*Enterprise Guide to Gaining Business Value from Mobile Technologies* Adam Kornak,Jorn Teutloff,Michael Welin-Berger,2004-04-14 This is the first book to deliver specific guidelines for integrating mobile and wireless technologies into a business organization to enhance business processes, reduce operating expenses, or produce additional revenue streams Builds off the material from Cap Gemini Ernst & Young Guide to Wireless Enterprise Application Architecture (0-471-20951-1), which described how to build a wireless enterprise application architecture for optimum performance Presents a proprietary, step-by-step methodology that shows how to identify opportunities to integrate mobile technologies into an organization Describes the strategic framework and development approach used by experienced project teams for building a mobile technology solution Features extensive real case studies from Microsoft and Cap Gemini Ernst & Young's extensive business portfolio

**Gendered Power and Mobile Technology** Caroline Wamala Larsson,Laura Stark,2019-05-31 Mobile phones are widely viewed as the information and communication technology that holds the most promise for bridging global digital divides. Gendered Power and Mobile Technology uses empirical research to focus on changing intersections between technology, gender and other categories of social and cultural power difference (such as age, race, class, and ethnicity) in the use of mobile communication technologies. Asking how these intersections can inform development discourse, practice, and research, this volume seeks to rectify the lack of attention to the Global South, calling for more sensitivity to the contexts and consequences of mobile phone use. Indeed, drawing on case studies from Ecuador, Ghana, Kenya, Mexico, Peru, Tanzania, and Uganda, this book engages with the intersectionality paradigm to tease out the complexities of using mobile technologies for development purposes. Gendered Power and Mobile Technology will appeal to students and researchers interested in fields such as media studies, development studies, gender and technology, feminist technoscience, anthropology, and sociology.

**Managing IoT and Mobile Technologies with Innovation, Trust, and Sustainable Computing** Kris M. Y. Law,Andrew W.H. Ip,Brij B. Gupta,Shuang Geng,2021-05-04 Focused on the latest mobile technologies, this book addresses specific features (such as IoT) and their adoptions that aim to enable excellence in business in Industry 4.0. Furthermore, this book explores how the adoption of these technologies is related to rising concerns about privacy and trusted communication issues that concern management and leaders of business organizations. Managing IoT and Mobile Technologies with Innovation, Trust, and Sustainable Computing not only targets IT experts and drills down on the technical issues but also provides readers from various groups with a well-linked concept about how the latest trends of mobile technologies are closely related to daily living and the workplace at managerial and even individual levels.

Managing Mobile Technologies: An Analysis From Multiple Perspectives Daim Tugrul U,Brem Alexander,2019-04-08 This book captures recent research on managing mobile technologies. It provides a handbook-style reference to professionals in different industries to help them manage the very latest technologies that have become a part of every business today.The book reviews multiple perspectives of the challenges brought by the introduction of mobile technologies into our lives. The technical perspective covers major constructs at play; the organizational perspective reviews international cases; and the personal perspective investigates the adoption of emerging applications and their impact.By reviewing multiple perspectives, readers will be able to adopt a tool to manage the complexities and challenges brought by the mobile technologies.

*Understanding 5G Mobile Networks* Peter Curwen,Jason Whalley,2021-03-08 Understanding 5G Mobile Networks: A Multidisciplinary Primer offers the first manageable overview of 5G for a non-technical audience, and specifically a broad, multidisciplinary survey of the spectrum and the licensing and launch of 5G networks throughout the world, distinguishing standalone 5G from non-standalone 5G.

**Mobile Strategy** Dirk Nicol,2013-04-24 Navigate the Mobile Landscape with Confidence and Create a Mobile Strategy That Wins in the Market Place Mobile Strategy gives IT leaders the ability to transform their business by offering all the guidance they need to navigate this complex landscape, leverage its opportunities, and protect their investments along the way. IBM's Dirk Nicol clearly explains key trends and issues across the entire mobile project lifecycle. He offers insights critical to evaluating mobile technologies, supporting BYOD, and integrating mobile, cloud, social, and big data. Throughout, you'll find proven best practices based on real-world case studies from his extensive experience with IBM's enterprise customers. Coverage includes • Understanding the profound implications and challenges of consumerized IT in the mobile space • Uncovering powerful new opportunities to drive value from mobile technology • Transforming "systems of record" to "systems of engagement" that fully reflect context and intelligence • Identifying proven patterns for delivering common mobile capabilities in operations, commerce, collaboration, and marketing • Managing security threats related to lost/stolen devices, insecure Wi-Fi, and built-in cameras • Choosing mobile data protection, security, and management options: wrappers, containers, virtualization, mobile Software Development Kits (SDKs), virtual private networks (VPNs), Mobile Device Management (MDM), Mobile Application Management (MAM), and anti-malware • Handling the "app store" distribution model and managing updates • Using mobile middleware to support multiple platforms and back-end connectivity with less complexity • Building and integrating high-quality mobile apps—and getting useful customer feedback to improve them • Addressing international considerations and emerging markets • Mastering methodologies for successfully and

rapidly executing mobile projects • Converging mobile, cloud, social, and big data into a single high-value IT delivery platform

