Shazam Entertainment Ltd.

Jeremy W Morris,Sarah Murray

Shazam and Its Creators Kristi Holl,2014-12-15 Thanks to Shazam's services and products, we no longer have to spend hours wondering about the title of a song we heard in passing or wait to hear it again to find out who sings it. With Shazam, consumers can instantly find song, movie, or product information at the touch of a button, without even requiring a search engine. The foresight of the company's four founders—which even anticipated smartphones—made possible one of the early smartphone apps now used by over 400 million people. Their stories and the development of this remarkable business are chronicled in this volume.

Faster Ankit Fadia,2014-12-18 Our phones, computers and tablets are getting more powerful—but how many of us know the ways to get the most out of them? Bestselling author Ankit Fadia shows you how. • Send an email in the future • Fake an incoming call on your mobile phone • Catch a cheating partner red-handed! • Remember where you parked your car • Block inappropriate websites from your kids • Automate tasks on your mobile phone • Hide files inside photographs! Faster: 100 Ways to Improve Your Digital Life contains all the tips and tricks for you to stretch the limits of emails, computers, social networks, video sites and everything else digital. With easy-to-use examples and loads of screenshots, Faster is the perfect digital companion for you.

Appified Jeremy W Morris,Sarah Murray,2018-10-23 Snapchat. WhatsApp. Ashley Madison. Fitbit. Tinder. Periscope. How do we make sense of how apps like these-and thousands of others-have embedded themselves into our daily routines, permeating the background of ordinary life and standing at-the-ready to be used on our smartphones and tablets? When we look at any single app, it's hard to imagine how such a small piece of software could be particularly notable. But if we look at a collection of them, we see a bigger picture that reveals how the quotidian activities apps encompass are far from banal: connecting with friends (and strangers and enemies), sharing memories (and personally identifying information), making art (and trash), navigating spaces (and reshaping places in the process). While the sheer number of apps is overwhelming, as are the range of activities they address, each one offers an opportunity for us to seek out meaning in the mundane. Appified is the first scholarly volume to examine individual apps within the wider historical and cultural context of media and cultural studies scholarship, attuned to issues of politics and power, identity and the everyday.

Bridging Music Informatics with Music Cognition Naresh N. Vempala,Frank A. Russo,Geraint A. Wiggins,2018-09-14 Music informatics is an interdisciplinary research area that encompasses data driven approaches to the analysis, generation, and retrieval of music. In the era of big data, two goals weigh heavily on many research agendas in this area: (a) the identification of better features and (b) the acquisition of better training data. To this end, researchers have started to incorporate findings and methods from music cognition, a related but historically distinct research area that is concerned with elucidating the underlying mental processes involved in music-related behavior.

Mobile Learning Scott McQuiggan,Jamie McQuiggan,Jennifer Sabourin,Lucy Kosturko,2015-03-09 Explore the game-changing technology that allows mobile learning to effectively reach K-12 students Mobile Learning: A Handbook for Developers, Educators and Learners provides research-based foundations for developing, evaluating, and integrating effective mobile learning pedagogy. Twenty-first century students require twenty-first century technology, and mobile devices provide new and effective ways to educate children. But with new technologies come new challenges—therefore, this handbook presents a comprehensive look at mobile learning by synthesizing relevant theories and drawing practical conclusions for developers, educators, and students. Mobile devices—in ways that the laptop, the personal computer, and netbook computers have not—present the opportunity to make learning more engaging, interactive, and available in both traditional classroom settings and informal learning environments. From theory to practice, Mobile Learning explores how mobile devices are different than their technological predecessors, makes the

case for developers, teachers, and parents to invest in the technology, and illustrates the many ways in which it is innovative, exciting, and effective in educating K-12 students. Explores how mobile devices can support the needs of students Provides examples, screenshots, graphics, and visualizations to enhance the material presented in the book Provides developers with the background necessary to create the apps their audience requires Presents the case for mobile learning in and out of classrooms as early as preschool Discusses how mobile learning enables better educational opportunities for the visually impaired, students with Autism, and adult learners. If you're a school administrator, teacher, app developer, or parent, this topical book provides a theoretical, well-researched discussion of the pedagogical theory and mobile learning, as well as practical advice in setting up a mobile learning strategy.

