The Collapsium Wil McCarthy,2020-04-07 A MODERN SCIENCE FICTION CLASSIC FROM WIL MCCARTHY In the eighth decade of the Queendom of Sol, three commodities rule the day. The first is wellstone, a form of programmable matter capable of emulating almost any substance: natural, artificial, even hypothetical. The second is collapsium, a deadly crystal composed of miniature black holes, vital for the transmission of information and matter—including humans—throughout the solar system. The third is the bitter rivalry between Her Majesty's top scientists. Bruno de Towaji, famed lover and statesman, dreams of building an arc de fin, an almost mythical device capable of probing the farthest reaches of spacetime. Marlon Sykes, de Towaji's rival in both love and science, is meanwhile hard at work on a vast telecommunications project whose first step is the construction of a ring of collapsium around the sun. But when a ruthless saboteur attacks the Ring Collapsiter and sends it falling into the sun, the two scientists must put aside personal animosity and combine their prodigious intellects to prevent the destruction of the solar system . . . and every living thing within it. At the publisher's request, this title is sold without DRM (Digital Rights Management). About The Collapsium: "Ingenious and witty . . . as if Terry Pratchett at his zaniest and Larry Niven at his best had collaborated."—Booklist Fresh and imaginative. From a plausible yet startling invention, McCarthy follows the logical lines of sight, building in parallel the technological and societal innovations.—Science Fiction Weekly The future as McCarthy sees it is a wondrous place.—Publishers Weekly [McCarthy] studs his narrative with far-out scientific concepts. . . . He certainly has a sense of humor.—The New York Times "An ingenious yarn with challenging ideas, well-handled technical details, and plenty of twists and turns."—Kirkus

Innovative Technologies and Services for Smart Cities Subhas Mukhopadhyay, Tarikul Islam, 2019-09-02
A smart city is a modern technology-driven urban area which uses sensing devices, information, and communication technology connected to the internet of things (IoTs) for the optimum and efficient utilization of infrastructures and services with the goal of improving the living conditions of citizens. Increasing populations, lower budgets, limited resources, and compatibility of the upgraded technologies are some of the few problems affecting the implementation of smart cities. Hence, there is continuous advancement regarding technologies for the implementation of smart cities. The aim of this Special Issue is to report on the design and development of integrated/smart sensors, a universal interfacing platform, along with the IoT framework, extending it to next-generation communication networks for monitoring parameters of interest with the goal of achieving smart cities. The proposed universal interfacing platform with the IoT framework will solve many challenging issues and significantly boost the growth of IoT-related applications, not just in the environmental monitoring domain but in the other key areas, such as smart home, assistive technology for the elderly care, smart city with smart waste management, smart E-metering, smart water supply, intelligent traffic control, smart grid, remote healthcare applications, etc., signifying benefits for all countries.

Lisa Kane Richard A. Lupoff, Michael Kurland, 2010-11-01 In the tradition of the old Ace Doubles two-in-one books (flip one over to read the second title)--here is the twelfth Wildside Double: LISA KANE: A NOVEL OF WEREWOLVES, by Richard A. Lupoff. Lisa is a 12-year-old girl with all the worries of any normal girl beginning the transition to womanhood. She's frightened by the changes happening to her body--the budding breasts, the stiff black hairs that appear on the back of her hands, and the way her nails twist to look like claws during the full moon. Is this normal? Why is she so different from everyone else? Scott A. Culp says: A good book...that does not deserve to be forgotten. THE PRINCES OF EARTH: A SCIENCE FICTION NOVEL, by Michael Kurland. Adam Warrington is a young man from a repressive planet in the grasp of fundamental Puritanism. Then he's accepted by the University of Sol on Mars, and his great adventure begins. On the way there his spaceship is hijacked by a disgruntled noble who wants to overthrow the emperor, and Adam is forced to choose sides. A grand tale in the tradition of Robert A. Heinlein. A Young Adult Literary Guild Selection.

Lost in Transmission Wil McCarthy, 2020-12-01 EXILED FROM IMMORTALITY! The third entry in McCarthy's groundbreaking, mind-bending Queendom of Sol series back in print. Brash and idealistic, they were rebels without a cause in a world governed by science, reason . . . and immortality. Banished for their troubles to the starship Newhope, they now face a bold future: to settle the worlds of Barnard's Star. Now King Bascal Edward de Towaji Lutui, former prince of the Queendom of Sol, together with Captain Xiomara "Xmary" Li Weng and her lover, first mate Conrad Murks, face a perilous voyage with thousands of their fellow exiles. The journey will last a century, but with Queendom technology it's no problem to step into a fax machine and "print" a fresh, youthful version of yourself. But what this crew of rebels will find is far from the paradise they seek. Before long, their optimistic young colony has started to show signs of strain. And worst of all, death itself has returned with a vengeance.

Robot Nemesis E.E. "Doc" Smith,2022 The War of the Planets ended in stalemate. Both fleets were so horribly shattered that the survivors despaired of continuing hostilities. Instead, the few and crippled remaining vessels of each force limped into some sort of formation and returned to their various planetary bases. And, so far, there has not been another battle. Neither side dares attack the other; each is waiting for the development of some super-weapon which will give it the overwhelming advantage...

Intergalactic Exterminators, Inc Ash Bishop,2022-09-06 Finding work is easy. Staying alive is a little bit harder. When Russ Wesley finds an unusual artifact in his grandfather's collection of rare antiquities, the last thing he expects is for it to draw the attention of a ferocious alien from a distant planet. Equally surprising is the adventurous team of intergalactic exterminators dispatched to deal with the alien threat. They're a little wild, and a little reckless. Worse yet, they're so impressed with Russ's marksmanship that they insist he join their squad . . . whether he wants to or not.

Automation: The Future of Weed Control in Cropping Systems Stephen L. Young,Francis J. Pierce,2013-11-21 Technology is rapidly advancing in all areas of society, including agriculture. In both conventional and organic systems, there is a need to apply technology beyond our current approach to improve the efficiency and economics of management. Weeds, in particular, have been part of cropping systems for centuries often being ranked as the number one production cost. Now, public demand for a sustainably grown product has created economic incentives for producers to improve their practices, yet the development of advanced weed control tools beyond biotech has lagged behind. An opportunity has been created for engineers and weed scientists to pool their knowledge and work together to 'fill the gap' in managing weeds in crops. Never before has there been such pressure to produce more with less in order to sustain our economies and environments. This book is the first to provide a radically new approach to

weed management that could change cropping systems both now and in the future.
