Multimedia Stardom in Hong Kong Leung Wing-Fai, 2014-11-27 This book details original research into the practices and discourse of multimedia stardom alongside changing social and cultural landscapes in Hong Kong since 1980. It examines the cultural and sociological significance of stardom in the region, and the conditions which gave rise to such famous stars as Jackie Chan. This book elaborates the distinction between multimedia stardom and celebrity, asserting that in Hong Kong stardom has been central in the production and consumption of local media, while demonstrating the importance of multimedia stardom as part of the 'cultural Chinese' mediascape and transnational popular culture from both historical and contemporary contexts.

Paper Tigers, Hidden Dragons Douglas B. Fuller, 2016-05-19 China presents us with a conundrum. How has a developing country with a spectacularly inefficient financial system, coupled with asset-destroying state-owned firms, managed to create a number of vibrant high-tech firms? China's domestic financial system fails most private firms by neglecting to give them sufficient support to pursue technological upgrading, even while smothering state-favoured firms by providing them with too much support. Due to their foreign financing, multinational corporations suffer from neither insufficient funds nor soft budget constraints, but they are insufficiently committed to China's development. Hybrid firms that combine ethnic Chinese management and foreign financing are the hidden

dragons driving China's technological development. They avoid the maladies of China's domestic financial system while remaining committed to enhancing China's domestic technological capabilities. In sad contrast, China's domestic firms are technological paper tigers. State efforts to build local innovation clusters and create national champions have not managed to transform these firms into drivers of technological development. These findings upend fundamental debates about China's political economy. Rather than a choice between state capitalism and building domestic market institutions, China has fostered state capitalism even while tolerating the importing of foreign market institutions. While the book's findings suggest that China's state and domestic market institutions are ineffective, the hybrids promise an alternative way to avoid the middle-income trap. By documenting how variation in China's institutional terrain impacts technological development, the book also provides much needed nuance to widespread yet mutually irreconcilable claims that China is either an emerging innovation power or a technological backwater. Looking beyond China, hybrid-led development has implications for new alternative economic development models and new ways to conceptualize contemporary capitalism that go beyond current domestic institution-centric approaches.

Gene Expression in the Central Nervous System
Albert C. H. Yu, 1995 Gene expression is an active ongoing process that maintains a functional CNS, as proteins are being made on a continual basis.

Processes such as learning and memory, nerve cell repair and regeneration and its response to stress are critically dependent on gene expression. This volume highlights the role of gene expression in normal CNS function, and presents many research methods at the cutting edge of neuroscience, which will provide insight into therapeutic approaches through which the control of gene expression may be used in the treatment of many nervous system diseases.

Old Futures Alexis Lothian, 2018-09-25 Traverses the history of imagined futures from the 1890s to the 2010s, interweaving speculative visions of gender, race, and sexuality from literature, film, and digital media Old Futures explores the social, political, and cultural forces feminists, queer people, and people of color invoke when they dream up alternative futures as a way to imagine transforming the present. Lothian shows how queer possibilities emerge when we practice the art of speculation: of imagining things otherwise than they are and creating stories from that impulse. Queer theory offers creative ways to think about time, breaking with straight and narrow paths toward the future laid out for the reproductive family, the law-abiding citizen, and the believer in markets. Yet so far it has rarely considered the possibility that, instead of a queer present reshaping the ways we relate to past and future, the futures imagined in the past can lead us to queer the present. Narratives of possible futures provide frameworks through which we understand our present, but the discourse of “the” future has never been a singular one. Imagined futures have

often been central to the creation and maintenance of imperial domination and technological modernity; *Old Futures* offers a counterhistory of works that have sought—with varying degrees of success—to speculate otherwise. Examining speculative texts from the 1890s to the 2010s, from Samuel R. Delany to *Sense8*, Lothian considers the ways in which early feminist utopias and dystopias, Afrofuturist fiction, and queer science fiction media have insisted that the future can and must deviate from dominant narratives of global annihilation or highly restrictive hopes for redemption. Each chapter chronicles some of the means by which the production and destruction of futures both real and imagined takes place: through eugenics, utopia, empire, fascism, dystopia, race, capitalism, femininity, masculinity, and many kinds of queerness, reproduction, and sex. Gathering stories of and by populations who have been marked as futureless or left out by dominant imaginaries, Lothian offers new insights into what we can learn from efforts to imaginatively redistribute the future.

Hong Kong's Watershed Gary Ka-wai

Cheung, 2009-10-01 *Hong Kong's Watershed: The 1967 Riots* is the first English book that provides an account and critical analysis of the disturbances based on declassified files from the British government and recollection by key players during the events. The interviews with the participants, including Jack Cater, Liang Shangyuan, George Walden, Tsang Tak-sing, Tsang Yok-sing, and Hong Kong government officials, left irreplaceable records of oral history on the political upheaval.

--The book analyses the causes and repercussions of the 1967 riots which are widely seen as a watershed of postwar history of Hong Kong. It depicts the prelude to the 1967 riots, including the Star Ferry riots in 1966, the leftist-instigated riots in Macau in 1966, and the major events leading to the disturbances, including the labour dispute at a plastic flower factory, the border conflict in Sha Tau Kok, bomb attacks and arson attacks on the office of British charge d'affaires in Beijing. --Gary Ka-wai Cheung has been a journalist since 1991. He worked as a reporter at Sing Tao Daily, Overseas Chinese Daily, Yazhou Zhoukan and South China Morning Post, covering fields ranging from politics, education and integration between Hong Kong and the mainland. He is currently an associate news editor at the South China Morning Post. --

A Modern History of Hong Kong Steve Yui-Sang Tsang, 2011

A Modern History of Hong Kong Steve

Tsang, 2007-07-30 This major history of Hong Kong tells the remarkable story of how a cluster of

remote fishing villages grew into an icon of capitalism. The story began in 1842 with the founding of the Crown Colony after the First Anglo-Chinese war - the original 'Opium War'. As premier power in Europe and an expansionist empire, Britain first created in Hong Kong a major naval station and the principal base to open the Celestial Chinese Empire to trade. Working in parallel with the locals, the British built it up to become a focus for investment in the region and an international centre with global shipping, banking and financial interests. Yet by far the most momentous change in the history of this prosperous, capitalist colony was its return in 1997 to 'Mother China', the most powerful Communist state in the world.
