Lost in Reverie Sudeep Kr. Banerjee,2016-06-29 Sudeep started composing poetry in the year 1995 during his early college days. He was primarily stirred by his surroundings involving people, nature, society at large, humanity and sometimes the absence of it. The poems are a reflection of life itself & the events so mundane that we often miss unknowingly or intentionally choose to ignore. The collection includes a combination of narrative and descriptive poems in a quatrain format. These poetic pieces articulate deep emotions which are truly felt. Not to mention that the poems also have the element of rhyme in them. His constant struggle since childhood, to remain afloat amidst chaotic surroundings, often made him ponder. It is in those grim moments he philosophized about transient human life and the ephemeral nature of love. However, his cheerful, optimistic nature, his close friends and his die hard attitude to celebrate life, despite turbulent times helped him thrive. Most of the poems distinctly resonate with poets gypsy heart, exceptionally fond of changes, travel and adventure. Even a humble black beetle acts as a catalyst to spur his sensitive, philosophical and poetic disposition. His poem - Yet another day reflects his ardent desire to break the shackles of corporate drudgery and escape into the lap of nature. Some of his poems are infused with streaks of supernatural, intrigue, mystery, suspense and drama. A self made man whose constant struggle to be successful despite an unfavorable childhood has shaped him into a writer par excellence who baffles us with his poetic eloquence and spontaneity.

Trends in Atomic and Molecular Physics Krishan K. Sud, Upendra N. Upadhyaya, 2012-12-06

Contemporary research in atomic and molecular physics concerns itself with studies of interactions of electron, positron, photons, and ions with atoms, molecules, and clusters; interactions of intense ultrashort laser interaction with atoms, molecules, and solids; laser assisted atomic collisions, optical, and magnetic traps of neutral atoms to produce ultracold and dense samples; high resolution atomic spectroscopy and experiments by using synchrotron radiation sources and ion storage rings. In recent years, important advances have been made in the experimental as well as theoretical understanding of atomic and molecular physics. The advances in atomic and molecular physics have helped us to understand many other fields, like astrophysics, atmospheric physics, environmental science, laser physics, surface physics, computational physics, photonics, and electronics. XII National Conference on Atomic and Molecular Physics was held at the Physics Department, M. I. S. University, Udaipur from 29th Dec. 1998 to 2nd Jan. 1999 under the auspices of the Indian Society of Atomic and Molecular Physics. This volume is an outcome of the contributions from the invited speakers at the conference. The volume contains 24 articles contributed by the distinguished scientists in the field. The contributors have covered a wide range of topics in the field in which current research is being done. This also reflects the trend of research in this field in Indian universities and research institutes. We are grateful to the national programme committee, national, and local organizing committees, and members of the Physics Department and Computer Centre, M. I. S.

Handbook of Oxidative Stress in Cancer: Therapeutic Aspects Sajal Chakraborti, 2022-09-28

This reference book, which is the second volume of Targeting Oxidative Stress in Cancer, explores oxidative stress as the potential therapeutic target for cancer therapy. The initial chapters discuss the molecular mechanisms of oxidative stress and its effects on different signaling pathways. Subsequently, the sections examine the impact of redox signaling on tumor cell proliferation and consider the therapeutic potential of dietary phytochemicals and nutraceuticals in reactive oxygen species (ROS)-induced cancer. In turn, it examines the evidence supporting the use of Vitamin C in cancer management, before presenting various synthetic and natural compounds that have therapeutic implications for oxidative stress-induced cancer. It also explores the correlation between non-coding RNA and oxidative stress. Furthermore, the book summarizes the role of stem cells in ROS-induced cancer therapy and reviews the therapeutic applications of nanoparticles to alter redox homeostasis in cancer cells. Lastly, it explores heat-shock proteins, ubiquitin ligases, and probiotics as potential therapeutic agents in ROS-mediated cancer. This book is a useful resource for basic and translational scientists as well as clinicians interested in the field of oxidative stress and cancer therapy.

Learning without Burden Mythili Ramchand, Ritesh Khunyakari, Arindam Bose, 2022-07-29

This book looks at education reforms, planning and policy through an exploration of the Yash Pal Committee report (1993) in India, which made recommendations to improve the quality of learning while reducing cognitive burden on students. It analyses the wide-ranging impact the report had on curriculum, pedagogy, teacher education reforms and the national policy on education. The book examines the legacy of the report, tracing the various deliberations and critical engagements with issues around literacy, language and mathematics learning, curriculum reforms and classroom practices, assessment and evaluation. It reviews contemporary developments in research on learning in diverse disciplines and languages through the lens of the recommendations made by the Learning without Burden report while engaging with challenges and systemic issues which limit inclusivity and access to quality education. Drawing on extensive research and first-hand academic and teaching experience, this book will attract attention and interest of students and

researchers of educational policy and analysis, linguistics, sociology and South Asian studies. It will also be of interest to policy makers, think tanks and civil society organisations.