*Transgenerational Technology and Interactions for the 21st Century* Hannah R. Marston, Linda Shore, Laura Stoops, Robbie S. Turner, 2022-10-25

This book is rooted in co-design and co-production, taking an interdisciplinary lens and expertise from academia, industry, and stakeholder organisations to examine contemporary issues and to deliver a manifesto for technology innovation, application, and transgenerational living experiences for the 21st century.

**Mobile Communication** James E. Katz, 2017-07-28 In the few short decades since their commercial deployment, 5 billion people—about three-quarters of all humanity, including children—have become mobile phone users. No technology has even approached the mobile phone's wildfire success. Effects of this success are apparent everywhere, ranging from accident scenes and earthquake rescue efforts to demeanor in the classroom and at dinner tables. No one interested in the next generation of issues provoked by the mobile communication revolution will want to miss this important new collection of essays. The mobile phone has given near-transcendent power to ordinary people. All aspects of social life have been touched by mobile technology. An ever-growing host of tracking, immersion, gaming, and commercial applications are becoming available. The community of mobile communication scholars has blossomed from a handful of pioneers a decade ago to a large and dynamic intellectual community that spans the globe. Area researchers have gained much insight into cultural, symbolic, and social interaction aspects of mobile communication as well as its relevance to commerce. To address the social policy dimension of the mobile communication revolution, this volume presents analyses by leading thinkers in the field. The volume offers novel and keen insights into the topic. Subjects include the role of mobiles in policy formation and evaluation in several areas including the mobile-digital divide and political campaigns. Also explored are processes and policy implications of mobiles in creating or alleviating social problems including social isolation and family dispersion. Other chapters analyze social policies for mobile devices, including attempts to regulate the use of the technology and to understand and moderate its potential harm to human health. The contributors' scope ranges across five continents and they address concerns at local, national, and international levels.

**World Bank East Asia and Pacific Economic Update, October 2023** World Bank, 2023-10 Economic activity in much of developing East Asia and Pacific (EAP), other than several Pacific Island Countries, has recovered from the succession of shocks since 2020 but is now slowing down. Private consumption and the recovery of tourism had sustained growth in the region but is running out of steam. Slowing global growth is leading to a contraction in exports. Public investment and private investment also remain low in much of the region. Most governments in the region are projected to consolidate fiscally in 2023. The revival of growth in the region will depend crucially on the state of the services sectors. Even though manufacturing has powered EAP development, services already account for more than half of value added and employment. A digital revolution is leading to structural change within all services sectors, with the combination of new domestic platform-based services and more internationally tradable services boosting productivity. Harnessing the digital revolution for inclusive economic growth requires deeper services reforms.

Everyday Technologies in Healthcare Christopher M. Hayre, Dave Muller, Marcia Scherer, 2019-08-23 This book examines the role of everyday technology throughout the life cycle in order to demonstrate the wide acceptance and impact of everyday technology and how it is facilitating both practitioners and patients in contemporary practices. In response, then, this text speaks to a number of audiences. Students writing for undergraduate and postgraduate dissertations/proposals will find the array of works insightful, supported with a vast number of references signposting to key texts. For academics, practitioners and prospective researchers this text offers key empirical and methodological insight that can help focus and uncover originality in their own field. We anticipate that readers will find the collection of empirical examples useful for informing their own work, but also, it attempts to ignite new discussions and arguments regarding the application and use of everyday technology for enhancing health internationally. Explores the multifaceted use and application of each 'everyday technology' that impact on diagnosis, treatment and management of individuals. Examines an array of everyday technologies and how these that can either enhance and/or hinder patient/service user outcomes i.e. handheld devices, computer workstations, gamification and artificial intelligence. Discusses technologies that are intended to facilitate patient diagnosis, practitioner-patient relations, within an array of health contexts. Provides readers with an overview with future direction of everyday technologies and its limitations.

