Fireflies in Winter and Softland Matthew fish,2008-08-04 'Fireflies in Winter' and 'Softland' are two stories that tell of the struggle we sometimes face to remain part of this world, and to keep hope within us.

Promoting Silicon Valleys in Latin America Luciano Ciravegna,2012-08-06 The spectacular economic performance of China, East Asia and India during the last ten years has ignited some profound changes in the world economy. The share of global demand, investments, trade and production of the traditional industrialized powers, the US, Europe and Japan, has gradually yet continuously declined. This rise of China also has implications for Latin America. On the one hand, booming Chinese demand for raw materials and food has sustained the economic performance of Latin America during the last decade. On the other hand, the competitiveness of China and as a hub for advanced manufacturing is threatening Latin America's attempt to diversify its economy from its dependence on the export of natural resource-based goods. Most Latin American countries are not however waiting passively for their economies to become ever more reliant on high prices for food, minerals and oil. Leveraging the economic and political stability that they achieved during the last decades, many countries in the region, such as Brazil, Chile, Colombia, Costa Rica and Uruguay, are attempting to capture the growing market for knowledge intensive products and services by breeding their own Silicon Valleys. This book discusses the promotion of ICT clusters in Latin America by analyzing the development of the Costa Rican cluster in particular, an often celebrated case of successful policy in the region. Costa Rica, a small country traditionally known for its coffee and wildlife, managed to build an information technology cluster within ten years, becoming the leading producer of ICT per capita in Latin America. Studying the Costa Rican case provides a solid starting

point for understanding the challenges of building ICT clusters in Latin America.

Lucky Bastard S.G. Browne, 2013-06-18 A radically funny, irreverent, satirical novel about a loan shark who is able to steal people's luck--perfect for fans of bestselling authors Christopher Moore and Chuck Palahniuk. Nick Monday is a private detective with a penchant for coffeehouse baristas and the ability to steal other people's luck. Politicians and celebrities. Lottery winners and game show contestants. Accident survivors and successful athletes. All it takes is a handshake and Nick walks away with their good fortune, which he sells on the black market to the highest bidder. But lately, business has been slow. So when the sexy daughter of San Francisco's mayor offers Nick \$100,000 to find her father's stolen luck, Nick thinks this is his big break. But he soon ends up blackmailed by the feds, kidnapped by the Chinese mafia, and accosted by vegans and angry naked women with knives ... all while trying to save a ten-year-old kid with the purest luck he's ever seen. Hailed as pitch-perfect by The Washington Post and deemed one of America's best satiric novelists by Kirkus Reviews, Browne's masterful combination of humor and biting social commentary make for an irresistible read--

Softland 2 Matthew Fish, 2011-04-22 Amber Lump is a girl who feels completely out of place in our world. Stranded alone for days in her home because of a seemingly never-ending blizzard, she is forced to venture out into the storm to find her only remaining family, a grandfather who treats her like both a slave and a burden. When she arrives at the gas station that her grandfather runs, she finds no trace of him, only a cryptic note that leads her once again out into the deadly cold in a last-ditch effort to find him. At her weakest moment, with the cold threatening to overtake her, she discovers the impossible: a patch of green grass and flowers, growing untouched amidst the harsh elements. However, she finds no peace here; instead a looming shadow beneath her feet drags her

down to the Abyss, where she may find a chance for a new life.

Softland Matthew Fish,2011-04-23 Matthew Catt is a young man tormented by many irrational fears. On his way to attend a funeral hundreds of miles from home, he is stricken with a crippling panic attack that causes the ground beneath him to swallow him whole. Matthew finds himself in a dark new world where his fears manifest into creatures. As he attempts to make his way home, he finds that maybe the worst thing in life, is to remain afraid.

Objectives and Models of the Planetary Quarantine Program Morton Werber,1975 The objectives of the planetary quarantine program are presented and the history of early contamination prevention efforts is outlined. Contamination models which were previously established are given and

include: determination of parameters; symbol nomenclature; and calculations of contamination and hazard probabilities. Planetary quarantine is discussed as an issue of national and international concern. Information on international treaty and meetings on spacecraft sterilization, quarantine standards, and policies is provided. The specific contamination probabilities of the U.S.S.R. Venus 3 flyby are included.

Shooting Monkeys in a Barrel S.G. Browne,2012-03-27 From the author of *Breathers*, *Fated*, and *Lucky Bastard* comes a collection of ten dark and humorous tales about extraterrestrial sex toys, a family of luck poachers, a group of professional guinea pigs, the immortal personifications of the Seven Deadly Sins, and a zombie gigolo. Just to name a few. "A Zombie's Lament"—A newly reanimated corpse attends Undead Anonymous meetings with other zombies and comes to terms with the reality of his new existence. "Softland"—A family of luck poachers living in central California attempts to turn around its fortunes from a deal gone bad. "My Ego Is Bigger than Yours"—A new designer drug reinvents role-playing games by allowing its users to temporarily become dead celebrities and fictional characters. "Dream Girls"—A futuristic tale of sexual obsession, extraterrestrial intelligence, the death of Marilyn Monroe, and the assassination of JFK. "Shooting Monkeys in a Barrel"—A writer suffering from writer's block becomes addicted to the words he purchases from a drug dealer. "Captivity"—A lonely and horrifying look at what it might be like if you were a bottle of shampoo. "The Sodom and Gomorrah Shore"—The Seven Deadly Sins star in the original reality television show, set back during the destruction of Sodom and Gomorrah. "Homer's

