Ultraviolet Grasslands: 2E Luka Rejec, 2023-02 Welcome to Ultraviolet Grasslands: 2E the roleplaying game of heroes on a strange trip through mythic steppes in search of lost time, broken space, and deep riffs. Ultraviolet Grasslands is a tabletop role-playing game book, half setting, half adventure, and half epic trip; inspired by psychedelic heavy metal, the Dying Earth genre, and classic Oregon Trail games. It leads a group of 'heroes' into the depths of a vast and mythic steppe filled with the detritus of time and space and fuzzy riffs.

Brunanburh Located Through Egil's Saga Björn Vernharðsson, Stefán Björnsson, 2020-11 We focus attention to the possible sites for the Battle of Brunanburh by paying extra attention to all known sources known for the battle. We focus on two known poems that describe the events in detail; that is the Brunanburh poem and the poems in Egil's saga as well as other known sources for this battle. The poems in Egil's saga are contemporary with the events, even though the saga was written in the 13th century, the poems are older and are thought to be the work of Egill Skallagrímsson himself. We also use other references that conform to elements in other known sources like the issue of silver in this time. We conclude from all these sources that the Battle might have been fought in Hunwick in County Durham. We revive the poems in Egil's saga, the Brunanburh poem and the relation these poems have with the old Icelandic poem Völuspá and we conclude that the Brunanburh poem is much related to these Old Icelandic poems and Egill Skallagrímsson might have been the poet of the Brunanburh poem.

The Book of Eels Tom Fort, 2003 What has been the dish of kings, the subject of myths and the traveller of epic and mysterious journeys? The eel. Beginning life in the Sargasso Sea, the eel travels across the ocean, lives for twenty or so years, and then is driven by some instinct back across the ocean to spawn and die. And the next generation starts the story again. No one knows why the eels return, or how the orphaned elvers learn their way back. One man discovered, after many adventures, the breeding ground of all eels – and he is the hero of this book. Eels were being caught and consumed 5000 years before the birth of Christ – Aristotle and Pliny wrote about them; Romans regarded them as a peerless delicacy; Egyptians accorded them semi-sacred status; English kings died of overeating them. There are many strange practices among eel fishers all over the world, and many great fortunes based upon the eel harvest. The Book of Eels, a combination of social comment, biography and natural history, is also a fascinating and witty account of Tom Fort's obsession with the eel, his journeying to discover the eel in all its habitats, and the people he meets in his pursuit.

Eels Biology, Monitoring, Management, Culture and Exploitation Paul Coulson,Andy Don,2019-12-31 The freshwater eels, the Anguillids, have increasingly become the focus of attention for fisheries managers, scientists, researchers, policy makers, conservation bodies and other stakeholders. These species can be seen as a bellwether for issues affecting aquatic ecosystems – their steep decline and the management initiatives to try and reverse this trend, touch on subjects as diverse as disconnected waterways, loss of habitat, novel parasites, pollution, over-fishing and climate change. There are some 16 species of the Anguilla genus and all exhibit similar lifestyles, growing in waters often far-removed from their marine spawning grounds. These enigmatic, contradictory and confounding species share similar challenges and pressures wherever they are found. This book was generated from the 1st UK International Eel Science Symposium which was held at the Zoological Society of London (ZSL) in June 2017. Hosted by the Institute of Fisheries Management (IFM), the ZSL, and the Environment Agency (EA), the Symposium was heralded as a success, with over 180 delegates in attendance. Many of the world's top eel specialists attended or gave presentations across a diverse range of subjects. This was one of the Symposium's, and now the book's great strengths – its diversity of subjects and authors. Many countries are represented within the book, from across Europe and as far afield as New Zealand, South Africa, Vanuatu, French Polynesia, Japan, Canada and the USA. The EA and IFM have collaborated to produce this landmark book which includes a mix of cultural, scientific and management information which will be invaluable to anyone with a professional or personal interest in these mysterious fish, including ichthyologists, fisheries scientists and managers, aquaculture personnel, environmental biologists and ecologists, marine and freshwater biologists, vertebrate zoologists, animal behaviourists and students studying in all these areas. Libraries in all universities and research establishments where these subjects are studied and taught should have copies on their shelves.

Holding My Selves Together Margaret Rozga,2021-05-15 In ... her fifth volume of poetry, Margaret Rozga brings together some of her best-loved poems about Milwaukee's fair housing marches and her concern for issues of peace and social justice, with new poems that identify with Alice in Wonderland and imagine new Alice adventures.
