The Routledge Companion to Social Media and Politics Axel Bruns, Gunn Enli, Eli Skogerbo, Anders Olof Larsson, Christian Christensen, 2015-12-22 Social media are now widely used for political protests, campaigns, and communication in developed and developing nations, but available research has not yet paid sufficient attention to experiences beyond the US and UK. This collection tackles this imbalance head-on, compiling cutting-edge research across six continents to provide a comprehensive, global, up-to-date review of recent political uses of social media. Drawing together empirical analyses of the use of social media by political movements and in national and regional elections and referenda, The Routledge Companion to Social Media and Politics presents studies ranging from Anonymous and the Arab Spring to the Greek Aganaktismenoi, and from South Korean presidential elections to the Scottish independence referendum. The book is framed by a selection of keystone theoretical contributions, evaluating and updating existing frameworks for the social media age.

Spike your Brand ROI Adele R. Cehrs, 2015-01-26 Increase ROI through more effective brand marketing According to CMO.com, we are exposed to more than 5,000 brand messages each day. Marketers call this “creating engagement, and each comment, share, or re-tweet is supposed to be a win. But is this deluge of content really working to shift perception, change behavior, or sell products? The truth is, only 5% of people say that social media has a profound effect on their purchasing decisions. Moreover, only 2.7% of people are willing to stick their neck out on the line to recommend your brand via social media, a factor known as “social risk.” In SPIKE Your Brand ROI, public relations maven Adele Cehrs shares her strategy for effective engagement: it’s all about timing. This book will teach you how to recognize, anticipate, or even create a SPIKE – a Sudden Point of Interest that Kick-starts Exposure. This is your opportunity to reach people when they are primed to hear your message, and your brand is most relevant to their lives. Based on the author’s actual engagements with clients like Yum Brands, Lockheed Martin, DuPont, and more, this practical guide outlines a new, pragmatic approach that will enable you to: Learn to recognize brand patterns that are driven by audience interests and outside events Focus your energy, resources, and money when your brand is top-of-mind Decrease your marketing spend while increasing your bottom-line benefits Maximize benefits or mitigate damage by anticipating when your company, association, or nonprofit is going to be in the spotlight Retool traditional word-of-mouth initiatives for optimum results With Adele Cehrs’ proven methodology, you can turn a SPIKE into a strategic platform from which to improve results, build respect, and boost your ROI.

Waves in Neural Media Paul C. Bressloff, 2013-10-17 Waves in Neural Media: From Single Neurons to Neural Fields surveys mathematical models of traveling waves in the brain, ranging from intracellular waves in single neurons to waves of activity in large-scale brain networks. The work provides a pedagogical account of analytical methods for finding traveling wave solutions of the variety of nonlinear differential equations that arise in such models. These include regular and singular perturbation methods, weakly nonlinear analysis, Evans functions and wave stability, homogenization theory and averaging, and stochastic processes. Also covered in the text are exact methods of solution where applicable. Historically speaking, the propagation of action potentials has inspired new mathematics, particularly with regard to the PDE theory of waves in excitable media. More recently, continuum neural field models of large-scale brain networks have generated a new set of interesting mathematical questions with regard to the solution of nonlocal integro-differential equations. Advanced graduates, postdoctoral researchers and faculty working in mathematical biology, theoretical neuroscience, or applied nonlinear dynamics will find this book to be a valuable resource. The main prerequisites are an introductory graduate course on ordinary differential equations or partial differential equations, making this an accessible and unique contribution to the field of mathematical biology.

Media, Migrants and the Pandemic in India Bharat Bhushan, 2022-09-05 The national lockdown to contain the COVID-19 pandemic in India resulted in the loss of work and displacement of thousands of urban migrant workers. How Political Actors Use the Media Peter Van Aelst, Stefaan Walgrave, 2017-10-04 This book investigates how individual politicians and political parties strategically make use of the media to reach their political goals. Looking beyond a purely Americentric viewpoint, the chapters present data from more than ten Western democracies to argue that the media are both a source of information and an arena for political communication. This double functional role of the media is examined from both a theoretical and an empirical perspective, including chapters dealing with different aspects of politics - from campaigning to law making - and within different political contexts. The role of the news media is discussed from the perspective of the political actor, focusing on both the opportunities and the constraints the news media provide, resulting in a multidisciplinary text that will appeal to students and scholars of both communication and political science.