Billboard ,2010-07-03 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Digital Rights Management Eberhard Becker,Willms Buhse,Dirk Günnewig,Niels Rump,2003-11-19 Digital Rights Management (DRM) is a topic of interest to a wide range of people from various backgrounds: engineers and technicians, legal academics and lawyers, economists and business practitioners. The two conferences on the issue held in 2000 and 2002 in Berlin, Germany, brought these people together for fruitful discussions. This book continues this process by providing insights into the three main areas that DRM in?uences and that DRM is influenced by: technology, economics, and law and politics. Looking at the first results of the two conferences we would like to emphasize three aspects. Firstly, DRM is a fairly young topic with many issues still - resolved. Secondly, there is still an acute lack of objective information about DRM and the consequences of using (or not using) DRM in our Information Society. And, finally, only open discussions amongst all the interested parties and people from different scientific and practical backgrounds can help to create a foundation on which DRM can actually become useful.

iPhone 5 Portable Genius Paul McFedries,2012-10-17 Make the most of everything your exciting new iPhone 5 has to offer Now that you have the latest and greatest iPhone, it's time to find all the best and most fun ways to use it. This quick and handy guide presents all the important stuff you want to know, in a hip, helpful way. Packed with tips, tricks, and techniques, this edition covers the practical as well as the newest and coolest features, things like iOS 5, Siri, FaceTime video calling, HD video recording, multitasking, and much more. Foundations of Intelligent Systems Troels Andreasen,Henning Christiansen,Juan-Carlos Cubero,Zbigniew W. Ras,2014-06-03 This book constitutes the refereed proceedings of the 21st International Symposium on Methodologies for Intelligent Systems, ISMIS 2014, held in Roskilde, Denmark, in June 2014. The 61 revised full papers were carefully reviewed and selected from 111 submissions. The papers are organized in topical sections on complex networks and data stream mining; data mining methods; intelligent systems applications; knowledge representation in databases and systems; textual data analysis and mining; special session: challenges in text mining and semantic information retrieval; special session: warehousing and OLAPing complex, spatial and spatio-temporal data; ISMIS posters.

Foundations of Intelligent Systems Li Chen,Alexander Felfernig,Jiming Liu,Zbigniew W. Ras,2013-12-06 This book constitutes the

proceedings of the 20th International Symposium on Methodologies for Intelligent Systems, ISMIS 2012, held in Macau, China, in December 2012. The 42 regular papers and 11 short papers presented were carefully reviewed and selected from 88 submissions. They are organized in topical sections named: knowledge discovery and data mining; intelligent information systems; text mining and language processing; knowledge representation and integration; music information retrieval; recommender systems; technology intelligence and applications; product configuration; human factors in information retrieval; social recommender systems; and warehousing and OLAPing complex, spatial and spatio-temporal data.

AI in Wireless for Beyond 5G Networks Sukhdeep Singh,Yulei Wu,Mohan Rao GNS,Kaustubh Joshi,Payam Barnaghi,Madhan Raj Kanagarathinam,2024-02-02 Artificial intelligence (AI) is a game changer in many domains, and wireless communication networks are no exception. With the advent of 5G networks, we have witnessed rapid growth in wireless connectivity, which has led to unprecedented opportunities for innovation and new use cases. However, as we move beyond 5G (B5G), the challenges and opportunities are set to become even more significant, offering new, previously unimaginable services. AI in Wireless for Beyond 5G Networks provides a comprehensive overview of the use of AI in wireless communication for B5G networks. The authors draw on their expertise in the field to explore the latest developments in AI technologies and their applications in B5G wireless communication systems. The book discusses a wide range of topics, including enabling AI technologies, architecture, and applications of AI from smartphones, radio access networks (RANs), edge and core networks, and application service providers. It also discusses the trends in on-device AI for B5G networks. This book is written in an accessible style, making it an ideal resource for academics, researchers, and industry professionals in wireless communication. It provides valuable insights into the latest field trends and developments and practical possibilities for implementing AI technologies in wireless communication systems. Above all, this book is a testament to the power of collaboration and innovation in wireless communication. The authors' dedication and expertise have produced a valuable resource for anyone interested in the latest AI and wireless communication developments. This book will inspire and inform readers, and we highly recommend it to scholars interested in the future of AI in wireless communication.

