Philip S. Harrington

Great Sky River Gregory Benford, 2009-10-31 The third novel in the award-winning author's classic Galactic Center series is available once again. A challenging, pacesetting work of hard science fiction that should not be missed (Los Angeles Times). Nearly 100,000 years after first contact with the machines that dominate the universe, a few hundred humans survive. Trapped on Snowglade, a barren world near the center of the galaxy, people like Killeen of Family Bishop and his child Toby are primitive scavengers, homeless and hunted by the ruling mechs. Then suddenly, a strange cosmic entity-neither organic nor cybernetic nor living matter-reaches out from a black hole to speak with Killeen. But can this fallen descendant of starfarers understand this alien being in time-and seize his only chance to save his family and mankind from final annihilation?

The Evolution of Chinese Filiality Deborah Lynn Porter, 2022-03-11 This unique book brings a fresh interdisciplinary approach to the analysis of ancient Chinese history, creating a historical model for the emergence of cultural mainstays by applying recent dramatic findings in the fields of neuroscience and cultural evolution. The centrality in Chinese culture of a deep reverence for the lives of preceding generations, filial piety, is conventionally attributed to Confucius (551-479 B.C.), who viewed hierarchical family relations as foundational for social order. Here, Porter argues that Confucian conceptions of filiality themselves evolved from a systemized set of behaviors and thoughts, a mental structure, which descended from a specific Neolithic mindset, and that this psychological structure was contoured by particular emotional conditions experienced by China's earliest farmers. Using case study analysis from Neolithic sky observers to the dynastic cultures of the Shang and Western Zhou, the book shows how filial piety evolved as a structure of feeling, a legacy of a cultural

predisposition toward particular moods and emotions that were inherited from the ancestral past. Porter also brings new urgency to the topic of ecological grief, linking the distress central to the evolution of the filial structure to its catalyst in an environmental crisis. With a blended multidisciplinary approach combining social neuroscience, cultural evolution, cognitive archaeology, and historical analysis, this book is ideal for students and researchers in neuropsychology, religion, and Chinese culture and history.

Cataloging Correctly for Kids Michele Zwierski, Marilyn McCroskey, Joanna F. Fountain, 2021-05-24 Cataloging library materials for children in the internet age has never been as challenging or as important. RDA: Resource Description and Access is now the descriptive standard, there are new ways to find materials using classifications, and subject heading access has been greatly enhanced by the keyword capabilities of today's online catalogs. It's the perfect moment to present a completely overhauled edition of this acclaimed bestseller. The new sixth edition guides catalogers, children's librarians, and LIS students in taking an effective approach towards materials intended for children and young adults. Informed by recent studies of how children search, this handbook's top-to-bottom revisions address areas such as how RDA applies to a variety of children's materials, with examples provided; authority control, bibliographic description, subject access, and linked data; electronic resources and other non-book materials; and cataloging for non-English-speaking and preliterate children.

Information Services Today Sandra Hirsh, 2015-03-19 This essential overview of what it means to be a library and information professional today provides a broad overview of the transformation of libraries as information organizations, why these organizations are more important today than ever before, the technological influence on how we provide information resources and services in today's digital and global environment, and the various career opportunities available for information professionals. The book begins with a historical overview of libraries and their transformation as information and technology hubs within their communities. It also covers the various specializations within the field emphasizing the exciting yet complex roles and opportunities for information professionals. With that foundation in place, it presents how libraries serve different kinds of communities, highlighting the unique needs of users across all ages and how libraries fulfill those needs through a variety of services, and addresses key issues facing information organizations as they meet user needs in the Digital Age. The book then concludes with career management strategies to guide library and information science professionals in building not only vibrant careers but vibrant information organizations for the future as well.

Transforming Acquisitions and Collection Services Michelle

Flinchbaugh, Chuck Thomas, Rob Tench, 2019-09-15 This book explores ways in which libraries can reach new levels of service, quality, and efficiency

while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Shadow Hunt L. J. Kendall,2017-05-31 Leeth: Experimental subject. Government assassin. Threat to humanity. 2063, 27 years after magic unexpectedly returned to our world. In the Dumps outside New Francisco, eighteen-year-old Leeth is on the run. She doesn't regret sacrificing her future to save her friend, but the ruthless covert agency she worked for and her controlling uncle want her back. Despite the loneliness and hardships, Leeth is relishing her freedom, and is determined to honor the promises she's made. But things are worse than she knows. Thanks to an insane mage's tampering with meta-magical Archetypes, a uniquely altered killer is hunting her. And in this case, what she doesn't know can doom her – and everyone else.

