Rediscovering Mrs. Murphy Craig S. Austin, 2007-10 Upton Sinclair meets Joseph Heller, the funniest book since *A Confederacy of Dunces*. Austin's novel is an unlikely mixture of expose, social satire and high comedy that somehow, brilliantly, succeeds. It will make you laugh, cry, and want to punch out your boss. Don't read this book at work, but by all means read it. Charles Dodt, Author, *The Night Boy* *** Do you remember the best time of your life? For Chuck Farlowe, his time came and went, one April day back in 1973. His A game, unfortunately, was left in the dugout that day. Cut to 1998. His son, Danny, is at the crossroads of his life. A young man in need of answers, he finds them in the form of a long-buried manuscript written by his father back in 1973. Suddenly he finds himself at a strange place and time the Hotchkis Department Store in downtown Oakland, circa 1970. Danny is introduced to both the store manager, Matt Farber, and the store owner, Isaac Benjamin Stern. Soon a union election begins to loom ominously. Chuck manages to find a kindred spirit in Lee Kroeber, and eventually, after a struggle, with Cooper Smith, whose own bitterness and alienation over store racism threatens to change the entire store dynamic. When Wayne Justice joins the Hotchkis fold in 1971, soon the era of poker and male bonding begin. *Rediscovering Mrs. Murphy* is all about fighting through the pain of the past and rediscovering what really matters.

Fundamental Interactions Jean-Louis Basdevant,Maurice Levy,2012-12-06 The 1981Cargese Summer Institute on Fundamental Interactions was organized by the Universite Pierre et Marie Curie, Paris (M. LEVY and J.-L. BASDEVANT), CERN (M. JACOB), the Universite Catholique de Louvain (D. SPEISER and J. WEYERS), and the Katholieke Universiteit te Leuven (R. GASTMANS), which, like in 1975, 1977 and 1979, had joined their efforts and worked in common. It was the 22nd Summer Institute held at Cargese and the 6th one organized by the two institutes of theoretical physics at Leuven and Louvain-la-Neuve. This time, while the last school was dominated by the impressive advances which were made in the field of perturbative quantum chromodynamics and its applications to high energy phenomena involving strongly interacting particles, the 1981 school clearly reflected a period of transition, where the new insights gained by experiment and theory are digested and put in order. Place of pride among the experiments belonged this time to DESY. On the theoretical side the reader will find a more thorough interpretation and understanding of the experiments as well as approaches to new theories. Finally several talks were devoted to experiments of the future. We owe many thanks to all those who have made this Summer Institute possible! Thanks are due to the Scientific Committee of NATO and its President for a generous grant and especially to the head of the Advanced Study Institute Program, Dr. R. Chabbal and his collaborators for their constant help and encouragements.
