Fierce Enigmas Srinath Raghavan,2018-10-16 The two-hundred-year history of the United States' involvement in South Asia--the key to understanding contemporary American policy in the region South Asia looms large in American foreign policy. Over the past two decades, we have spent billions of dollars and thousands of human lives in the region, to seemingly little effect. As Srinath Raghavan reveals in Fierce Enigmas, this should not surprise us. For 230 years, America's engagement with India, Afghanistan, and Pakistan has been characterized by short-term thinking and unintended consequences. Beginning with American traders in India in the eighteenth century, the region has become a locus for American efforts--secular and religious--to remake the world in its image. The definitive history of US involvement in South Asia, Fierce Enigmas is also a clarion call to fundamentally rethink our approach to the region.

The India and the World Krishna Kumar Singh,2014-01-22 The India and the World: Shame and Uncertainty has mainly depicted issues like social, political, economic, poverty, illiteracy, lack of health facilities, insecurity, violence, corruption, indiscriminate armaments, environment pollution, hunger, etc., in India and the world nations, written in the last two and half years. Articles and essays have gone in details about what is happening in India and the globe. Exploitation of poor, downtrodden, and weaker sections of society have been highlighted. Important features of the book are indifference of world nations toward burning issues in the respective countries and also issues of concern throughout the globe. Compassion, peace, and nonviolence have become nobodys concern in India and the globe, and these issues have been kept on the back burner! Notably one thing is very common in the worldthat is the rich are getting richer and the poor are getting poorer. Shamelessly shameful activities have taken the drivers seat. Everywhere in all the countries, uncertainties prevailit appears that these important issues have little or no priority among elite and political classes ruling the respective nations of the world. General people are helpless and ruling elites are indifferent. Almost all nations are threatened with the so-called terrorism or militant fanaticism, which appear to have adopted militancy because of exploitation and hate campaign against them or their brothers and sisters or their nations in the world. World nations have made terrorism, extremism, and militancy into big hoaxes. Instead of finding solutions, world nations and their political rulers, as well as others, are blaming each other for these hoaxes. Last but not the least, the entire world nations and their people are in the grip of uncertainty and serious threat because of man-made miseries in destroying the environment. Because of unethical and unprincipled pressure on the earth, the earth is itself threatened to bear the burden of man-made destruction of the nature and natural wealth. Thus the earth is under tremendous pressure of sins of the people of the globe!

Vetiveria Massimo Maffei,2002-01-17 Vetiveria is one of the most versatile genera in plant kingdom. For example, the species Vetiveria zizanioides produces oderous roots from which a precious essential oil is distilled and used in a variety of applications from perfumery to ethnopharmacology. The same roots give the plant particular characteristics that make it a valuable natural barr

The Oxford Handbook of Indian Foreign Policy David M. Malone,C. Raja Mohan,Srinath Raghavan,2015-07-23 Following the end of the Cold War, the economic reforms in the early 1990s, and ensuing impressive growth rates, India has emerged as a leading voice in global affairs, particularly on international economic issues. Its domestic market is fast-growing and India is becoming increasingly important to global geo-strategic calculations, at a time when it has been outperforming many other growing economies, and is the only Asian country with the heft to counterbalance China. Indeed, so much is India defined internationally by its economic performance (and challenges) that other dimensions of its internal situation, notably relevant to security, and of its foreign policy have been relatively neglected in the existing literature. This handbook presents an innovative, high profile volume, providing an authoritative and accessible examination and critique of Indian foreign policy. The handbook brings together essays from a global team of leading experts in the field to provide a comprehensive study of the various dimensions of Indian foreign policy.

Big Dams Dilemma Rabindra Nath Padaria,Yogendra Pal Singh,2000

Wasted Ankur Bisen,2019-08-22 PRAISE FOR WASTED 'This book enhances our understanding of the historical issues that have plagued India's sanitation challenge. A must read for those who are interested in the important agenda of a clean environment for all' NAINA LAL KIDWAI, Chair, India-Sanitation Coalition 'Despite the clarion call by our Prime Minister, Indian society still lacks clarity on the nature of the desirable solution for sanitation. Wasted is a serious attempt at pointing out possibilities and solutions. Written lucidly and in a narrative style; it provides an inspiring peek of a clean future. A much-needed book for our times' DR RAJIV KUMAR, Vice Chairman, Niti Aayog 'Wasted advocates that the handling of waste in India requires the finest management and developmental architecture. The book remarkably delves into the depth and breadth of the problem of yesterday and today and presents it as a free-flowing storytelling' MARTIN MACWAN, Dalit human rights activist 'Wasted locates India's missed opportunities in sanitation in its complex civilizational legacy; its comfort with caste, informality and child labour; and in its appalling local governance systems. Necessary reading for every policy maker, town planner and engaged urban citizen.' HARSH MANDER, author and activist 'Wasted addresses India's complex caste-driven perception of waste. It traces the illogic of our constant discontent with modes of disposal, while being deliberately blind to socio-political processes behind its creation. This book must be read by all concerned Indians' ARUNA ROY, socio-political activist and Magsaysay Award winner (2000) 'India is not working on the science needed towards the management of pollution that it emits in the name of development. Therefore, even well-intentioned projects do not yield results. This book can be an entry point to understanding the process to reduce use of nature and to rejuvenate nature for our sustainable future' DR RAJENDRA SINGH, environmentalist and Magsaysay Award winner (2001) ABOUT THE BOOK Urban India generates close to 3 million trucks of untreated garbage every day. If these were laid end-to-end, one could reach half way to the moon. The need for attention to sanitation and cleanliness is both urgent and long-term. This book takes an honest look into India's perpetual struggle with these issues and suggests measures to overcome them. Historically, we have developed into a society with a skewed mindset towards sanitation with our caste system and non-accountability towards sanitation. Through stories, anecdotes and analysis of events, this book seeks solutions to the current entangled problems of urban planning, governance and legislation, and institutional and human capacity building. Wasted traces interesting relationships between urban planning and dirty cities in India; legislative and governance lacunae and the rising height of open landfills; the informality of waste management methods, and the degrading health of Indian rivers, soil and air. Arguing that all current solutions of India are extrapolated from these flawed beliefs and structures and are therefore woefully inadequate, Bisen draws a

