Boring Meetings Suck Jon Petz,2011-03-16 The guide that proves your meetings don't have to suck! There's a big dull elephant in the boardroom: this meeting! Most of the millions of meetings held in the world today are a monumental waste of time and talent. Worse still, most of the so-called solutions and books for boring meetings are twice as boring. Boring Meetings Suck provides tips and tactics to deliver Get-In, Get-It-Done, or Get-Out style meetings, while also tackling what most prefer to avoid; that you don't have to BE in charge of a meeting to TAKE charge of a meeting. This entertaining and take-no-prisoners guide is full of easily deployed SRDs?Suckification Reduction Devices?that will help you make your next meeting both efficient and effective. Empowers attendees to politely speak up and get a meeting back on track, or graciously get out, without being fired Shows how hosts can capitalize on technology, learning to crowd-source problems and increase participation Defines surefire methods to get meetings to start and end on time and not have the speaker read the slides STOPS over-invitation syndrome The author has appeared before many major corporate clients, and was named a Top Business Professional Under 40 by American City Business Journals Your meetings do not have to bore, nor must they suck. Instead, get the winning techniques in Boring Meetings Suck, and make your meetings awesome in their engagement and productivity, or stop having them!

The Sherpa Guide Brenda Corbett,Judith Colemon,2006 In this book, the authors take on the role of the Sherpa: enabling, advising and assisting. The executive, like climbers on Everest, must endure the hardships, put forth the effort, be subject to the risks involved in reaching their goals. Ultimately, they must reach the summit through their own skill and will. On Everest, there is no quick and easy way to reach the summit. You'd think a straightforward approach would be a helicopter to the top. Great idea, but the air at high altitude is too thin for a helicopter to sustain flight. During the arduous climb, a Sherpa does not make decisions. The Sherpa makes recommendations, and the Sherpa gives tips, tricks, and techniques to make the climb easier but does NOT climb for the client. The client has to make the decisions once the Sherpa has offered all the alternatives. In coaching, you need a process, and you must respect the process. No shortcuts, and no detours. Limit the playing field to professional issues, and then to allow the client to do the climbing on their way to the summit. Every situation is unique, but without a map for the process, a defined system, there's no way you'll be able to locate and reach your client's goals.

The Golden Sherpa Matthew Krajewski,2014-02 In *The Golden Sherpa: Ascending into Magical Spirituality*, Matthew Krajewski invites spiritual seekers to follow him through a rainbow of heart-based spiritual practices. While one may explore diverse mystical practices, we can all sometimes doubt our authenticity, and need some user feedback to assure us we are cultivating our own special, divine light. Building on ideas from his first book, *Modern Magic: Reclaiming Your Magical Heritage*, his follow-up book, *The Golden Sherpa*, details how it truly feels to experience spiritual energy. By teaching ourselves new ways to think by way of the heart, *The Golden Sherpa* articulates biological, spiritual energy as our true nature, details the light and shadow of energy, as well as ways to passively and actively experience energy. Matthew Krajewski left a successful career in Silicon Valley to embrace being a spiritual writer and teacher, and he uses this journey to explore the struggles and joy we all experience when following our hearts. By following *The Golden Sherpa* everyone can better understand energetic reality, explore their own magic, and ascend to new heights of integrated living.

The Sherpas and Their Original Identity Serku Sherpa,Yana Wengel,2023-04-11 This book offers a cultural and historical perspective on the Sherpa people, exploring how their traditional way of life has been impacted by such factors as urbanisation, modernisation, globalisation, and tourism. Though Nepal is a small country, it is rich in ethnic, religious, linguistic, and cultural resources. Various communities living in Nepal, including the Sherpas, have their own original cultures, traditions, and practices. Despite outside influence, the Sherpa people have preserved their distinct lifestyle, which encompasses a unique history, culture, religion, language, cuisine, and set of traditions. It was only after the summit of Everest in 1953 that domestic and foreign scholars began to take an interest in documenting the Sherpa people's way of life. The Sherpa's language is an oral one, and with this comes difficulties. Various translations into other languages have caused mistranslations and a loss of meaning. Written by a Sherpa, this book seeks to overcome these linguistic barriers and bring Sherpa culture to the reader. Serving as a collection of knowledge from distinguished scholars of the Sherpa community, religious leaders, intellectuals, social workers, and community organisations, this book is a unique (auto)ethnographic work which bridges the gap between researchers speaking other languages and Sherpa people.

Sherpa Steve Casagrande,2014-06-05 *Sherpa* is not a book about mountaineering. It is a think book written as an imaginary journey through places of ice, rock, and snow, similar to a trek through the Himalayas. The story begins at advanced base camp and spans three peaks of understanding on subjects such as problem solving, the power of giving, and eliminating certain forms of ego that no longer work in our favor, before returning to advanced base camp. Personal stories, observations, and experiences that the author has had, sprinkled with humor and wisdom, makes for an entertaining and interesting journey.

