The Politics of Dating Apps Lik Sam Chan,2021-03-09 An examination of dating app culture in China, across user demographics--straight women, straight men, queer women, and queer men. In this exploration of dating app culture in China, Lik Sam Chan argues that these popular mobile apps are not merely a platform for personal relationships but also an emerging arena for gender and queer politics. Chan examines the opportunities dating apps present for women's empowerment and men's performances of masculinity, and he links experiences of queer dating app users with their vulnerable position as sexual minorities. He finds that dating apps are both portals to an exciting virtual world of relational possibilities and sites of power dynamics that reflect the heteronormativity and patriarchy of Chinese society.

  Stars And Space With Matlab Apps (With Companion Media Pack) Daniel Green,2020-05-19 Recent advances in the understanding of star formation and evolution have been impressive and aspects of that knowledge are explored in this volume. The black hole stellar endpoints are studied and geodesic motion is explored. The emission of gravitational waves is featured due to their very recent experimental discovery.The second aspect of the text is space exploration which began 62 years ago with the Sputnik Earth satellite followed by the landing on the Moon just 50 years ago. Since then Mars has been explored remotely as well as flybys of the outer planets and probes which have escaped the solar system. The text explores many aspects of rocket travel. Finally possibilities for interstellar travel are discussed.All these topics are treated in a unified way using the Matlab App to combine text, figures, formulae and numeric input and output. In this way the reader may vary parameters and see the results in real time. That experience aids in building up an intuitive feel for the many specific problems given in this text.

  Love, Intimacy and Online Dating Lisa Portolan,2022-12-02 Love, Intimacy and Online Dating: How a Global Pandemic Redefined Romantic Relationships is an innovative work that explores the concept of intimacy during the COVID-19 pandemic. The book provides an overview of the online dating world and apps, the use of which gradually became common as the pandemic restricted people's interaction in the physical world. The author's extensive research conducted during the pandemic posits a comprehensive understanding of the individual's motivation to join a dating app and explores its varied aspects. This thoroughly researched book explores the themes and elements of online dating and examines the users' motivation for joining a dating app, for seeking intimacy as well as for self-presentation on the app. Portolan examines the underlying politics and role of infrastructure of dating apps and describes how gender, power, and intimacy intersect to create new intimacy phenomena. She also utilises her research to put forth the key concept of Jagged Love, which describes a user's cyclical relationship with dating apps during the pandemic, and the gap between a user's act to seek familiar romantic narratives and the app's inability to deliver against these ideas. The chapters further explore the differences between virtual and In Real Life (IRL) intimacy, the generation of gender and the emanation of stereotypical cultural ideals that the users sought through the apps. The book serves as an invaluable discussion on the pandemic's impact on modifying the definitions of romance and intimacy. This book will be useful for highlighting the impact social factors can have on familiar concepts and the effects of the COVID-19 pandemic on the definition of love and intimacy, making it fascinating for students, academics and professionals interested in relationships, digital media and gender. It will also be useful in enhancing the comprehension of love and romance in the fields of social science.

  Tech, Sex and Health Jennifer Power,Andrea Waling,2024-07-05 This book presents recent sociological research investigating the intersection of technology, human sexuality, and health. Rapid advances within biomedical, biomechanical, and biodigital domains have prompted scholarly exploration into the ways these technologies are being integrated into, or are reshaping, human sexual and intimate practices and the resulting health implications. Scholarship has also focused on the potential for new technologies to extend the imagined, and real, possibilities for enhancing human sexual experiences. The chapters in this book delve into the interconnected themes of sex, health, bodies, and risk in relation to emerging technologies. They illuminate the intricate interplay between human bodies, sexual practices and technologies, spotlight how novel technologies and human practices collaboratively shape or remodel cultures of sex and intimacy, and critically interrogate the discourses of risk and pleasure that frame our understanding of technology and sex. Researchers within the fields of sociology, technology studies, human sexuality, and health, as well as educators and professionals seeking a comprehensive understanding of how people engage with technologies in their intimate relationships and sex lives, will find this collection engaging and informative. Additionally, individuals interested in the cultural, societal, and ethical implications of emerging technologies in relation to sexual experiences and health will also benefit from the insights presented in this volume. The chapters in this book were originally published in several journals, including Health Sociology Review, Journal of Gender Studies, and Information & Communications Technology Law.

  Social Perspectives on Trans Health Christy E. Newman,Anthony K J Smith,Elizabeth Duck-Chong,Son Vivienne,Cristyn Davies,Kerry H. Robinson,Peter Aggleton,2024-05-07 Transgender people are waiting to be seen in healthcare and waiting to be recognised as the legitimate experts on their own lives and needs. This book foregrounds empirically novel and conceptually groundbreaking sociological analyses of trans health care and experiences. It draws together sociological contributions focused on the lives and perspectives of trans people to provide a vision of more equitable and affirming health and social care. in the Global South by Professor Emerita Raewyn Connell, this book demonstrates the urgent need for radical sociopolitical transformation, grounded in a recognition of trans people as authorities in and on their own lives. Miss Man? Languaging Gendered Bodies Giuseppe Balirano,2019-01-22 This volume draws together contributions containing original research on a number of linguistic and semiotic understandings of gender in the context of current debates about gender non-conforming people and diverse ways of 'doing' masculinities. It contests the constraints, stereotypes, and prejudices concerning gender nonconformity by sparking academic inquiry, possibly leading to social change. The book explores various gender non-conforming tropes as they apply either to same-sex related desires, identities, and practices or to other dimensions of gender non-normative experiences, such as weak or socially-perceived as unacceptable representations of manliness. The volume demonstrates that language matters in the everyday experience of gender diversity beyond traditional gender binarism. By modelling some of the approaches that are now being explored in linguistic and gender studies and by addressing language use over a range of diamesic, diastratic and diatopic contexts, all contributors here discuss cogent issues in language and gender.
