The Full Stack Development Book Snehadeep Bhowmick,2019-09-04 The book takes a tour through all the necessary technologies that are required to build an application ground up. Full stack development is quickly shaping up to be an industry standard requirement for developers. This book is aimed at making each of those technologies understandable through less definitions and more intuition-based examples. The chapter on machine learning introduces a new paradigm in computer programming, and the book takes a deep dive into understanding those concepts without requiring any prior knowledge from the reader. The chapter on Ethereum blockchain deals with another branch of technology that is completely new and the book takes a hands-on approach toward each new concept. The explanations in the book encourage a reader to think on own and arrive at conclusions regarding the scope and use case of a technology, during its application.

This book reveals how to save time and money, and build better apps for your clients. Get practical with React enterprise app development and enhance your career. You will: Use TypeScript in React and React Hooks Work with Redux Toolkit, and TypeScript Build an inventory dashboard, charts, and calendar Write forms with Formik Validate inputs with Yup Use Material UI for fast user interface building Secure your React app by building a login form and protecting the routes.

The Iranian Languages Gernot Windfuhr, 2013-05-13 The Iranian languages form the major eastern branch of the Indo-European group of languages, itself part of the larger Indo-Iranian family. Estimated to have between 150 and 200 million native speakers, the Iranian languages constitute one of the world's major language families. This comprehensive volume offers a detailed overview of the principle languages which make up this group: Old Iranian, Middle Iranian, and New Iranian. The Iranian Languages is divided into fifteen chapters. The introductory chapters by the editor present a general overview and a detailed discussion of the linguistic typology of Iranian. The individual chapters which follow are written by leading experts in the field. These provide the reader with concise, non-technical descriptions of a range of Iranian languages. Each chapter follows the same pattern and sequence of topics, taking the reader through the significant features not only of phonology and morphology but also of syntax; from phrase level to complex sentences and pragmatics. Ample examples on all levels are provided with detailed annotation for the non-specialist reader. In addition, each chapter covers lexis, sociolinguistic and typological issues, and concludes with annotated sample texts. This unique resource is the ideal companion for undergraduate and postgraduate students of linguistics and language. It will also be of interest to researchers or anyone with an interest in historical linguistics, linguistics anthropology and language development. Gernot Windfuhr is Professor of Iranian Studies at the University of Michigan; he has published widely on Persian and Iranian languages and linguistics and related languages, as well as on other aspects of Iranian culture including Persian literature and Pre-Islamic Iranian religions.

Luwic dialects and Anatolian: Inheritance and diffusion Ignasi-Xavier Adiego, José Virgilio García Trabazo, Mariona Vernet, Bartomeu Obrador-Cursach, Elena Martínez Rodríguez, 2019-03-18 This book focuses on Luwic languages, bringing together approaches from Indo-European linguistics and language reconstruction and also from other intrinsically related disciplines such as epigraphy, numismatics and archaeology, and shows very clearly how these disciplines can benefit from each other. The volume gathers together the most recent results of investigation in the field, and is the natural extension of recent work completed by a research group on Luwic dialects over a number of years. Among the thirteen contributions, fitting neatly within the Luwian and other Anatolian languages, a rich variety of subjects are covered: epigraphy, grammar, etymology, textual interpretation, and archaeological context.
