Snapchat Viktoria Schoja, 2016-03-14 Snapchat is a photo messaging application which was developed in 2011 by Evan Spiegel and Bobby Murphy. It is a new way to take pictures or video adding text or drawings over a mobile phone and send them to friends or family with specifications on how long the photo will be available for viewing. User can set a time of 1 to 10 seconds

for the viewing. The timer starts to count down the predefined seconds when the recipient opens the message. After the time is up the picture is deleted from the device and cannot be shown to the user anymore. Once the user downloads the app on his phone it is essential to register with username and set a password. Subsequently the app access the contact list on users phone to load friends. Additionally users can add other contacts beyond the existing one manually. Snapchat is a new way of sharing moments with friends on iPhone and Android. The company compares its product with a phone call, where a record of the communication persists, however the actual content of the communication does not. Even though Snapchat launched many products, there is one key feature that they all share, deletion. The app's mascot, which is also used as logo, is called Ghostface Chillah, a name Brown derived from Ghostface Killah of the hip hop group Wu-Tang Clan. Snapchat, Inc. is a privately held, venture capital backed company, headquartered in Venice, California, USA. The application was first launched in July 2011 as a result of Evan Spiegel's projects at Stanford University under the name Picaboo. However, the idea of disappearing pictures did not convince other project participants. In July 2011 Picaboo was renamed and re-launched into Snapchat. The former team, Evan Spiegel, Reggie Brown and Bobby Murphy, focused on usability and technical aspects rather than branding efforts at the beginning in order to reach as many user as possible [...].

Snapchat for Beginners Dale Michelson, 2017-05-08 Snapchat is a creative and

innovative picture messaging and multimedia application that was developed by Bobby Murphy, Evan Spiegel and Reggie Brown. They were all former students of Stanford University and they created the company Snap Inc. which was originally known as Snapchat Inc. The main idea of Snapchat was to allow pictures and messages to be available for a brief time before they are no longer accessible. The original design of the system was started by Reggie Brown to be submitted for one of Evan Spiegel's classes where he studied with his major in product design. The project originally started off being called Picaboo which would allow the user to create a selfie app that allowed users to share images that were explicit, wouldn't last long and then would be self-deleting.

How to Turn Down a Billion Dollars Billy Gallagher, 2018-02-13 In the grand tradition of Ben Mezrich's *The Accidental Billionaires* (2009)... an engaging look into a fascinating subculture of millions. –Booklist Breezy... **How to Turn Down a Billion Dollars** ably if uncritically chronicles the short history of a young company catering to young users, with a young chief executive, and reveals, intentionally or not, the limitations that come with that combination. –Wall Street Journal The improbable and exhilarating story of the rise of Snapchat from a frat boy fantasy to a multi-billion dollar internet unicorn that has dramatically changed the way we communicate. In 2013 Evan Spiegel, the brash CEO of the social network Snapchat, and his co-founder Bobby Murphy stunned the press when they walked away from a three-

billion-dollar offer from Facebook: how could an app teenagers use to text dirty photos dream of a higher valuation? Was this hubris, or genius? In *How to Turn Down a Billion Dollars*, tech journalist Billy Gallagher takes us inside the rise of one of Silicon Valley's hottest start-ups. Snapchat developed from a simple wish for disappearing pictures as Stanford junior Reggie Brown nursed regrets about photos he had sent. After an epic feud between best friends, Brown lost his stake in the company, while Spiegel has gone on to make a name for himself as a visionary—if ruthless—CEO worth billions, linked to celebrities like Taylor Swift and his wife, Miranda Kerr. A fellow Stanford undergrad and fraternity brother of the company's founding trio, Gallagher has covered Snapchat from the start. He brings unique access to a company Bloomberg Business called “a cipher in the Silicon Valley technology community.” Gallagher offers insight into challenges Snapchat faces as it transitions from a playful app to one of the tech industry's preeminent public companies. In the tradition of great business narratives, *How to Turn Down a Billion Dollars* offers the definitive account of a company whose goal is no less than to remake the future of entertainment.

