The Practitioner's Handbook of Project

Performance Mark Phillips, 2019-11-11 Practitioners operate in a necessary reality. We work in a space where project performance is above theory or methodology. In the best environments, delivery and an affirmative culture are what matter most. In the worst, it is politics and survival. In any environment we are challenged to adopt best practices and adapt our style to the environment in which the project is occurring. This is a book about those best practices and practitioner experiences. It is a must have reference and guide book for project managers, general managers, business leaders and project management researchers. This book is the result of the hard work and dedication of more than 35 authors from more than 15 countries across four continents. It brings a diversity of experience, professional and personal. It includes practitioners, leading academics, renowned theorists and many who straddle those roles. The chapters cover experiences in software, large scale infrastructure projects, finance and health care, to name a few. The chapters themselves take many forms. Check out the table of contents to get a deeper sense of the topics included. All provide real-world guidance on delivering high performing projects and show you how to build, lead and

manage high performing teams. The Practitioners Handbook of Project Performance is complete in itself. It can also be an enticing start to an ongoing dialogue with the authors and a pleasurable path to get deeper into the subject of project performance. Find your favorite place to begin learning from these chapters, to begin taking notes and taking away nuggets to use in your everyday. But don't stop there. Contact information and further resources for this diverse team of experts authors are found throughout. The Practitioners Handbook is a modern guide to the leading edge of project performance management and a path to the future of project delivery.

Sustainable Stellenbosch Mark Swilling,Ben Sebitosi,Ruenda Loots,2012-11-01 Stellenbosch faces the same challenges that most South African urban areas face: rapid urbanisation, sluggish economic growth, growing inequalities, unsustainable use of natural resources, deteriorating biodiversity, social problems, unhealthy living, insecure supplies of healthy food, degrading soils, infrastructure backlogs and inadequate urban planning. At the same time, Stellenbosch has tremendous potential. It brings together in one beautiful place extra-ordinary intellectual capacity, social diversity, financial resources, creative potential, high value eco-systems, spiritual energy and some of South

Africa's most vibrant grassroots social movements in its poorest areas. The brief given to the writers was to examine the current challenges and discuss what needs to change in the way we think about these challenges to ensure more positive and sustainable long-term outcomes. This is, therefore, a contribution that aims to further open up and widen recent dialogues about the future that Stellenbosch deserves--Back cover.
