**The Mycenaean Settlement on Tsoungiza Hill** Mary K. Dabney, James C. Wright, 2020-12-04 A hill dominating the Nemea Valley, Tsoungiza is located only 10 kilometers northwest of the citadel of Mycenae. Excavations there have uncovered the remains of a Late Helladic settlement that stood at its southern end. This volume presents the results of these investigations with an unprecedented study of a small settlement's economy and society in the Mycenaean period. Through an interdisciplinary approach that incorporates a wide variety of general and specialist studies, the authors demonstrate how agricultural production, craft activities, and ceremonial practices integrated the inhabitants of Tsoungiza into a regional exchange system within the Bronze Age world. The volume includes contributions by P. Acheson, S. E. Allen, K. M. Forste, P. Halstead, S. M. A. Hoffmann, A. Karabatsoli, K. Kaza-Papageorgiou, B. Lis, R. Mersereau, H. Mommsen, J. B. Rutter, T. Theodoropoulou, and J. E. Tomlinson.

**Art Law** Leonard D. DuBoff, Michael D. Murray, 2023-01-31 The purchase of this

ebook edition does not entitle you to receive access to the Connected eBook on CasebookConnect. You will need to purchase a new print book to get access to the full experience including: lifetime access to the online ebook with highlight, annotation, and search capabilities, plus an outline tool and other helpful resources. *Art Law: Cases and Materials, Third Edition* is written by Leonard DuBoff, a founder of the discipline of art law, and by Michael Murray, a prolific scholar of art law and intellectual property law. The current edition focuses on law and the visual arts world that now embraces the disruptive forces of blockchains and non-fungible tokens (NFTs). Designed as a primary text for courses on art law, law and the visual arts, cultural property law, or cultural heritage law, the three-part framework of this highly readable casebook explores artists' rights under copyright, trademark, right of publicity, moral rights, and the First Amendment; art markets including the law of galleries, dealers, auctions, and museums; and the legal issues surrounding international preservation of art and cultural property, including smuggling and theft in peacetime, looting and plundering in wartime, and protection of native and indigenous peoples' art. New to the Third Edition: As stated by the author of the introduction, Jane Ginsburg of Columbia Law School says, "The tremendous sweep of this casebook takes in the manifold fields that the apparently simple name 'Art Law' implicates. From 'What is Art?' through the different kinds of intellectual property encompassed within artists' rights, through censorship and freedom of

expression to the many permutations of the art market, and on to international and domestic protections of cultural property, the casebook enmeshes the student in an extraordinary variety of fascinating, and often intractable, legal issues. The current edition not only generally updates its predecessor but adds such cutting-edge digital matters as NFTs (which unsettle some notions of “what is art,” and pervade the gamut of IP issues), the role of artificial intelligence in the creation of works of art, and the impact of deepfakes on the right of publicity.” The Third Edition explores how NFTs and the market for digital art has changed how artists, collectors, and the general public view and interact with the art world. NFTs have disrupted the calculation of what is art and who is an artist and challenge the centuries old systems of valuation of art even though they apply the same basic factors of scarcity, provenance (authenticity), attribution to a particular artist, popularity, historical significance, and potential for growth in value. NFTs and metaverse have thrust an entirely new class of creators and content owners into a crypto community that disfavors law and champions copying. NFTs have made digital art a popular and expensive art investment, but this pushes to the forefront the uncomfortable uncertainties of how the law treats digital works under the copyright first sale doctrine. NFTs now enable American artists to list and sell art works linked to smart contracts that set a rate for the payment of resale royalties and can issue a royalty payment whenever these art works are resold on an exchange that

supports the payment of royalties for transactions on the blockchain where the art is registered. The text also explores how deep fakes and AI rendering technologies have created new issues regarding unauthorized uses in false endorsement situations and lookalike avatars and profile pictures (PFPs). Professors and students will benefit from: A very current text covering the real world and metaverse art world of the 2020s A rich collection of illustrations from and about the cases and issues PowerPoints that cover each case, topic, and subtopic

Raw Footage William Michael Phillion, 2014-08-31 If dream is memory, then the written dream is memoir. So the author believes, at least, as he invites you to join a guided tour of his own dreams, narrated by his subconscious mind. One by one, these short bursts will tell the story of the author—who he's been, who he is and even how he must die, for that is also part of memory. This is a looking-glass world that features jarring dreamscapes, such as an island where fat banana haikus grow on trees; a tea garden in Japan where he is overmatched in a bone-crushing judo contest; an autumnal glade where a spinning necktie quilt wants to shred him; a perfect tree that sheds dew into his eyes in an act of reverse crying; and a wet promontory he must cling to for dear life. Witness for yourself how he becomes a rope, and see the lake where his ashes are scattered by grandsons in a very, very orange situation. Record your dreams, he seems to say, and record yourself in the process.