Privacy's Blueprint Woodrow Hartzog, 2018-04-09 Every day, Internet users interact with technologies designed to undermine their privacy. Social media apps, surveillance technologies, and the Internet of Things are all built in ways that make it hard to guard personal information. And the law says this is okay because it is up to users to protect themselves—even when the odds

are deliberately stacked against them. In Privacy's Blueprint, Woodrow Hartzog pushes back against this state of affairs, arguing that the law should require software and hardware makers to respect privacy in the design of their products. Current legal doctrine treats technology as though it were value-neutral: only the user decides whether it functions for good or ill. But this is not so. As Hartzog explains, popular digital tools are designed to expose people and manipulate users into disclosing personal information. Against the often self-serving optimism of Silicon Valley and the inertia of tech evangelism, Hartzog contends that privacy gains will come from better rules for products, not users. The current model of regulating use fosters exploitation. Privacy's Blueprint aims to correct this by developing the theoretical underpinnings of a new kind of privacy law responsive to the way people actually perceive and use digital technologies. The law can demand encryption. It can prohibit malicious interfaces that deceive users and leave them vulnerable. It can require safeguards against abuses of biometric surveillance. It can, in short, make the technology itself worthy of our trust.

Product Liability Desk Reference Morton F. Daller, Nicholas Daller, 2022-10-07 *Product Liability Desk Reference: A Fifty-State Compendium, 2023 Edition*, is a comprehensive resource that provides the most recent statutory and case law developments on product liability laws for each of the fifty states and the District of Columbia. Each state summary is

practitioner-oriented and written by leading state experts who provide analysis of the statutory and case law developments particular to each jurisdiction. Each chapter includes detailed coverage of a state's standards regarding causes of action, statutes of limitation and repose, strict liability, negligence, breach of warranty, punitive damages, wrongful death, pre- and post-judgment interest, employer immunity from suit, joint and several liability, and statutes relevant to product liability actions. The book is designed to serve as a handy reference for corporate in-house counsel or the litigation management professional who is overseeing product liability cases in more than one state; the attorney handling product liability cases in more than one state; and the in-house professional at the liability, casualty, or property insurance company concerned with claims and litigation management. The 2023 Edition incorporates recent changes in the common law of the various states, including the following: Illinois has passed the Prejudgment Interest Act which now allows prejudgment interest in tort cases. This interest is calculated at the rate of 6% per annum on the amount of the judgment, minus punitive damages, sanctions, statutory attorney's fees, and statutory costs and subject to reduction based on rejected settlement offers. The Arizona Supreme Court ruled that the National Highway Traffic Safety Administration's (NHTSA) refusal to set formal standards for certain driver assist technologies did not preempt Arizona common law tort claims against the manufacturer for not implementing those features into its vehicles.

Allowing a case against TikTok sounding in design defect to proceed, the Georgia Supreme Court held that intentional or tortious misuse of a product does not relieve the manufacturer of its design duty to the injured party.

Copyright Class Struggle Hannibal Travis, 2018-08-31 Earning an income in our time often involves ownership of or control over creative assets. Employing the law and philosophy of economics, this illuminating book explores the legal controversies that emerge when authors, singers, filmmakers, and social media barons leverage their rights into major paydays. It explores how players in the entertainment and technology sectors articulate claims to an ever-increasing amount of copyright-protected media. It then analyzes efforts to reform copyright law, in the contexts of 1) increasing the rights of creators and sellers, and 2) allocating these rights after employment and labor disputes, constitutional challenges to intellectual property law, efforts to legalize online mashups and remixes, and changes to the amount of streaming royalties paid to actors and musicians. This work should be read by anyone interested in how copyright law - and its potential reform - shapes the ownership of ideas in the social

media age.
