Transnational Research in English Language Teaching Rashi Jain,Bedrettin Yazan,Suresh Canagarajah,2022-07-15 This edited volume contributes to the creation of a comprehensive and a more inclusive understanding of an increasingly complex global ELT landscape across countries as well as across teaching and learning settings. The volume brings together inquiries from language teachers, educators and researchers from different backgrounds in the Global South and the Global North, who use their experiences of shuttling across borders to reflect on the shaping of their pedagogical, research and professional practices across higher education settings. The chapters weave the personal, professional and theoretical in a seamless manner, examining transnational identities and pedagogical practices formed and informed by both communities – ‘home’ and ‘host’ – and include narratives that are not unidirectional. The contributing authors also use a variety of qualitative research methods, along with reflexive writing and exploration of the authors’ own positionalities, to shed light on transnational identities and critique dominant pedagogical assumptions.

Advanced Everyday English Steven Collins,2011 Advanced Everyday English is designed in very much the same mode as the first book (Practical Everyday English with audio CD) in that all of the examples will contain vocabulary and expressions you have studied on earlier pages. You will also find many words from the first book, which will give you an opportunity to revise the material. In this second book there is more of what one might call serious vocabulary, but there are plenty of phrasal verbs and idioms as well. The book will be of particular benefit to those readers with an advanced level of English who wish to become (or who already are) interpreters, translators or teachers of English, or who simply want to be able to speak and understand English at a very high level. In addition, people who need to read English language journals or converse in English on a daily basis, either in business or for pleasure, will find it very useful.--Publisher's description.

The Words of the Day Steven Cerutti,2006 With uncanny scholarship and uniquely wry wit, this book is a must-read for anyone who has ever wondered about common word usage. Through exploring the classical roots of the English language, readers learn the origins of numerous words, many of which can be definitively tracked back to their first use. Readers also learn that many offensive words (pornographywas an ancient word for menu andfornicationwas actually an architectural term) have innocuous and humble Greek and Roman beginnings. Designed to be instructional and filled with concise information and plenty of examples, this reference will be enjoyed by anyone with an interest in learning more about the words they speak.

Paratexts of the English Bible, 1525-1611 Debora Shuger,2022-04-21 English bibles, from Tyndale's 1525 New Testament to the 1611 King James, feature calendars, woodcuts, maps, chronologies, prayers, philological glosses, inset historical essays, elaborate multi-page diagrams, single-leaf summaries of scripture, prefaces by eminent churchmen, doctrinal notes by leading theologians, a dialogue on predestination, a twelfth-century genealogy of Christ, a ninth-century Jewish chronicle--most widely available, given the hundreds of editions printed between those dates. This book explores this archive, but it also tracks its changes, because while biblical translations remain relatively stable over time, the paratexts cocooning a bible's first printing sometimes mutate or vanish in succeeding editions--and indeed sometimes they migrate to a competing bible. These paratexts, together with their revelatory print histories, disclose a picture of the English Reformation that differs in striking ways from the authorized version.

Lexicon of Pulse Crops Aleksandar Mikić,2018-06-27 Lexicon of Pulse Crops integrates botanical and linguistic data to analyze and interpret the grain legume significance from the earliest archaeological and written records until the present day. Aimed at both agronomic and linguistic research communities, this book presents a database containing 9,500 common names in more than 900 languages and dialects of all ethnolinguistic families, denoting more than 1,100 botanical taxa of 14 selected pulse crop genera and species. The book begins with overviews of the world’s economically most important grain legume crops and their uncultivated relatives, as well as the world’s language families with their inner structure, including both extinct and living members. The main section of the text presents 14 specialized book chapters covering Arachis, Cajanus, Cicer, Ervum, Faba, Glycine, Lablab, Lathyrus, Lens, Lupinus, Phaseolus, Pisum, Vicia, and Vigna. They provide the reader with extensive lists of the botanically accepted species and subtaxa and surveys lexicological abundance in all world’s ethnolinguistic families, comprising extinct and living as well as natural and constructed languages, while the vernacular names for the most significant taxa are presented in comprehensive tables. Each of these chapters also presents the existing etymologies and novel approaches to deciphering the origins of common names, accompanied by one original color plate depicting possible root evolutions in the form of corresponding pulse crop plants.

Introduction to Early Childhood Education and Care Carole Massing,Mary Lynne Matheson,2021-07-26 Ensure children of all backgrounds can thrive with an intercultural approach to early childhood education In a multicultural society such as Canada’s, early childhood educators work with children and families from a diverse mix of ethnicities, religions, languages, abilities, and lifestyles. Diversity enriches the experience of children and educators alike in these environments, but it can also present challenges in supporting each child’s growth and learning. In Introduction to Early Childhood Learning and Care, early learning specialists Carole Massing and Mary Lynne Matheson present an intercultural perspective as a foundation of equitable outcomes in early childhood education, but just what does that look like? An intercultural approach involves the respectful exchange of ideas between people from diverse backgrounds, leading to mutual trust and deeper relationships. Guided by a diverse team of reviewers, this book examines the concepts, approaches, and strategies that every early childhood educator needs to know to provide sensitive, culturally responsive care for children and their families. Topics include: - The theoretical bases for an intercultural approach to early childhood education and care - The factors that impact a child’s physical, cognitive, social, and emotional development - How to create environments that enhance children’s wellbeing and affirm their identity - How to support children’s creativity, literacy, and inquiry skills through an intercultural lens - The skills, responsibilities, and challenges of working as an early childhood educator

China Constructing Capitalism Michael Keith,Scott Lash,Jakob Arnoldi,Tyler Rooker,2013-09-23 China has been growing at over ten per cent annually since 1978, but this has only come to very widespread notice in the past decade. This received wisdom about China has been largely of two types, both of which – more or less – understand China in the context of neoliberalism. The more business- or business studies-oriented literature seems to argue that if China does not adapt the rule of clear and distinct property and contract law – in short, of Western institutions – its economy will stall. The second set of voices is more clearly from the left, arguing that the Chinese economy, and city, is neo-liberal. For them, China does not diverge widely from the Anglo-American model that, from 2008, has brought the world economy to its knees. China Constructing Capitalism takes issue with these analyses. The authors argue that it is not Western neo-liberalism that is constructing the Chinese economy, but instead that China is constructing its own version of capitalism. The two central theses of their argument are: economic life – neo-liberal economic life is individualized and disembedded, while the China model is relational and situated urban change – China has created a form of ‘local state capitalism’ which stands in contrast to neoliberal versions of the city. This book analyses China as a 'risk culture', examining among others Chinese firms and political ties, property development, migrant urbanisms and share trading rooms. It scrutinises the ever-present shadow of the risk-averse (yet uncertainty-creating) state. China Constructing Capitalism is a must-read for social scientists, policy makers and investors.
