### **Sport and Polish Society in the Communist Era** Marta

Kurkowska-Budzan, Marcin Stasiak, 2023-12-21 Using the history of sport in the small towns and local communities of Poland, this book shines new light on the everyday reality of life under a communist regime in Eastern Europe in the 20th Century. The book shows how socio-cultural history – ‘history from below’ – that draws on rich sources including oral testimony, personal archives, and literary and visual material, can provide the missing piece in our understanding of a significant time and place in the contemporary history of Europe. Focusing on the period between 1945 and 1989, the book shows how sport was an important element of state politics and propaganda but looks closely at the local level – at the spaces and material culture of sport – to reveal the extent to which sport had penetrated the daily culture of rural and small-town life in Poland. The stories of football players, local clubs, small sports arenas, and cyclists who crossed geographical and culture boundaries, all add new depth to the history of contemporary Poland, and by examining the history of local sport organisations the book also reveals important differences between official state ideology, the provincial party apparatus, and the lives of ordinary people. This is fascinating reading for anybody with an interest in the history of sport, socio-cultural history, European history, the history of the 20th Century, or historical methods.

**Supporting Teachers: Improving Instruction** Tomáš

Janík, Inger Marie Dalehefte, Stefan Zehetmeier, 2019 In the last decades, progress in the field of pre-service and in-service teacher education has been evident. Despite the developments of curriculum programs, models and designs, various challenges are shaping the field. Models of teacher education are usually presented as 'research-based', but related research is often invisible or fragmented. The 'support for teachers' and the 'improvement of instruction' are only loosely coupled and their interdependence is not highlighted. These challenges were the impetus to initiate this publication. Individual approaches, models or designs of pre-service and in-service teacher education developed by the authors (action research, video clubs, lesson studies, and others) are introduced and their impact and shortcomings for further development are specified. In the concluding chapter, a reflective discussion across individual approaches to reveal particular issues that are shaping the field is provided. Practitioners as well as researchers in the field of teacher education can benefit from this book.

**Linguistic Bibliography for the Year 2000 / Bibliographie**

**Linguistique de l'Année 2000** Sijmen Tol, Hella Olbertz, Mark Janse, 2004-12-10 Bibliographie Linguistique/ Linguistic Bibliography is the annual bibliography of linguistics published by the Permanent International Committee of Linguists under the auspices of the International Council of Philosophy and Humanistic Studies of UNESCO. With a tradition of more than fifty years (the first two volumes, covering the years 1939-1947, were published in 1949-1950), Bibliographie Linguistique is by far the most comprehensive bibliography in the field. It covers all branches of linguistics, both theoretical and descriptive, from all geographical areas, including less known and extinct languages, with particular attention to the many endangered languages of the world. Up-to-date information is guaranteed by the collaboration of some forty contributing specialists from all over the world. With over 20,000 titles arranged according to a detailed state-of-the-art classification, Bibliographie Linguistique remains the standard reference book for every scholar of language and linguistics.

**Political Trials in Poland 1981-1986** Andrzej Swidlicki, 2024-04-01 First published in 1988, Political Trials in Poland 1981-1986 describes the major political trials which took place in Poland between 1981 and 1986. Based on extensive original research using both official and unofficial information from Poland and interviews with Solidarity activists, it shows how the trials constituted an attempt by the Jaruzelski regime to break the back of the independent Solidarity movement by judicial and penal measures. It discusses how the authorities abused the law and how the law itself leaves much to be desired and it charts the different human rights that were violated in each case. It considers the implications of the abuse of law in this way for the rule of law

and the image of the state in communist countries. This book will be of interest to students of history and political science.
