Privacidad y Ocultación de Información Digital Esteganografía Alfonso Muñoz Muñoz, 2016-05-03 documentos filtrados a la prensa por Edward Snowden y Julian Assange (WikiLeaks), la alarma social en torno al espionaje de las comunicaciones y a la falta de privacidad en nuestras

transmisiones de datos en Internet se ha disparado. No sin falta de razón. La interceptación de comunicaciones y el robo de información a nivel personal, y sobre todo, corporativo y gubernamental, es un problema real. En realidad, puede que usted lo esté sufriendo y no sea consciente. El objetivo de este libro es introducir al lector en el mundo de la seguridad informática y la protección de comunicaciones digitales. Si bien es cierto que, aunque la ciencia de la criptografía y el criptoanálisis son actores elementales para comprender muchos de los ataques actuales, facilitando el diseño de contramedidas que mitiguen las escuchas de los amantes de lo ajeno, existen otras tecnologías que pueden influir positivamente en el diseño de comunicaciones y de redes informáticas más seguras. Este libro profundiza en la ciencia de la esteganografía y en su capacidad para crear canales ocultos de información que dificulten a un atacante espiar nuestras comunicaciones y robar nuestros datos. Lógicamente, la esteganografía, al igual que sucede con la criptografía, es una tecnología de doble uso y en la práctica puede ser utilizada con fines perjudiciales. De hecho, con un enfoque eminentemente práctico mediante el uso de múltiples herramientas, en los diferentes capítulos se refleja cómo poder utilizar la esteganografía para evadir mecanismos de seguridad perimetral (cortafuegos, antivirus, etc.), ocultación de código malicioso (malware), técnicas antforense, marcado digital de información, anonimato, covert channels para fuga de información y control remoto de sistemas infectados, etc. Este es el primer libro que cubre con cierto grado de detalle y con una perspectiva global todas las problemáticas y virtudes vinculadas a la ocultación de datos y comunicaciones digitales. Estoy convencido de que una vez disfrute de este texto su percepción de lo que es seguro y de lo que no cambiará por completo. Un nuevo conjunto de herramientas e ideas le perseguirán en su día a día para hacer de sus comunicaciones privadas lo que deberían ser desde un principio, confidenciales.

The papers included both traditional artificial intelligence methods and soft computing techniques as well as follows: · Neural Networks and Their Applications · Fuzzy Systems and Their Applications · Evolutionary Algorithms and Their Applications · Artificial Intelligence in Modeling and Simulation · Computer Vision, Image and Speech Analysis · Data Mining · Various Problems of Artificial Intelligence · Bioinformatics, Biometrics and Medical Applications

18th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2023) Pablo García Bringas, Hilde Pérez García, Francisco Javier Martínez de Pisón, Francisco Martínez Álvarez, Alicia Troncoso Lora, Álvaro Herrero, José Luis Calvo Rolle, Héctor Quintián, Emilio Corchado, 2023-10-01 This book of Advances in Intelligent and Soft Computing contains accepted papers presented at SOCO 2023 conference held in the beautiful and historic city of Salamanca (Spain) in September 2023. Soft computing represents a collection or set of computational techniques in machine learning, computer science, and some engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. After a thorough peer-review process, the 18th SOCO 2023 International Program Committee selected 61 papers which are published in these conference proceedings and represents an acceptance rate of 60%. In this relevant edition, a particular emphasis was put on the organization of special sessions. Seven special sessions were organized related to relevant topics such as: Time Series

Forecasting in Industrial and Environmental Applications, Technological Foundations and Advanced Applications of Drone Systems, Soft Computing Methods in Manufacturing and Management Systems, Efficiency and Explainability in Machine Learning and Soft Computing, Machine Learning and Computer Vision in Industry 4.0, Genetic and Evolutionary Computation in Real World and Industry, and Soft Computing and Hard Computing for a Data Science Process Model. The selection of papers was extremely rigorous to maintain the high quality of the conference. We want to thank the members of the Program Committees for their hard work during the reviewing process. This is a crucial process for creating a high-standard conference; the SOCO conference would not exist without their help.

Soft Errors in Modern Electronic Systems Michael Nicolaidis, 2010-09-30 This book provides a comprehensive presentation of the most advanced research results and technological developments enabling understanding, qualifying and mitigating the soft errors effect in advanced electronics, including the fundamental physical mechanisms of radiation induced soft errors, the various steps that lead to a system failure, the modelling and simulation of soft error at various levels (including physical, electrical, netlist, event driven, RTL, and system level modelling and simulation), hardware fault injection, accelerated radiation testing and natural environment testing, soft error oriented test structures, process-level, device-level, cell-

level, circuit-level, architectural-level, software level and system level soft error mitigation techniques. The book contains a comprehensive presentation of most recent advances on understanding, qualifying and mitigating the soft error effect in advanced electronic systems, presented by academia and industry experts in reliability, fault tolerance, EDA, processor, SoC and system design, and in particular, experts from industries that have faced the soft error impact in terms of product reliability and related business issues and were in the forefront of the countermeasures taken by these companies at multiple levels in order to mitigate the soft error effects at a cost acceptable for commercial products. In a fast moving field, where the impact on ground level electronics is very recent and its severity is steadily increasing at each new process node, impacting one after another various industry sectors (as an example, the Automotive Electronics Council comes to publish qualification requirements on soft errors), research and technology developments and industrial practices have evolve very fast, outdated the most recent books edited at 2004.
