22 of My Favorite Tools Charlotte Boshart,2014-01-07

The Speaker's Toolbox Brian Woolf,2016-06-23 The purpose of this book is to help newer speakers speak better ... faster. This is achieved with its focus on the three essentials: a clear message, a close audience connection, and helping your audience remember. An important contribution the book also makes is an explanation why audiences' minds wander and how you can hold their attention. The book comprises two parts: a set of 47 tools to build better speeches; followed by 11 world-class speeches, examples of speaking excellence illustrating many of the tools described. The book has a clear, easy-to-understand style, free of technical rhetorical terms. Each helpful tool covers two pages: a half-page description, followed by copious examples allowing the reader to clearly understand the tool's use in different situations. In addition to triggering new speech ideas, readers can adapt the examples given to dovetail into their own speeches. Besides including some of the better-known speech tools such as Alliteration, Repetition, and Triples, it introduces the reader to some of the newer tools such as Twists, the Senses, and Visual Words. It is a toolbox of fresh, helpful ideas that every speaker will keep nearby.

Multi-Tiered Systems of Support Lesley Sylvan,2020-10-13 Many school-based speech-language pathologists (SLPs) deal with large caseloads and limited resources. Taking on additional workload by implementing multi-tiered systems of support (MTSS) can seem overwhelming. *Multi-Tiered Systems of Support: Implementation Tools for Speech-Language Pathologists in Education* offers practical research-based tools that school-based

SLPs can use to balance the high demands of their job with supporting general education students. This professional resource provides answers to a range of questions about policy implications, applicability of the framework to a speech-language pathologist's role in schools, and how an SLP can implement MTSS in their practice. Part I breaks down the important concepts of MTSS, while Part II is designed as an SLP MTSS Toolkit, featuring the collective wisdom of practitioners and researchers in the field. Throughout the text, readers will also find real-world snapshots of MTSS in action based on the experiences of actual SLPs in the field. Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

Tools Speakers Need in Order to Give the Perfect Speech Jim Anderson,2016-08-29 As speakers, we want to create the best speech that we can. In order to do this we can make use of a large number of tools that are available. However, we first have to know about the tools that we have access to and then we need to know how to go about using them. Each of these tasks can be learned. What You'll Find Inside: *10 TIPS FOR CONQUERING THE FINAL FRONTIER OF SPEAKING: TELEVISION * WHY PUBLIC SPEAKERS SHOULD ALWAYS USE NOTES * #1 SECRET ALL SUCCESSFUL PUBLIC SPEAKERS KNOW (AND YOU SHOULD TOO) *PUBLIC SPEAKING REQUIRES A VOICE THAT PEOPLE WANT TO HEAR Where we give a speech is something that can be different each time we give a speech. One location that not many of us may

have thought of is giving a speech that televised. When we do this, how we go about giving the speech is different from how we normally give speeches. One of the most important parts of any speech that we give is our voice. However, we have to learn how to listen to ourselves if we want to change how our audience is going to hear our voice. Improving our speech depends on more than just our voice: we need to both practice before giving the speech and then remember to bring notes on the day that we deliver the speech. Goal setting is a great way to measure our progress in real life. It turns out that it also works when we are trying to improve how we speak. If we ever get good enough at this speaking thing, then there is a chance that we might win an award. If this happens, we're going to have to know the right way to go about accepting it. Our speeches can be long and filled with a number of different important ideas. If we find ourselves in a situation where the exact words that we say and the order in which we say them is important, then we may need to use a teleprompter. This is a powerful tool, but we need to take the time to learn how to get the most out of it. Tools for Signal Compression Nicolas Moreau, 2013-03-04
This book presents tools and algorithms required to compress/uncompress signals such as speech and music. These algorithms are largely used in mobile phones, DVD players, HDTV sets, etc. In a first rather theoretical part, this book presents the standard tools used in compression systems: scalar and vector quantization, predictive quantization, transform quantization, entropy coding. In particular we show the consistency between these different tools. The second part explains how these tools are used in the latest speech and audio coders. The third part gives Matlab programs simulating these coders.

Investigating Spoken English Štefan Beňuš, 2021-04-17
Combining coverage of the key concepts and tools within phonetics and phonology with a systematic introduction to Praat, this textbook provides a lively and engaging 'way in' to the discipline. The author first covers the fundamentals of the articulatory and acoustic aspects of speech and introduces Praat as the main tool for examining and visualising speech. Next, the unit of analysis is gradually expanded (from syllables to words to turns and dialogues) and excerpts of real dialogues exemplify the core concepts for discovering how speech works. The final part of the book brings all the concepts and notions together with commentaries to the transcription of several short excerpts of dialogues. This book will be essential reading for students on undergraduate courses in phonetics and phonology.
