Tomorrow's Battlefield Nick Turse,2015-04-27 You won't see segments about it on the nightly news or read about it on the front page of America's newspapers, but the Pentagon is fighting a new shadow war in Africa, helping to destabilize whole countries and preparing the ground for future blowback. Behind closed doors, U.S. officers now claim that "Africa is the battlefield of tomorrow, today. In Tomorrow's Battlefield, award-winning

The Seychelles Affair Mike Hoare, 2008-07-01 The Seychelles Affair is one of the most infamous episodes in the tangled history of mercenary warfare in Africa. The story of the ill-fated coup begins in 1978 when representatives of the exiled Seychelles president approached legendary mercenary commander Mike Hoare - who had successfully led the uprisings in the Congo in the early 1960s - to overthrow the Marxist regime then in power. Hoare's story of the attempted coup reads like a thriller, detailing all the drama of the backroom scheming, the tense action at the airport on Mahé, the forced landing of the Air India Boeing and the ensuing escape of Hoare's band of mercenaries. Equally fascinating is the author's description of his dealings with South African intelligence agencies, the subsequent prosecution by those who had helped them prepare for the coup, his attempts to organize a proper defense and obtain a fair trial for himself and his 30 men, and what it was like to spend 33 months in a South African prison. In the exclusive new foreword to this Paladin reprint, Colonel Hoare sheds new light on the events leading up to the failed coup,

discusses the lingering ramifications of the failure on the nation of Seychelles and relates how his conviction affected his life after he got out of prison. Don't miss this opportunity to read Hoare's wonderfully wry and insightful account of how one little mistake can unravel even the best-laid plans.

The World Factbook 2003 United States. Central Intelligence Agency, 2003 By intelligence officials for intelligent people

Outsourced Empire Andrew Thomson, 2018 Rethinks the history of US imperialism, from the Cold War to today, to reveal how paramilitaries, militias, mercenaries, private armies, and contractors have always been central to US-sponsored insurgencies and US counterinsurgent statecraft. Examining a broad range of events from the Bay of Pigs to the occupation of Iraq, and from the Soviet-Afghan war to the ongoing conflict in Syria, Thomson offers an analysis of the evolution of US support for various para-institutional actors or non-state armed forces. He demonstrates how and why militias, mercenaries, and private military companies have increasingly formed a central part of US imperial strategies designed to influence political and economic conditions abroad. Drawing on declassified documents including military training manuals, CIA communiques, and national security documents, Thomson reveals new evidence that helps us understand these institutions and their collective role in maintaining global order. --From publisher description.

Human Development Report 2020 United Nations, 2021-01-31 Thirty years ago, UNDP created a new way to conceive and measure progress. Instead of using growth in GDP as the sole measure of development, we ranked the world's countries by their human development: by whether people in each country have the freedom and opportunity to live

the lives they value. The 2020 Human Development Report (HDR) doubles down on the belief that people's agency and empowerment can bring about the action we need if we are to live in balance with the planet in a fairer world. It shows that we are at an unprecedented moment in history, in which human activity has become a dominant force shaping the planet's key processes - the Anthropocene. These impacts interact with existing inequalities, creating unparalleled threats of human development reversal and exposing weaknesses in social, economic, and political systems. Though humanity has achieved incredible progress, we have taken the Earth for granted, destabilizing the very systems upon which we rely for survival. COVID-19, which almost certainly sprang to humans from animals, offers a glimpse of our future, in which the strain on our planet mirrors the strain facing societies. How should we react to this new age? Do we choose to strike out on bold new paths striving to continue human development while easing planetary pressures? Or do we choose to try--and ultimately fail--to go back to business as usual and be swept into a dangerous unknown? This Human Development Report is firmly behind the first choice, and its arguments go beyond summarizing well-known lists of what can be done to achieve it.