Plunkett's Outsourcing & Offshoring Industry Almanac: Outsourcing and Offshoring Industry Market Research, Statistics, Trends & Leading Companies Jack W. Plunkett,2007-07 Contains trends, statistical tables, and an industry glossary. This almanac presents over 300 profiles of outsourcing and offshoring industry firms. It also includes addresses, phone numbers, and executives.

Data Interpretation and Logical Reasoning for the CAT Time,2010-09

Reading Ethnography David Jacobson,1991-07-03 This book presents a model for analyzing and evaluating ethnographic arguments. It examines the relationship between the claims anthropologists make about human behavior and the data they use to warrant them. Jacobson analyzes the textual organization of ethnographies, focusing on the ways in which problems, interpretations, and data are put together. He examines in detail a limited number of well-known ethnographic cases, which are selected to illustrate basic theoretical frameworks and modes of analysis. By advancing a method for assessing ethnographic accounts, the book contributes to the current debate on the role of rhetoric and reflexivity in anthropology.

Investigative Study of Standards for Digital Repositories and Related Services Muriel Foulonneau,Francis André,2008-01-01 This study is meant for institutional repository managers, service providers, repository software developers and generally, all players taking an active part in the creation of the digital repository infrastructure for e-research and e-learning. It reviews the current standards, protocols and applications in the domain of digital repositories. Special attention is being paid to the interoperability of repositories to enhance the exchange of data in repositories. It aims to stimulate discussion about these topics and supports initiatives for the integration of and, where needed, development of new standards. The authors also take a look at the nearby future: which steps have to be taken now in order to comply with future demands?

Sherpas Through Their Rituals Sherry B. Ortner,1978-04-14 Professor Ortner examines the Sherpas of the Himalayas.

Advances in Cardiovascular Technology Jamshid H. Karimov,Kiyotaka Fukamachi,Marc Gillinov,2022 Advances in Cardiovascular Technology: New Devices and Concepts is a comprehensive reference for cardiovascular devices of all types. For engineers, this book provides a basic understanding of underlying pathologies and their prevalence/incidence. It also covers what devices are available, how they are clinically used, and their impact on pathophysiology. In addition, the book presents the constraints imposed on device design and manufacture by the environment in which it is used (e.g., exposure to tissues within the body, blood in particular) and the primary requirements for each specific type of device, including its durability and resistance to fatigue. For clinicians,

this book contains information on primary engineering challenges, the types of devices available, their advantages and disadvantages, and the (current and emerging) tools and materials available to device designers. Covers innovative procedures and devices in cardiovascular technology Gives an overview of the state-of-the-art technology and a view to the future Features contributions from engineers, clinicians and researchers, taking an interdisciplinary view of the field

Cracked it! Bernard Garrette, Corey Phelps, Olivier Sibony, 2018-06-08 Solving complex problems and selling their solutions is critical for personal and organizational success. For most of us, however, it doesn't come naturally and we haven't been taught how to do it well. Research shows a host of pitfalls trips us up when we try: We're quick to believe we understand a situation and jump to a flawed solution. We seek to confirm our hypotheses and ignore conflicting evidence. We view challenges incompletely through the frameworks we know instead of with a fresh pair of eyes. And when we communicate our recommendations, we forget our reasoning isn't obvious to our audience. How can we do it better? In *Cracked It!*, seasoned strategy professors and consultants Bernard Garrette, Corey Phelps and Olivier Sibony present a rigorous and practical four-step approach to overcome these pitfalls. Building on tried-and-tested (but rarely revealed) methods of top strategy consultants, research in cognitive psychology, and the latest advances in design thinking, they provide a step-by-step process and toolkit that will help readers tackle any challenging business problem. Using compelling stories and detailed case examples, the authors guide readers through each step in the process: from how to state, structure and then solve problems to how to sell the solutions. Written in an engaging style by a trio of experts with decades of experience researching, teaching and consulting on complex business problems, this book will be an indispensable manual for anyone interested in creating value by helping their organizations crack the problems that matter most.

Let's Get Real or Let's Not Play Mahan Khalsa, Randy Illig, 2008-10-30 The new way to transform a sales culture with clarity, authenticity, and emotional intelligence. Too often, the sales process is all about fear. Customers are afraid that they will be talked into making a mistake; salespeople dread being unable to close the deal and make their quotas. No one is happy. Mahan Khalsa and Randy Illig offer a better way. Salespeople, they argue, do best when they focus 100 percent on helping clients succeed. When customers are successful, both buyer and seller win. When they aren't, both lose. It's no longer sufficient to get clients to buy; a salesperson must also help the client reduce costs, increase revenues, and improve productivity, quality, and customer satisfaction. This book shares the unique FranklinCovey Sales Performance Group methodology that will help readers:

- Start new business from scratch in a way both salespeople and clients can feel good about
- Ask hard questions in a soft way
- Close the deal by opening minds

