An Investigation Into Skype Technologies S.A. Josephine Stadler, 2009-02 Bachelor Thesis from the year 2006 in the subject Business economics - General, grade: 1,8, New College Durham, 91 entries in the bibliography, language: English, abstract: Skype is quite a new software enabling free calls over the Internet (Shaver, 2006). Users save money, because Skype charges nothing for telephone calls between Skype users. Only calling a landline or a mobile phone and receiving incoming calls from a conventional phone or mobile phone are charged (Skype Fast Facts, 2005). This idea is supposed to revolutionize the whole phone market (Powell, 2005). VoIP is the future telecommunications media in Germany. What is Skype's future in Germany?

Skyping the Family Richard Harper,Rod Watson,Christian Licoppe,2019-08-13 This collection is one of the first in-depth studies of video calling in family and domestic life. It explores the reasons that people themselves provide to explain their video calling, investigates how these reasons make that calling accountable and how, in turn, these reasons come to be things talked about in the calls themselves. The research shows how video calling is part of the currency of contemporary family affection: such calls are not just about keeping in touch, they are a way of loving too; and they are sometimes a way of fighting as well. 'Skyping' or 'Facetiming' might be frequent and can seem mundane – just a question of routine – but what they entail is a measure of important things to families. This makes this collection of interest to anyone concerned with family life and the evolving ways in which technology has a role in it.
