the characters in the story are seeking in one way or another, that same

ingredient, contentment. Yet Poggi anticipates suicide. The story ends as all the characters are drawn together, a glimpse of their lives are given to the reader...to include the promiscuous young Annabelle and her co-worker Maribel, Old Josh the diner cook, Jake and Zam-Zam (a tap dancer). Included in the book are ten short stories; four in English and Spanish: In the Eyes of the Bull (Seville, 1998); Hills like Green Iguanas, (Vietnam, 1971); A Toucan against One (from the Amazon); The Book Story (a spoof, of sort); and several others.

Our Chemical Selves Dayna Nadine Scott,2015-02-25 Everyday exposures to common chemicals found in homes, schools, and workplaces are having devastating long-term and inter-generational consequences on human health. At the same time, the risks associated with these exposures (and the burdens of managing them) rest disproportionately on the shoulders of women. Written by leading researchers in science, law, and public policy, the chapters in *Our Chemical Selves* critically examine the system that manufactures the chemicals as well as the social, political, and gender relations that enable harmful chemicals to continue being produced and consumed. This book demonstrates the urgent need to revise existing approaches to the regulation of toxic substances in Canada.