## **Mengenal dan Menguasai Mobile Photography dengan Smartphone**

id.andrography,2014-05-26 Di era perkembangan teknologi yang begitu pesat saat ini, smartphone atau ponsel telah bertransformasi sedemikian luas tidak hanya sebagai alat untuk komunikasi, tapi juga sebagai bagian dari gaya hidup di mana ponsel banyak digunakan untuk mengabadikan momen di sekitar kita. Sebagai contoh saat ini kita banyak menemui foto-foto makanan yang diambil dengan kamera smartphone dan diunggah ke berbagai social media seperti Instagram, Twitter, Path, dan lain sebagainya. Tapi apakah Anda tahu bahwa dengan tips dan trik tertentu apalagi dengan didukung semakin berkembangnya teknologi kamera pada ponsel itu sendiri, kita bisa menghasilkan foto yang hasilnya tidak kalah dengan foto yang diambil dengan kamera digital. Tidak hanya hal-hal yang biasa kita temui dalam teori fotografi saja seperti aspek angle, komposisi dan pencahayaan (lighting) yang bisa kita aplikasikan untuk memotret dengan kamera ponsel, namun berbagai jenis editing yang biasa dilakukan dengan software pengolah foto profesional seperti High Dynamic Range (HDR), Black and White (BW), sampai noir effect juga bisa dilakukan di ponsel. Selain itu, ukuran ponsel yang relatif kecil dan tidak terlalu mencolok, sangat memudahkan untuk dibawa dan digunakan. Android sebagai mobile operating system yang dikembangkan oleh Google, saat ini berkembang menjadi salah satu platform yang paling berkembang baik dari sisi jumlah pengguna maupun variasi perangkat yang tersedia. Android saat ini diadopsi tidak hanya untuk smartphone tapi juga tablet. Mulai dari yang kelas low end

sampai dengan kelas premium dengan spesifikasi yang mengagumkan. Jumlah aplikasi yang tersedia di Google Playstore (toko aplikasi Android) semakin bertambah. Sejak tulisan ini dibuat saja terhitung ada sekitar 800,000 aplikasi yang tersedia di Playstore.

Communities in Transition Søren Dietz,Fanis Mavridis,Žarko Tankosić,Turan Takaoglu,2017-11-30 Communities in Transition brings together scholars from different countries and backgrounds united by a common interest in the transition between the Neolithic and the Early Bronze Age in the lands around the Aegean. Neolithic community was transformed, in some places incrementally and in others rapidly, during the 5th and 4th millennia BC into one that we would commonly associate with the Bronze Age. Many different names have been assigned to this period: Final Neolithic, Chalcolithic, Eneolithic, Late Neolithic [I]-II, Copper Age which, to some extent, reflects the diversity of archaeological evidence from varied geographical regions. During this long heterogeneous period developments occurred that led to significant changes in material culture, the use of space, the adoption of metallurgical practices, establishment of far-reaching interaction and exchange networks, and increased social complexity. The 5th to 4th millennium BC transition is one of inclusions, entanglements, connectivity, and exchange of ideas, raw materials, finished products and, quite possibly, worldviews and belief

systems. Most of the papers presented here are multifaceted and complex in that they do not deal with only one topic or narrowly focus on a single line of reasoning or dataset. Arranged geographically they explore a series of key themes: Chronology, cultural affinities, and synchronization in material culture; changing social structure and economy; inter- and intra-site space use and settlement patterns, caves and include both site reports and regional studies. This volume presents a tour de force examination of many multifaceted aspects of the social, cultural, technological, economic and ideological transformations that mark the transition from Neolithic to Early Bronze Age societies in the lands around the Aegean during the 5th and 4th millennium BC.

The EU Migrant Generation in Asia Helena Hof, 2022-12-01 Drawing on an extensive study with young individuals who migrated to Singapore and Tokyo in the 2010s, this book sheds light on the friendships, emotions, hopes and fears involved in establishing life as Europeans in Asia. It demonstrates how migration to Asian business centres has become a way of distinction and an alternative route of middle-class reproduction for young Europeans during that period. The perceived insecurities of life in the crisis-ridden EU result in these migrants' onward migration or prolonged stays in Asia. Capturing the changing roles of Singapore and Japan as migration destinations, this pioneering work makes the case for EU citizens' aspired lifestyles and professional employment that is no longer only attainable in Europe or the West.