MultiMedia Modeling Xiangjian He,Suhuai Luo,Dacheng Tao,Changsheng Xu,Jie Yang,Muhammad Abul Hasan,2014-12-22 The two-volume set LNCS 8935 and 8936 constitutes the thoroughly refereed proceedings of the 21st International Conference on Multimedia Modeling, MMM 2015, held in Sydney, Australia, in January 2015. The 49 revised regular papers, 24 poster presentations, were carefully reviewed and selected from 189 submissions. For the three special session, a total of 18 papers were accepted for MMM 2015. The three special sessions are Personal (Big) Data Modeling for Information Access and Retrieval, Social Geo-Media Analytics and Retrieval and Image or video processing, semantic analysis and understanding. In addition, 9 demonstrations and 9 video showcase papers were accepted for MMM 2015. The accepted contributions included in these two volumes represent the state-of-the-art in multimedia modeling research and cover a diverse range of topics including: Image and Video Processing, Multimedia encoding and streaming, applications of multimedia modelling and 3D and augmented reality.

New Frontiers in Mining Complex Patterns Annalisa Appice,Michelangelo Ceci,Corrado Loglisci,Giuseppe Manco,Elio Masciari,Zbigniew W. Ras,2015-04-27 This book constitutes the thoroughly refereed post-conference proceedings of the Third International Workshop on New Frontiers in Mining Complex Patterns, NFMCP 2014, held in conjunction with ECML-PKDD 2014 in Nancy, France, in September 2014. The 13 revised full papers presented were carefully reviewed and selected from numerous submissions. They illustrate advanced data mining techniques which preserve the informative richness of complex data and allow for efficient and effective identification of complex information units present in such data. The papers are organized in the following sections: classification and regression; clustering; data streams and sequences; applications.

Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Technologies of the Mind Stanislav Tregub,2020-08-08 The brain is the source of sensations, emotions, desires, thoughts, memories, movement and behavior control. All these are aspects of the process we call the Mind. Despite a vast amount of data on the nervous system functioning down to the molecular level, no concept has yet uncovered the physical mechanism and the technology of this process. With this aim in sight, the author continues to develop the Teleological Transduction Theory. The book contains hypotheses about the physical nature of the Mind and provides examples of how physics manifests in the nervous system physiology. It also shows how the Mind's algorithm produces a reality model with constant updating based on incoming data and performs the self-learning functions. The theory encompasses the physical processes that create the enormous capacity, speed and multi-level complexity of our memory. It solves the riddle of how the brain forms and reproduces a vast number of representations almost instantly. Building a model of reality is not an end to itself. The final goal is to act based on this model. The nervous system specializes in controlling the body and organizing purposeful movement. But how does it perform the function? The book contains hypotheses about the technology and physical mechanism that create the observed speed and efficiency of motion control. Taking all these aspects together, the proposed theory aims to cover the explanatory gap about the physical nature of the Mind.

Literary Characters in Intellectual Property Law Jani McCutcheon,2023-03-02 This ground-breaking book critically interrogates how literary characters are regulated under copyright, moral rights, and trademark law, challenging important foundations that underscore engagement with literary characters. Using interesting examples, and referencing literary theory, Literary Characters in Intellectual Property Law offers an in-depth exploration of both the law and the diverse and conflicting interests that are impacted by literary character appropriation, incorporating the perspectives of owners, authors, appropriators, and consumers.

Billboard ,2005-12-03 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Shazam! (2018-) #1 Geoff Johns,2018-12-05 The superstar team of writer Geoff Johns and artist Dale Eaglesham reunite to launch the first all-new SHAZAM! monthly title set in the DC Universe in almost 20 years! (What took you guys so long?!) Teenager turned super-hero Billy Batson struggles to balance school and superheroics! (Guess which one is more fun?) But when Shazam unlocks a shocking secret deep within the Rock of Eternity, it challenges everything he knows about the worlds of magic and his familyÕs future as its champions! Also, witness the bizarre team-up of Dr. Sivana and Mr. Mind as they set off to build a society all their own! DonÕt miss the start of an epic run in the making as ÒShazam and the Seven RealmsÓ begins!