Tigers of the Snow and Other Virtual Sherpas Vincanne Adams, 2014-05-06 Sherpas are portrayed by Westerners as heroic mountain guides, or tigers of the snow, as Buddhist adepts, and as a people in touch with intimate ways of life that seem no longer available in the Western world. In this book, Vincanne Adams explores how attempts to characterize an authentic Sherpa are complicated by Western fascination with Sherpas and by the Sherpas' desires

to live up to Western portrayals of them. Noting that diplomatic aides at world summit meetings go by the name Sherpa, as do a van in the U.K. built for rough terrain and a software product from Silicon Valley, Adams examines the authenticating effects of this mobile signifier on a community of Himalayan Sherpas who live at the base of Mount Everest, Nepal, and its deauthenticating effects on anthropological representation. This book speaks not only to anthropologists concerned with ethnographic portrayals of Otherness but also to those working in cultural studies who are concerned with ethnographically grounded analyses of representations. Throughout Adams illustrates how one might undertake an ethnography of transnationally produced subjects by using the notion of virtual identities. In a manner informed by both Buddhism and shamanism, virtual Sherpas are always both real and distilled reflections of the desires that produce them.

On the Move to Meaningful Internet Systems: OTM 2010 Robert Meersman, Tharam Dillon, Pilar Herrero, 2010-10-06
Annotation The two-volume set of LNCS 6426/6427 constitutes the refereed proceedings of 3 confederated international conferences on CoopIS (Cooperative Information Systems), DOA (Distributed Objects and Applications) and ODBASE (Ontologies, DataBases and Applications of SEmanantics). These conferences were held in October 2009 in Greece, in Hersonissos on the island of Crete. CoopIS is covering the applications of technologies in an enterprise context as workflow systems and knowledge management. DOA is covering the relevant infrastructure-enabling technologies and finally, OSBASE is covering WEB semantics, XML databases and ontologies. The 83 revised full papers presented together with 3 keynote talks were carefully reviewed and selected from a total of 223 submissions. Corresponding to the OTM main conferences the papers are organized in topical sections on process models and management, modeling of cooperation, services computing, information processing and management, human-based cooperative systems, ontology and workflow challenges, access control, authentication and policies, secure architectures, cryptography, data storage and processing, transaction and event management, virtualization performance, risk and scalability, cloud and distributed system security, reactivity and semantic data, ontology mapping and semantic similarity, domain specific ontologies.

Nature-based Solutions for Resilient Ecosystems and Societies Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07 Over the past few decades, the frequency and severity of natural and human-induced disasters have increased across Asia. These disasters lead to substantial loss of life, livelihoods and community assets, which not only threatens the pace of socio-economic development, but also undo hard-earned gains. Extreme events and disasters such as floods, droughts, heat, fire, cyclones and tidal surges are known to be exacerbated by environmental changes including climate change, land-use changes and natural resource degradation. Increasing climate variability and multi-dimensional vulnerabilities have severely affected the social, ecological and economic capacities of the people in the region who are, economically speaking, those with the least capacity to adapt. Climatic and other environmental hazards and anthropogenic risks, coupled with weak and wavering capacities, severely impact the ecosystems and Nature's Contributions to People (NCP) and, thereby, to human well-being. Long-term resilience building through disaster risk reduction and integrated adaptive climate planning,

therefore, has become a key priority for scientists and policymakers alike. Nature-based Solutions (NbS) is a cost-effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change adaptation, while also providing a range of co-benefits like sustainable livelihoods and food, water and energy security. This book discusses the concept of Nature-based Solutions (NbS) – both as a science and as art – and elaborates on how it can be applied to develop healthy and resilient ecosystems locally, nationally, regionally and globally. The book covers illustrative methods and tools adopted for applying NbS in different countries. The authors discuss NbS applications and challenges, research trends and future insights that have wider regional and global relevance. The aspects covered include: landscape restoration, ecosystem-based adaptation, ecosystem-based disaster risk reduction, ecological restoration, ecosystem-based protected areas management, green infrastructure development, nature-friendly infrastructure development in various ecosystem types, agro-climatic zones and watersheds. The book offers insights into understanding the sustainable development goals (SDGs) at the grass roots level and can help indigenous and local communities harness ecosystem services to help achieve them. It offers a unique, essential resource for researchers, students, corporations, administrators and policymakers working in the fields of the environment, geography, development, policy planning, the natural sciences, life sciences, agriculture, health, climate change and disaster studies.

AI and Society Christo El Morr, 2023-01-08 AI's impact on human societies is and will be drastic in so many ways. AI is being adopted and implemented around the world, and government and universities are investing in AI studies, research, and development. However, very little research exists about the impact of AI on our lives. This book will address this gap; it will gather reflections from around the world to assess the impact of AI on different aspects of society as well as propose ways in which we can address this impact and the research agendas needed.
