Finfish Aquaculture Diversification Nathalie R. Le François,Malcolm Jobling,Chris Carter,2010

There is considerable global interest in the culture of finfish species both for cold and warm water aquaculture development and growth. Essential information on the biology, domestication and aquacultural characteristics of a wide selection of novel and established species is provided in the form of technical sheets, species descriptions and information on current rearing practices, making this a must-have reference in the field of aquacultural science. The book also offers a basic framework in order to support investment strategies for research and development efforts aimed at the emergence of a profitable finfish aquaculture industry and presents a rationale for species diversification, different approaches to species selection and basic economic and market considerations governing the launch of strategic development and commercialization efforts.

Society and Individual in Renaissance Florence William J. Connell,2002-09-10 Renaissance

Florence has often been described as the birthplace of modern individualism, as reflected in the individual genius of its great artists, scholars, and statesmen. The historical research of recent decades has instead shown that Florentines during the Renaissance remained enmeshed in relationships of family, neighborhood, guild, patronage, and religion that, from a twenty-first-century perspective, greatly limited the scope of individual thought and action. The sixteen essays in this volume expand the groundbreaking work of Gene Brucker, the historian in recent decades who has been most responsible for the discovery and exploration of these pre-modern qualities of the Florentine Renaissance. Exploring new approaches to the social world of Florentines during this fascinating era, the essays are arranged in three groups. The first deals with the exceptionally resilient and homogenous Florentine merchant elite, the true protagonist of much of Florentine history. The second considers Florentine religion and Florence's turbulent relations with the Church. The last group of essays looks at criminals, expatriates, and other outsiders to Florentine society.

Andrea Del Castagno and His Patrons John Richard Spencer,1991 Most studies of Renaissance patronage in the arts deal with a particular patron and the artists who worked for him. John R. Spencer reverses this approach by focusing on one fifteenth-century Florentine artist, Andrea del Castagno, and his patrons. Combining social and art history, Spencer casts new light on both the career of Castagno and on the nature of art patronage in the early Renaissance. Through careful and detailed archival research, Spencer creates a fascinating portrait of Castagno's patronage as a web, at the center of which was Cosimo de' Medici, who constituted the focal point of a network of business partnerships, real estate transactions, loans, and special privileges in which the artist's patrons were enmeshed. The author constructs partial biographies of unknown and lesser-known patrons to show the relation of these patrons to each other and to the artist, demonstrating the degree to which artistic production in Renaissance Italy was tied to politics and economics. Spencer discusses each of Castagno's extant and some of his lost paintings, dating the works with greater accuracy than ever before. His understanding of the patrons and of the motivations behind the commissions makes it possible for Spencer to bring new interpretations to many of these works. This book offers a deeper understanding of a particular artist's life and work while also exploring the larger question of the unique relationship between private patrons and independent artists in the Italian Renaissance.

Lorenzo De' Medici, the Magnificent Alfred von Reumont,1876

The Lives of the Most Excellent Painters, Sculptors, and Architects Giorgio Vasari,2007-12-18 A painter and architect in his own right, Giorgio Vasari (1511-74) achieved immortality for this book on the lives of his fellow Renaissance artists, first published in Florence in 1550. Although he based his work on a long tradition of biographical writing, Vasari infused these literary portraits with a decidedly modern form of critical judgment. The result is a work that remains to this day the cornerstone of art historical scholarship. Spanning the period from the thirteenth century to Vasari's own time, the *Lives* opens a window on the greatest personalities of the period, including Giotto, Brunelleschi, Mantegna, Leonardo, Raphael, Michelangelo, and Titian. This Modern Library edition, abridged from the original text with notes drawn from earlier commentaries, as well as current research, reminds us why The

Lives of the Most Excellent Painters, Sculptors, and Architects is indispensable to any student interested in Renaissance art.

The History of Florence Under the Domination of Cosimo, Piero, Lorenzo De' Médicis, 1434-1492 François-Tommy Perrens, 1892

The Life and Legacy of Lorenzo de' Medici Alfred von Reumont, 2021-05-07 Lorenzo de' Medici, the Magnificent is a two-part biography on the life and achievements of Lorenzo de' Medici (1449-1492), an Italian administrator, leader of the Florentine Republic and one of the most influential benefactors of Renaissance culture in Italy. Also known as Lorenzo the Magnificent, he is recognized for his patronage of artists such as Botticelli and Michelangelo. His life spanned concurrently with the stable part of the Italian Renaissance and the Golden Age of Florence.

Chemistry Education Javier García-Martínez, Elena Serrano-Torregrosa, 2015-02-17 Winner of the CHOICE Outstanding Academic Title 2017 Award This comprehensive collection of top-level contributions provides a thorough review of the vibrant field of chemistry education. Highly-experienced chemistry professors and education experts cover the latest developments in chemistry learning and teaching, as well as the pivotal role of chemistry for shaping a more sustainable future. Adopting a practice-oriented approach, the current challenges and opportunities posed by chemistry education are critically discussed, highlighting the pitfalls that can occur in teaching chemistry and how to circumvent them. The main topics discussed include best practices, project-based education, blended learning and the role of technology, including e-learning, and science visualization. Hands-on recommendations on how to optimally implement innovative strategies of teaching chemistry at university and high-school levels make this book an essential resource for anybody interested in either teaching or learning chemistry more effectively, from experience chemistry professors to secondary school teachers, from educators with no formal training in didactics to frustrated chemistry students.

Lorenzo de' Medici, the Magnificent Alfred von Reumont, 2023-11-16 Lorenzo de' Medici, the Magnificent is a two-part biography on the life and achievements of Lorenzo de' Medici (1449-1492), an Italian administrator, leader of the Florentine Republic and one of the most influential benefactors of Renaissance culture in Italy. Stem Cells in Marine Organisms Baruch Rinkevich, Valeria Matranga, 2009-10-03 Do real stem cells and stem cell lineages exist in lower organisms? Can stem cells from one organism parasitize the soma and/or the germ line of conspecifics? Can differentiated cells in marine organisms be re-programmed to regenerate tissues, organs and appendages through novel de-differentiation, transdifferentiation, or re-differentiation processes, leading to virtually all three germ layers, including the germline? The positive answers to above questions open a new avenue in stem cell research: the biology of stem cells in marine organisms. It is therefore unfortunate that while the literature on stem cell from terrestrial organisms is rich and expanding at an exponential rate, investigations on marine organisms' stem cells are very limited and scarce. By presenting theoretical chapters, overview essays and specific research results, this book summarises the knowledge and the hypotheses on

stem cells in marine organisms through major phyla and specific model organisms. The study on stem cells from marine invertebrates may shed lights on mechanisms promoting immunity, developmental biology, regeneration and budding processes in marine invertebrates, body maintenance, aging and senescence. It aims in encouraging a larger scientific community to follow and study the novel phenomena of stem cells behaviours as depicted from the few currently studied marine invertebrates.