Reprise”—A modern day story of Odysseus that blends Greek mythology with Bigfoot, the Loch Ness Monster, and Herman Melville’s Moby-Dick. “Dr. Lullaby”—A panhandler and professional guinea pig discovers that the pharmaceutical drugs he’s been testing have given him unusual side effects. “Zombie Gigolo”—A day in the life of a living corpse who provides a unique service for lonely and desperate female zombies.

Computer Applications in Production and Engineering Frank Plonka, Gustav J. Olling, 2013-06-05 In the latter half of the 20th century, forces have conspired to make the human community, at last, global. The easing of tensions between major nations, the expansion of trade to worldwide markets, widespread travel and cultural exchange, pervasive high-speed communications and automation, the explosion of knowledge, the streamlining of business, and the adoption of flexible methods have changed the face of manufacturing itself, and of research and education in manufacturing. The acceptance of the continuous improvement process as a means for organizations to respond quickly and effectively to swings in the global market has led to the demand for individuals educated in a broad range of cultural, organizational, and technical fields and capable of absorbing and adapting required knowledge and training throughout their careers. No longer will manufacturing research and education focus on an industrial sector or follow a national trend, but rather will aim at enabling international teams of companies to cooperate in rapidly designing, prototyping, and manufacturing products. The successful enterprise of the 21st century will be characterized by an organizational structure that efficiently responds to customer demands and changing global circumstances, a corporate culture that empowers employees at all levels and encourages constant communication among related groups, and a technological infrastructure that fully supports process improvement and integration. In changing itself to keep abreast of the broader transformation in

manufacturing, the enterprise must look first at its organization and culture, and thereafter at supporting technologies.

The Epic of Gilgamesh: Selected Readings from its Original Early Arabic Language Saad D. Abulhab, 2016-10-27 The pioneering work presented in this book introduces the earliest known literary and mythology work in the world, the Epic of Gilgamesh, in its actual language: early Classical Arabic. It provides a more accurate translation and understanding of the important story of the flood, one of the key stories of the monotheistic religions. In this book, the author, a known Arabic type designer and an independent scholar of Nabataean, Musnad, and early Arabic scripts, was able to decipher the actual meanings and pronunciations of several important names of ancient Mesopotamian gods, persons, cities, mountains, and other entities. He was able to uncover the evolution path of the concept of god and the background themes behind the rise of the monotheistic religions. Utilizing a generous text sample from the Akkadian and Sumerian languages, this book is an excellent reference textbook for scholars and students of Arabic and Assyriology who are interested in translating these ancient languages through both, the historical Arabic etymological references and the deciphering tools of Assyriology. To illustrate his breakthrough Arabic-based deciphering methodology, the author used a sample text consisting of more than 900 lines from three tablets of the Standard and Old Babylonian editions of the Epic of Gilgamesh. By “digging out” the actual language of the epic, he was not only able to resurrect the actual word soundings and linguistic literary style of its original text, but also to provide more accurate and coherent translations. Following his three years of research, he was able to demonstrate through undisputed linguistic evidence that the epic was in fact written in a beautiful, powerful early Classical Arabic language! And the so-called Sumerian and Akkadian

languages that the epic was recorded with, which we are told today are unrelated languages, were in fact one evolving early Arabic language, written with one evolving writing system, passing through two major time periods. Although this book is primarily written as a reference textbook for scholars, it is equally suitable for anyone interested in reading the translation of the Epic of Gilgamesh, a fascinating Mesopotamian Arab mythology work documenting eloquently some of the most important and lasting ancient myths invented by humankind.

Advances in Space Science and Technology Frederick I. Ordway, 2014-12-01 Advances in Space Science and Technology, Volume 10 provides information pertinent to the developments in space science and technology. This book discusses the logistic and shelter construction, environment, and transportation aspects of Antarctic and lunar exploration. Organized into five chapters, this volume begins with an overview of the comparison of the lunar exploration program with the exploration of Antarctica. This text then explores the surface geology of the planet Mars wherein the study emphasizes that water erosion transport does not exist, that an oxidizing atmosphere is absent, and that wind erosion must be minimal. Other chapters consider the problems associated with navigation aboard spaceships traveling between the stars. This book discusses as well the inadequacy of space communication systems as a means of providing an instantaneous and uninterrupted service. The final chapter deals with predictions about the utility of space flight. This book is a valuable resource for readers who are interested in space science and technology.

Unveiling the Energy of Verbal Artistry: An Psychological Sojourn through **Softland**

In some sort of inundated with monitors and the cacophony of instantaneous communication, the profound power and psychological resonance of verbal art often fade into obscurity, eclipsed by the constant onslaught of noise and distractions.
