**Smarter Crime Control** Irvin Waller,2013-12-05 The U.S. is the world´s biggest jailor and one of the most affluent murderous countries, and yet its citizens pay more taxes to sustain law and order than their European counterparts. Yet, the U.S. has the most data in the world on the use of incarceration and its failure. Its researchers have identified more projects able to prevent violence than the rest of the world put together. Its legislators have access to pioneering data banks on cost effective ways to use taxes to reduce crime. We are left wondering why we cannot implement measures that we know will work, reduce crime, and cost less for law and order. Smarter Crime Control shows how to use recent knowledge and best practices to reduce the extraordinarily high rates of murder, traffic fatalities, drug overdoses, and incarceration, while avoiding the high taxes paid by families for policing and prisons. Providing detailed examples, Irvin Waller offers specific actions our leaders at all levels can take to reduce violence and lower costs to taxpayers. He focuses on how to retool policing and improve corrections to reduce reoffending and crime, while limiting criminal courts. He also shows how programs and investments in various strategies can help those youth on the path to chronic offending avoid the path all together. Waller shows how to get smart on crime to shift the criminal justice paradigm from the failing, outdated, racially biased, and exorbitant complex today to an effective, modern, fair and lean system for safer communities that spares so many victims from the loss and pain of preventable violence. He makes a compelling case for reinvesting what is currently misspent on reacting to crime into smart ways to prevent crime. Ultimately, he demonstrates to readers the importance of reevaluating our current system and putting into place proven strategies for crime and violence prevention that will keep people out of jail and make our streets and communities safer for everyone.

**Global Problems, Smart Solutions** Bjørn Lomborg,2013-11-14 Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra $75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case, 'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others.

*Smart Products, Smarter Services* Mary J. Cronin,2010-08-19 We are surrounded by products that have minds of their own. Computing power, in the form of microcontrollers, microprocessors, sensors, and data storage chips, has become so cheap that manufacturers are building connectivity and embedded intelligence into all types of consumer goods. These 'smart products' are fundamentally changing both the competitive landscape for business and the daily lives of consumers. This book analyzes the evolution of smart products to help managers understand the impact of embedded product intelligence on corporate strategy, consumer value, and industry competition. It describes four different ecosystem strategies for designing and launching smart products: the control-focused Hegemon, the standards-focused Federator, the high growth and brand-focused Charismatic Leader, and the disruptive industry Transformer. This ecosystem model is then applied to smart products in the automotive, wireless, energy, residential, and health industries. The book concludes with recommendations for successfully managing smart products and services.

The purpose of Smarter Crowdsourcing was to identify concrete solutions that include the use of data analysis and technology to tackle corruption in the public sector. Although written at the behest of and for the Mexican context, the recommendations and plans for their implementation developed in this report could be adapted for use in other countries. This document contains 13 implementation plans laying out practical ways to address corruption. The plans emerged from "Smarter Crowdsourcing Anti-Corruption" (2017). The Smarter Crowdsourcing method is an agile process, which begins with robust problem definition followed by online sourcing of global expertise to surface innovative ideas and then turns them into practical implementation plans.
