European Access to Space: Business and Policy Perspectives on Micro Launchers Matteo Tugnoli,Martin Sarret,Marco Aliberti,2018-05-31 The book provides an analysis of the dynamics of the global launch service market associated with small satellites, by placing a particular focus on its unfolding trends and future outlook. From an economic perspective, the emergence of numerous micro launcher initiatives on top of already existing launch solutions for small satellites raises questions about the specific nature and size of the small satellite market that will - or could - be addressed by these emerging launch services offerings. Identifying the specific features of such market by characterizing customers' expectations and providing a competitive analysis of the different launch solutions for small satellites is the second objective of this report. Finally, and from a policy perspective, the book reflects on whether such market could and should be handled on a purely private basis in the European context, or on the contrary generates relevant stakes that compels European institutional actors to become more actively involved in this domain.

<u>California. Court of Appeal (2nd Appellate District). Records and Briefs</u> California (State).,

<u>Striving for Peace, Security, and Development of the World</u> Joseph Rotblat,1993 The momentous events of the past year have changed the political face of the globe: the ideological struggle that dominated the world for most of this century is over; erstwhile mortal enemies have become friends and partners. But old attitudes have survived and modern weapons are in abundance. New foci of conflict have emerged; military confrontations are taking place; the world is still in turmoil.The welcome deep cuts in nuclear weapons have still left thousands of warheads in the arsenals, and the spread of these weapons to new states would further increase the danger of a nuclear confrontation.The release of the pressure pent-up under oppressive regimes created a powerful drive for independence, often achieved only after bloody wars. Many of the new states are economically non-viable: poverty and famine are frequent adjuncts of independence.If military conflicts are to be avoided, a comprehensive strategy must be formulated to improve the standards of living in the developing countries and enhance their security. A strategy is also needed to protect the environment from the effects of further industrialization and greater use of energy. What is needed is a concept of a sustainable, equitable and liveable world for all its inhabitants.All these problems were analysed by scientists and scholars who met at a Pugwash Conference. The arguments used by them and the proposed solutions are presented in this book under six themes: World Peace; Nuclear Disarmament Issues; Arms Control; Security in the Asia-Pacific Region; Development Strategies and World Economic Order; Energy and the Environment.