Moving Places Nataša Gregorić Bon, Jaka Repi, 2016-09-01 Moving Places draws together contributions from Europe, Latin America, Asia, and Africa, exploring practices and experiences of movement, non-movement, and place-making. The book centers on "moving places": places with locations that are not fixed but relative. Locations appearing to be reasonably stable, such as home and homeland, are in fact always subject to practices, imaginaries, and politics of movement. Bringing together original ethnographic contributions with a clear theoretical focus, this volume spans the fields of anthropology, human geography, migration, and border studies, and serves as teaching material in related programs.

*Momentous Mobilities* Noel B. Salazar, 2018-07-20 Grounded in scholarly analysis and personal reflection, and drawing on a multi-sited and multi-method research design, *Momentous Mobilities* disentangles the meanings attached to temporary travels and stays abroad and offers empirical evidence as well as novel theoretical arguments to develop an anthropology of mobility. Both focusing specifically on how various societies and cultures imagine

and value boundary-crossing mobilities “elsewhere” and drawing heavily on his own European lifeworld, the author examines momentous travels abroad in the context of education, work, and spiritual quests and the search for a better quality of life.

The Routledge Companion to Media and Class Erika Polson,Lynn Schofield Clark,Radhika Gajjala,2019-11-27 This companion brings together scholars working at the intersection of media and class, with a focus on how understandings of class are changing in contemporary global media contexts. From the memes of and about working-class supporters of billionaire populists, to well-publicized and critiqued philanthropic efforts to bring communication technologies into developing country contexts, to the behind-the-scenes work of migrant tech workers, class is undergoing change both in and through media. Diverse and thoughtfully curated contributions unpack how media industries, digital technologies, everyday media practices—and media studies itself—feed into and comment upon broader, interdisciplinary discussions. They cover a wide range of topics, such as economic inequality, workplace stratification, the sharing economy, democracy and journalism, globalization, and mobility/migration. Outward-looking, intersectional, and highly contemporary, *The Routledge Companion to Media and Class* is a must-read for students and researchers interested in the intersections between media, class, sociology, technology, and a changing world.

*Distance Learning Technology, Current Instruction, and the Future of Education: Applications of Today, Practices of Tomorrow* Song, Holim,2009-12-31 Distance Learning Technology, Current Instruction, and the Future of Education: Applications of Today, Practices of Tomorrow provides present and prospective directions of online education from various research fields, reporting on discussions from students, faculty members, researchers, and practitioners.

**A Village Goes Mobile** Sirpa Tenhunen,2018 This book examines how mobile telephony contributes to social change in rural India on the basis of ethnographic fieldwork. The book investigates how the use of mobile phones has influenced economic, political and social relationships including gender relationships, and how these new social constellations relate to culture and development --

*Plunkett's Wireless, Wi-Fi, Rfid & Cellular Industry Almanac 2007: Wireless, Wi-Fi, Rfid & Cellular Industry Market Research, Statistics, Trends & Lea* Jack W. Plunkett,2006-07 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11

standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2007 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our company profiles, nearly 350, include complete business descriptions and up to 27 executives by name and title.

Cyber Defence in the Age of AI, Smart Societies and Augmented Humanity Hamid Jahankhani, Stefan Kendzierskyj, Nishan Chelvachandran, Jaime Ibarra, 2020-04-06 This publication highlights the fast-moving technological advancement and infiltration of Artificial Intelligence into society. Concepts of evolution of society through interconnectivity are explored, together with how the fusion of human and technological interaction leading to Augmented Humanity is fast becoming more than just an endemic phase, but a cultural phase shift to digital societies. It aims to balance both the positive progressive outlooks such developments bring with potential issues that may stem from innovation of this kind, such as the invasive procedures of bio hacking or ethical connotations concerning the usage of digital twins. This publication will also give the reader a good level of understanding on fundamental cyber defence principles, interactions with Critical National Infrastructure (CNI) and the Command, Control, Communications and Intelligence (C3I) decision-making framework. A detailed view of the cyber-attack landscape will be garnered; touching on the tactics, techniques and procedures used, red and blue teaming initiatives, cyber resilience and the protection of larger scale systems. The integration of AI, smart societies, the human-centric approach and Augmented Humanity is discernible in the exponential growth, collection and use of [big] data; concepts woven throughout the diversity of topics covered in this publication; which also discusses the privacy and transparency of data ownership, and the potential dangers of exploitation through social media. As humans are become ever more interconnected, with the prolificacy of smart wearable devices and wearable body area networks, the availability of and abundance of user data and metadata derived from individuals has grown exponentially. The notion of data ownership, privacy and situational awareness are now at the forefront in this new age.
