*Smart Solutions to Climate Change* Bjørn Lomborg, 2010-09-09 The failure of the Copenhagen climate conference in December 2009 revealed major flaws in the way the world's policy makers have attempted to prevent dangerous levels of increases in global temperatures. The expert authors in this specially commissioned collection focus on the likely costs and benefits of a very wide range of policy options, including geo-engineering, mitigation of CO<sub>2</sub>, methane and 'black carbon', expanding forest, research and development of low-carbon energy and encouraging green technology transfer. For each policy, authors outline all of the costs, benefits and likely outcomes, in fully referenced, clearly presented chapters accompanied by shorter, critical alternative perspectives. To further stimulate debate, a panel of economists, including three Nobel laureates, evaluate and rank the attractiveness of the policies. This authoritative and thought-provoking book will challenge readers to form their own conclusions about the best ways to respond to global warming.

*Global Problems, Smart Solutions* Bjørn Lomborg, 2013-11-14 Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra \$75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case, 'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four

Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others.

*Smart Solutions in Today's Transport* Jerzy Mikulski, 2017-09-08 This book constitutes the thoroughly refereed proceedings of the 17th International Conference on Transport Systems Telematics, TST 2017, held in Katowice-Ustrón, Poland, in April 2017. The 40 full papers presented in this volume were carefully reviewed and selected from 128 submissions. **A business case for engaging the private sector in climate-smart solutions for smallholder farmers** Mutamba, M., Ajayi, O.C., 2018-09-26 Large and growing numbers of poor rural households depend on climate-sensitive agriculture and operate on the margins of the mainstream economy. This combined with a broken public extension service and faltering international development efforts places millions of smallholder farmers at disproportionately high risk from a changing climate. Acknowledging the magnitude of the challenge and the required pace and scale of response, coupled with honest introspection on past performance, has prompted the need to look beyond the public sector for delivering climate-smart solutions. Harnessing the financial, technological and intellectual capital in the private sector to complement public sector-driven climate responses is a new dimension in delivery of sustainable climate-smart solutions at scale.

**Sharing Smart Solutions in Water** Diego J. Rodriguez, Matthijs Schuring, Nansia Constantinou, Amanda Goksu, The Water Partnership Program (WPP) report, *Sharing Smart Solutions in Water* summarizes the achievements and impact of WPP's Phase I (2009 – 2012). The report showcases the Program's results across six regions, as well as its global impact on knowledge and innovation. It also demonstrates how the WPP has strengthened the quality of World Bank projects and shaped policy dialogue in areas calling for immediate action, such as climate change, energy and food security, and urban water management. The WPP continues to be a critical tool for supporting World Bank efforts to reduce poverty, thanks to the continuous support of the governments of the Netherlands, the United Kingdom, and Denmark. Acknowledging the impact of the WPP, the donors have committed to a larger and bolder Phase II for the next four years.

*Small States, Smart Solutions* Edgardo Favaro, 2008 Small states face special hurdles in achieving development gains. These states spend significantly more of their GDP on producing public goods and services, and they face higher connectivity costs than do their larger brethren. *Small States, Smart Solutions* examines how some small states use international trade and telecommunications technology to outsource services such as justice, banking supervision, public utilities regulation, high-quality medicine, and education. Sourcing these services internationally poses unique challenges but also opens broad opportunities. The eight case studies in this book, based on interviews with government officers and citizens, describe pioneering initiatives undertaken by some small states to better the quality of life of their citizens.

*The New Technology Elite* Vinnie Mirchandani, 2012-03-27 How-to guidance for optimizing incumbent technologies to deliver a better product and gain competitive advantage Their zip codes are far from Silicon Valley. Their SIC codes show retail, automobile or banking. But industry after industry is waking up to the opportunity of smart products and services for their increasingly tech-savvy customers. Traditionally technology buyers, they are learning to embed technology in their products and become technology vendors. In turn, if you analyze Apple, Google, Amazon, Facebook, Twitter and eBay, you marvel at their data centers, retail stores, application ecosystems, global supply chains, design shops. They are considered consumer tech but have better technology at larger scale than most enterprises. The old delineation of technology buyer and vendor is obsolete. There is a new definition for the technology elite - and you find them across industries and geographies. The 17 case studies and 4 guest columns spread through *The New Technology Elite* bring out the elite attributes in detail. Every organization will increasingly be benchmarked against

these elite - and soon will be competing against them. Contrasts the productivity that Apple, Google and others have demonstrated in the last decade to that of the average enterprise technology group. Reveals how to leverage what companies have learned from Google, Apple, Amazon.com, and Facebook to your company's advantage. Designed for business practitioners, CEOs, CFOs, CIOs, technology vendors, venture capitalists, IT consultants, marketing executives, and policy makers. Other titles by Vinnie Mirchandani: *The New Polymath: Profiles in Compound-Technology Innovations*.
