**The Peregrine Falcon** Derek Ratcliffe, 2010-10-30 The first edition of The Peregrine Falcon was widely recognised as a classic of its kind, documenting not only the species' biology but also the sad tale of its decline due to the impact of pesticides. This extensively revised and enlarged second edition takes full account of important new developments in the story of this bird during the intervening 12 years. It reports one of the few notable successes in wildlife conservation: the full restoration of British and Irish Peregrine populations, and their appreciable recovery in other countries where numbers had also been greatly reduced by the impact of organochlorine pesticides. The pattern of increase in Britain has been extremely varied, from districts where numbers are now far higher than at any time in recorded history, to others where the bird is now at its lowest ebb. The examination of the reasons for these differences helps us to understand the most recent developments in the Peregrine saga. Particular attention has been paid to the recent major advances in our knowledge of Peregrine biology, such as its movements, population turnover, food and nesting habits. Many of the tables and figures have been revised and brought up to date so that this volume, like its predecessor, is once again by far the most detailed and readable reference on this most evocative of birds. Donald Watson's colour paintings, monochrome washes and line drawings, and the original photographs, illustrate the book as before. Cover illustration by Donald Watson

**The Way of a Man** Emerson Hough, 2020-09-28 I admit I kissed her. Perhaps I should not have done so. Perhaps I would not do so again. Had I known what was to come I could not have done so. Nevertheless I did. After all, it was not strange. All things about us conspired to be accessory and incendiary. The air of the Virginia morning was so soft and warm, the honeysuckles along the wall were so languid sweet, the bees and the hollyhocks up to the walk so fat and lazy, the smell of the orchard was so rich, the south wind from the fields was so wanton! Moreover, I was only twenty-six. As it chanced, I was this sort of a man: thick in the arm and neck, deep through, just short of six feet tall, and wide as a door, my mother said; strong as one man out of a thousand, my father said. And then—the girl was there. So this was how it happened that I threw the reins of Satan, my black horse, over the hooked iron of the gate at Dixiana Farm and strode up to the side of the stone pillar where Grace Sheraton stood, shading her eyes with her hand, watching me approach through the deep trough road that flattened there, near the Sheraton lane. So I laughed and strode up—and kept my promise. I had promised myself that I would kiss her the first time that seemed feasible. I had even promised her—when she came home from Philadelphia so lofty and superior for her stopping a brace

of years with Miss Carey at her Allendale Academy for Young Ladies—that if she mitigated not something of her haughtiness, I would kiss her fair, as if she were but a girl of the country. Of these latter I may guiltily confess, though with no names, I had known many who rebelled little more than formally. She stood in the shade of the stone pillar, where the ivy made a deep green, and held back her light blue skirt daintily, in her high-bred way; for never was a girl Sheraton who was not high-bred or other than fair to look upon in the Sheraton way—slender, rather tall, long cheeked, with very much dark hair and a deep color under the skin, and something of long curves withal. They were ladies, every one, these Sheraton girls; and as Miss Grace presently advised me, no milkmaids wandering and waiting in lanes for lovers. When I sprang down from Satan Miss Grace was but a pace or so away. I put out a hand on either side of her as she stood in the shade, and so prisoned her against the pillar. She flushed at this, and caught at my arm with both hands, which made me smile, for few men in that country could have put away my arms from the stone until I liked. Then I bent and kissed her fair, and took what revenge was due our girls for her Philadelphia manners. When she boxed my ears I kissed her once more. Had she not at that smiled at me a little, I should have been a boor, I admit. As she did—and as I in my innocence supposed all girls did—I presume I may be called but a man as men go. Miss Grace grew very rosy for a Sheraton, but her eyes were bright. So I threw my hat on the grass by the side of the gate and bowed her to be seated. We sat and looked up the lane which wound on to the big Sheraton house, and up the red road which led from their farm over toward our lands, the John Cowles farm, which had been three generations in our family as against four on the part of the Sheratons' holdings; a fact which I think always ranked us in the Sheraton soul a trifle lower than themselves.

**Life Histories of North American Marsh Birds** Arthur Cleveland Bent, 1926 This bulletin deals with the life histories, habits and descriptions of marsh birds such as flamingos, spoonbills, bitterns, ibises, herons, cranes, rails, gallinule, and coots.

**Raptors in Human Landscapes** David M. Bird, Daniel E. Varland, Juan Jose Negro, 1996-02-08 This book is a collection of papers highlighting ways in which Raptors have successfully adapted to man-made landscapes and structures. The coverage of Raptors in Human Landscapes is broad, ranging from the impact of human activity on country-wide scales to the particular conditions associated with urban, cultivated, and industrial landscapes, as well as to the various schemes specifically directed towards the provision of artificial nest sites and platforms. The cases described hail from a wide geographic range including North and South America, Europe, Africa and elsewhere, and from a broad spectrum of species groups such as the falcons, accipiters, eagles, kites, and many others. This is a book of immense value not only to ornithologists and conservation biologists, but also to engineers and managers involved in all kinds of building and environmental work in cities, power and water works, agriculture, and forestry. Serves as a good introduction to all aspects of the subject Focuses on successful adaptations of Raptors to environmental change