Opportunities in Intense Ultrafast Lasers National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on Opportunities in the Science, Applications, and Technology of Intense Ultrafast Lasers, 2018-03-03 The laser has revolutionized many areas of science and society, providing bright and versatile light sources that transform the ways we investigate science and enables trillions of dollars of commerce. Now a second laser revolution is underway with pulsed petawatt-class lasers (1 petawatt: 1 million billion watts) that deliver nearly 100 times the total world's power concentrated into a pulse that lasts less than one-trillionth of a second. Such light sources create unique, extreme laboratory conditions that can accelerate and collide intense beams of elementary particles, drive nuclear reactions, heat matter to conditions found in stars, or even create matter out of the empty vacuum. These powerful lasers came largely from U.S. engineering, and the science and technology opportunities they enable were discussed in several previous National Academies' reports. Based on these advances, the principal research funding agencies in Europe and Asia began in the last decade to invest heavily in new facilities that will employ these high-intensity lasers for fundamental and applied science. No similar programs exist in the United States. Opportunities in Intense Ultrafast Lasers assesses the opportunities and recommends a path forward for possible U.S. investments in this area of science.

BollySwar: 2001 - 2010 Param Arunachalam, BollySwar is a decade-wise compendium of information about the music of Hindi films. Volume 8 chronicles the Hindi film music of the decade between 2001 and 2010. This volume catalogues more than 1000 films and 8000 songs, involving more than 2000 music directors, lyricists and singers. An overview of the decade highlights the key artists of the decade - music directors, lyricists and singers - and discusses the emerging trends in Hindi film music. A yearly review provides listings of the year's top artists and songs and describes the key milestones of the year in Hindi film music. The bulk of the book provides the song listing of every Hindi film album released in the decade. Basic information about each film's cast and crew is provided and detailed music credits are provided. Where available, music credits go beyond information regarding music directors, lyricists and singers, and include the names of session musicians, assistants, programmers, arrangers, mixers, recordists, etc. Where applicable, music related awards are listed. Interesting trivia is listed for most films, more than

1500 in all. This includes information about artist debuts, plagiarised or sampled songs, controversies and stories behind the making of the film and its music. This book is primarily meant as a quick reference for people looking for information related to a Hindi film or a song, but readers can also browse through the book to get an overview of the events that shaped Bollywood music in the decade. Given that Hindi films are a reflection of the Indian society, the reader can also glean insights about the country's socio-political and cultural environment from the book.

Politics of Inclusion Zoya Hasan, 2011-09-07 Post-Mandal, the demand for reservations by various groups has become a consistent feature of Indian politics. Yet, the focus remains on caste, with little attention paid to the under-representation of religious minorities in India. The book takes up the case of relative disadvantage and interrogates the multiple and overlapping dimensions of deprivation. Hasan argues that, in view of the comparative evidence available, presently excluded and disadvantaged groups should also qualify for affirmative action. This book will interest students and scholars of Indian politics, sociology, and history.

Education in a Digital World Neil Selwyn, 2013 The book takes a comprehensive look at digital technology use in educational settings around the world. Drawing on a wealth of theoretical and empirical work, the book tackles a number of pressing questions--

Cricket: A Political History of the Global Game, 1945-2017 Stephen Wagg, 2017-11-14 Cricket is an enduring paradox. On the one hand, it symbolises much that is outmoded: imperialism; a leisured elite; a rural, aristocratic Englishness. On the other, it endures as a global game and does so by skilful adaptation, trading partly on its mythic past and partly on its capacity to repackage itself. This ambitious new history recounts the politics of cricket around the world since the Second World War, examining key cultural and political themes, including decolonisation, racism, gender, globalisation, corruption and commercialisation.

Part One looks at the transformation of cricket cultures in the ten territories of the former British Empire in the years immediately after 1945, a time when decolonisation and the search for national identity touched every cricket playing region in the world. Part Two focuses on globalisation and the game's evolution as an international sport, analysing: social change and the Ashes; the campaigns for new cricket formats; the development of the women's game; the new breed of coach; the limits to the game's global expansion; and the rise of India as the world's leading cricket power. Cricket: A Political History of the Global Game, 1945-2017 is fascinating reading for anybody interested in the contemporary history of sport.