Principles of Heat Transfer in Porous Media M. Kaviany, 2012-12-06 Although the empirical treatment of fluid flow and heat transfer in porous media is over a century old, only in the last three decades has the transport in these heterogeneous systems been addressed in detail. So far, single-phase flows in porous media have been treated or at least formulated satisfactorily, while the subject of two-phase flow and the related heat-transfer in porous media is still in its infancy. This book identifies the principles of transport in porous media and compares the available predictions based on theoretical treatments of various transport mechanisms with the existing experimental results. The theoretical treatment is based on the volume-averaging of the momentum and energy equations with the closure conditions necessary for obtaining solutions. While emphasizing a basic understanding of heat transfer in porous media, this book does not ignore the need for predictive tools; whenever a rigorous theoretical treatment of a phenomena is not available, semi-empirical and empirical treatments are given.

Carbon Dioxide Sequestration in Geological Media Matthias Grobe, Jack C. Pashin, Rebecca L. Dodge, 2010-03-01 Over the past 20 years, the concept of storing or permanently storing carbon dioxide in geological media has gained increasing attention as part of the important technology option of carbon capture and storage within a portfolio of options aimed at reducing anthropogenic emissions of greenhouse gases to the earth's atmosphere. This book is structured into eight parts, and, among other topics, provides an overview of the current status and challenges of the science, regional assessment studies of carbon dioxide geological sequestration potential, and a discussion of the economics and regulatory aspects of carbon dioxide sequestration.

Arteriosclerosis; Diseases of the Media and Their Relation to Aneurysm Oskar Klotz, 1911

Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics—the multidimensionality, immateriality, and non-locality of the unified field of energy and information—as a virtual reality. As a result, a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. *Exploring the Collective Unconscious in a Digital Age* investigates the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape. This book presents the idea that if the digital media-sphere proves to be structurally and functionally analogous to a dreamscape, the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science. This pivotal research-based publication is ideally designed for use by psychologists, theorists, researchers, and graduate-level students studying human cognition and the influence of the digital media revolution.

A Critique of Recent Media Portrayal of Women Offenders and the Rise in Female Crime Peggy A. Toolis, 1979

Food Politics Robert Paarlberg, 2023 Covering the many important changes in food markets and food politics that have shaped both global and local farming and eating over the past decade, this compact and authoritative primer lays out everything you need to know to understand today's global food landscape. The politics of food is changing fast. In rich countries, obesity is now a more serious problem than hunger. Consumers once

satisfied with cheap and convenient food now want food that is also safe, nutritious, fresh, and grown by local farmers using fewer chemicals. Heavily subsidized and underregulated commercial farmers are facing stronger push back from environmentalists and consumer activists, and food companies are under the microscope. Where does power lie in this increasingly complex global food system? Moreover, what is the future of food politics, both in the United States and beyond? The third edition of *Food Politics: What Everyone Needs to Know®* has been thoroughly updated to reflect the latest developments and research on today's global food landscape, including the realities of food markets, farm production methods, food manufacturing, and dietary health challenges. New material covers the rise of China in world food markets and global food politics, the unabated and increasing risks to farming from climate change, the impact COVID-19 had on incomes and hunger, the equally shocking impact from the war in Ukraine on food prices and trade, and surprising scientific and technical breakthroughs such as the genome editing of crops (CRISPR) and the marketing of cell-cultured (animal-free) meats. As well, each chapter has been updated with new data on population growth, hunger and food security, trade conflicts, humanitarian aid, carbon farming, regenerative agriculture, holistic grazing, animal welfare, genetically engineered food, and more. Discussing the politics and policies that continue to shape our contemporary food system, Robert Paarlberg challenges myths and critiques more than a few of today's fashionable beliefs about farming and food. For those ready to have their thinking about food politics informed, but also challenged, this is the book to read.