benchmark from clean countries of today. Underlining the need for inclusive human clusters, specificity in legislation, correction of existing social contracts and governance frameworks, creating a formal resource recovery industry in India, and the pursuit of diplomacy around this industry, this book shows how these solutions could lead us towards a brighter future and better social development.

Identity, Conflict and Cooperation in International River Systems Jack Kalpakian,2017-11-30 Kalpakian tests the dominant assumption that water disputes cause violent conflict between states and other actors in world politics.

Using case studies from arid regions to bias the effort towards this assumption, he finds that issues related to identity have been the real source of conflict in the river basins studied. This essential volume: - challenges conventional assumptions about water and conflict - displaces the state as the sole actor in violent conflict - reveals the link between conflict and identity This book invites the reader to address the complexity in the relationships binding peoples and states in an international river basin.

River Dialogues Georgina Drew,2017-04-11 India's sacred Ganga River is arguably one of the most iconic sites for worship, with a continuity of rituals for the living and the dead that span over two millennia. Along the river, from high in the Himalaya to the vast plains below, people gather daily to worship the Ganga through prayer and song. But large government-sponsored dams threaten to upend these practices. In River Dialogues, Georgina Drew offers a detailed ethnographic engagement with the social movements contesting hydroelectric development on the Ganga. The book examines the complexity of the cultural politics that, on the one hand, succeeded in influencing an unprecedented reversal of government plans for three contested hydroelectric projects, and how, on the other hand, this decision sparked ripples of discontent after being paired with the declaration of a conservation zone where the projects were situated. The book follows the work of women who were initially involved in efforts to stop the disputed projects. After looking to their discourses and actions, Drew argues for the use of a political ecology analysis that incorporates the everyday practice and everyday religious connections that animated the cultural politics of development. Drew offers a nuanced understanding of the struggles that communities enact to assert their ways of knowing and caring for resources that serves as an example for others critically engaging with the growing global advocacy of the "green economy" model for environmental stewardship.

Transactions of the American Society of Civil Engineers American Society of Civil Engineers,1982 Vols. 29-30 contain papers of the International Engineering Congress, Chicago, 1893; v. 54, pts. A-F, papers of the International Engineering Congress, St. Louis, 1904.

Gold and Datura Lasya Shashimohan,2014-12-11 The Cons:- * A complex loco-motor disability * A habitual sponge and punter for a father * A chronically depressed mother * A predatory, incestuous cousin * Atrociously bad infrastructure in small-town India that makes day to day living an ordeal * Dubious treatments and medical negligence * A base, subhuman society that mocks, ridicules, belittles, disparages, heckles, tyrannizes, rejects and alienates her just because she has a disability. The Pros:- * She is an ethereal beauty, blessed with a Super- high IQ. Will our beauteous genius of a protagonist, Kanak, be able to stand up to all the herculean cons stacked against her or will the scorching heat of atrocities lead to the untimely withering of a rose that could blossom into something phenomenal?

Water Conflicts in India K.J. Joy,Suhas Paranjape,Biksham Gujja,Vinod Goud,Shruti Vispute,2020-11-29 Water conflicts in India have now percolated to every level. They are aggravated by the relative paucity of frameworks, policies and mechanisms to govern the use of water resources. Based on the premise that understanding and documenting different types of water conflict cases in all their complexity would contribute to informed public debate and facilitate their resolution, Forum for Policy Dialogue on Water Conflicts in India, a collaborative initiative of the WWF project 'Dialogue on Water, Food and Environment', documented a number of such case studies. One of its kind in India, this book brings together an impressive sixty-three case studies – summarized status of the conflicts, the issues involved and their current position – and gives us a glimpse into 'the million revolts' that are brewing around water. While recognizing that each conflict is a microcosm of wider conflicts, the editors have classified these cases into eight broad themes that try to capture the dominant aspect of the conflict. These are: contending water uses; dams and displacement; equity-access-allocations; micro-level conflicts; water quality; trans-boundary conflicts; privatization; sand excavation and mining. With a mix of academics and activists as contributors, the book makes an important contribution to a new discourse on water in general, and water conflicts and conflict resolution in particular.