The Language of Architecture Andrea Simitch, Val Warke, 2014-06-01

Learning a new discipline is similar to learning a new language; in order to master the foundation of architecture, you must first master the basic building blocks of its language – the definitions, function, and usage. *Language of Architecture* provides students and professional architects with the basic elements of architectural design, divided into twenty-six easy-to-comprehend chapters. This visual reference includes an introductory, historical view of the elements, as well as an overview of how these elements can and have been used across multiple design disciplines. Whether you're new to the field or have been an architect for years, you'll want to flip through the pages of this book throughout your career and use it as the go-to reference for inspiration, ideas, and reminders of how a strong knowledge of the basics allows for meaningful, memorable, and beautiful fashions that extend beyond trends. This comprehensive learning tool is the one book you'll want as a staple in your library.

Cosmic Challenge Philip S. Harrington, 2010-10-21 Listing more than 500 sky targets, both near and far, in 187 challenges, this observing guide will test novice astronomers and advanced veterans alike. Its unique mix of Solar System and deep-sky targets will have observers hunting for the Apollo lunar landing sites, searching for satellites orbiting the outermost planets, and

exploring hundreds of star clusters, nebulae, distant galaxies, and quasars. Each target object is accompanied by a rating indicating how difficult the object is to find, an in-depth visual description, an illustration showing how the object realistically looks, and a detailed finder chart to help you find each challenge quickly and effectively. The guide introduces objects often overlooked in other observing guides and features targets visible in a variety of conditions, from the inner city to the dark countryside. Challenges are provided for the naked eye, through binoculars and the largest backyard telescopes.

Star Watch Philip S. Harrington, 2008-04-21 Your Passport to the Universe
The night sky is alive with many wonders--distant planets, vast star clusters, glowing nebulae, and expansive galaxies, all waiting to be explored. Let respected astronomy writer Philip Harrington introduce you to the universe in *Star Watch*, a complete beginner's guide to locating, observing, and understanding these celestial objects. You'll start by identifying the surface features of the Moon, the banded cloud tops of Jupiter, the stunning rings of Saturn, and other members of our solar system. Then you'll venture out beyond our solar system, where you'll learn tips and tricks for finding outstanding deep-sky objects from stars to galaxies, including the entire Messier catalog--a primary goal of every serious beginner. *Star Watch* features a detailed physical description of each target, including size, distance, and structure, as well as concise directions for

locating the objects, handy finder charts, hints on the best times to view each object, and descriptions of what you'll really see through a small telescope or binoculars and with the naked eye. Star Watch will transport you to the farthest depths of space--and return you as a well-traveled, experienced stargazer.

Taking the Red Pill Glenn Yeffeth, 2003-03-11 Dive into the world of The Matrix ahead of the 2021 release of Lana Wachowski's The Matrix Resurrections! Taking the Red Pill is a thought-provoking, mind-expanding thrill ride through The Matrix, examining the technological challenges, religious symbolism, and philosophical dilemmas the film presents. Renowned scientists, technologists, philosophers, scholars, social commentators, and science fiction authors provide engaging and provocative perspectives: • Inventor and technologist Ray Kurzweil reveals the technological trends that make The Matrix more prophetic than anyone suspects • Sun chief scientist Bill Joy's classic essay "Why the Future Doesn't Need Us" describes the horrors that await as these technologies are developed • Yale philosopher and occasional standup comic Nick Bostrom calculates the odds that we are in the Matrix • Best-selling science fiction author Robert J. Sawyer explores the history of artificial intelligence in science fiction culminating with The Matrix • Economist and philosopher of science Robin Hanson shows how we are controlled by a power as malevolent as that of the Matrix Taking the Red Pill will change how you view The Matrix—and the world around you.

Transmedia Change Kevin Moloney, 2022-03-10 This book examines and illustrates the use of design principles, design thinking, and other empathy research techniques in university and public settings, to plan and ethically target socially-concerned transmedia stories and evaluate their success through user experience testing methods. All media industries continue to adjust to a dispersed, diverse, and dilettante mediascape where reaching a large global audience may be easy but communicating with a decisive and engaged public is more difficult. This challenge is arguably toughest for communicators who work to engage a public with reality rather than escape. The chapters in this volume outline the pedagogy and practice of design, empathy research methods for story development, transmedia logics for socially-concerned stories, development of community engagement and the embrace of collective narrative, art and science research collaboration, the role of mixed and virtual reality in prosocial communication, ethical audience targeting, and user experience testing for storytelling campaigns. Each broad topic includes case examples and full case studies of each stage in production. Offering a detailed exploration of a fast-emerging area, this book will be of great relevance to researchers and university teachers of socially-concerned transmedia storytelling in fields such as journalism, documentary filmmaking, education, and activism.
