Data Service Outsourcing and Privacy Protection in Mobile Internet Hu Xiong,2018-11-07 Mobile internet data has the characteristics of large scale, variety of patterns, and complex association. On the one hand, it needs an efficient data processing model to provide support for data services, and, on the other hand, it needs certain computing resources to provide data security services. Due to the limited resources of mobile terminals, it is impossible to complete large-scale data computation and storage. However, outsourcing to third parties may cause risks in user privacy protection. This monograph focuses on key technologies of data service outsourcing and privacy protection, including the existing methods of data analysis and processing, fine-grained data access control through effective user privacy protection mechanisms, and data sharing in the mobile internet.

Cinema Italiano Howard Hughes,2011-04-30 Italian filmmakers have created some of the most magical and moving, violent and controversial films in world cinema. During its twentieth-century heyday, Italy's film industry was second only to Hollywood as a popular film factory, exporting cinematic dreams with multinational casts to the world, ranging across multiple genres. 'Cinema Italiano' is the first book to discuss comprehensively

and in depth this Italian cinema, both popular and arthouse. It is illustrated throughout with rare stills and international posters from this revered era in European cinema and reviews over 350 movies. Howard Hughes uncovers this treasure trove of Italian films, from Lucino Visconti's epic 'The Leopard' to the cult superhero movie 'Puma Man'. Dario Argento's bloody 'gialli' thrillers and Sergio Leone's spaghetti westerns are explored alongside films of Federico Fellini, Pier Paolo Pasolini and Michelangelo Antonioni. Chapters discuss the rise and fall of genres such as mythological epics, gothic horrors, science fiction, spy films, war movies, costume adventures, zombie films, swashbucklers, political cinema and 'poliziotteschi' crime films. They also trace the directorial careers of Mario Bava, Sergio Corbucci, Francesco Rosi, Lucio Fulci, Duccio Tessari, Enzo G. Castellari, Bernardo Bertolucci and Gillo Pontecorvo.

Plant MicroRNAs and Stress Response Deepu Pandita,Anu Pandita,2023-07-17 MicroRNAs (miRNAs) are small (20–24 nt), single stranded, regulatory RNA molecules or gene regulators of critical transcriptional or post-transcriptional gene regulation in plants in sequence-specific order that respond to numerous abiotic stresses and animals, non-coding, highly evolutionarily conserved and widely distributed throughout the plant kingdom. MiRNAs are master regulators of plant growth and development, development attenuation under various environmental stresses by stress-responsive miRNAs and plant stress responses and tolerance. Drought, salinity, heat, cold, UV radiation, heavy metal, pathogens, pests and other microbial infections affect survival, growth, development, quality, yield, and production of plants. Stress induced miRNAs down regulate their target miRNAs. This down regulation leads to the accumulation and function of positive regulators, highlighting their roles in stress responses and tolerance. Plant miRNA mediated modifications include overexpression or repression of stress-responsive miRNAs and/or their target complementary or partially complementary gene products, miRNA-resistant target genes, target-mimics and artificial miRNAs. Thus, miRNAs may serve as genomic gold mines, novel, potent and potential targets in plant genetic manipulations and miRNA-based biotechnology will aid plant improvement and crop-plant tolerance to different environmental stresses. This book reviews our recent understanding of plant microRNAs, biogenesis and functions, computational tools and bioinformatics, regulation of plant growth and development, expression studies, and the role of plant miRNAs in various biotic and abiotic stress-response regulation in plants.
