Oscillatory Neural Networks Margarita G. Kuzmina, Eduard A. Manykin, Evgeny S. Grichuk, 2013-11-27 Understanding of the human brain functioning currently represents a challenging problem. In contrast to usual serial computers and complicated hierarchically organized artificial man-made systems, decentralized, parallel and distributed information processing principles are inherent to the brain. Besides adaptation and learning, which play a crucial role in brain functioning, oscillatory neural activity, synchronization and resonance accompany the brain work. Neural-like oscillatory network models, designed by the authors for image processing, allow to elucidate the capabilities of dynamical, synchronization-based types of image processing, presumably exploited by the brain. The oscillatory network models, studied by means of computer modeling and qualitative analysis, are presented and discussed in the book. Some other problems of parallel distributed information processing are also considered, such as a recall process from network memory for large-scale recurrent associative memory neural networks, performance of oscillatory networks of associative memory, dynamical oscillatory network methods of image processing with synchronization-based performance, optical parallel information processing based on the nonlinear optical phenomenon of photon echo, and modeling random electric fields of quasi-monochromatic polarized light beams using systems of superposed stochastic oscillators. This makes the book highly interesting to researchers dealing with various aspects of parallel information processing.

Language, Sexuality, and Power Erez Levon, Ronald Beline Mendes, 2016-01-04 Language, Sexuality, and Power: Studies in Intersectional Sociolinguistics examines the diversity of sexuality as a social and linguistic phenomenon. Bringing together work on Africa, Asia, Europe, Latin America, North America and the Middle East, the volume explores how different ideologies of what it means to belong to a nation or culture influence how sexualities are both understood and linguistically expressed in a range of global locales. Contributions to the volume use experiments, discourse analysis and different types of statistical tests to identify the particular aspects of language - accent, grammar, vocabulary, discourse - that are ideologically associated with sexuality in specific contexts. Combining insights from linguistics, anthropology, sociology and cultural studies, the essays describe how individuals draw on these culturally-specific associations both when evaluating the speech of others and in their everyday presentations of self. Together, the eleven chapters in the collection provide a wide-ranging and multi-method perspective on how language mediates individual desires and larger social structures. They also serve to demonstrate the diverse interconnections between sexuality and other dimensions of lived experience in a variety of previously under-explored national and linguistic settings.

Infoquake David Louis Edelman, 2009-09-18 How far should you go to make a profit? Infoquake, the debut novel by David Louis Edelman, takes speculative fiction into alien territory: the corporate boardroom of the far future. It's a stunning trip through the trenches of a technological war fought with product demos, press releases, and sales pitches. Natch is a master of bio/logics, the programming of the human body. He's clawed and scraped his way to the top of the bio/logics market using little more than his wits. Now his sudden notoriety has brought him to the attention of Margaret Surina, the owner of a mysterious new technology called MultiReal. Only by enlisting Natch's devious mind can Margaret keep MultiReal out of the hands of High Executive Len Borda and his ruthless armies. To fend off the intricate net of enemies closing in around him, Natch and his apprentices must accomplish the impossible. They must understand this strange new technology, run through the product development cycle, and prepare MultiReal for release to the public—all in three days. Meanwhile, hanging over everything is the specter of the infoquake, a lethal burst of energy that's disrupting the bio/logic networks and threatening to send the world crashing back into the Dark Ages. With Infoquake, David Louis Edelman has created a fully detailed world that's both as imaginative as Dune and as real as today's Wall Street Journal.

Multireal David Louis Edelman, 2009-09-18 Natch has just won his first battle with the Defense and Wellness Council for control of MultiReal technology. But now the Council has unleashed the ruthless cunning of Lieutenant Executive Magan Kai Lee. Lee decides that if Natch's company can't be destroyed from without, it must be destroyed from within. As black code continues to eat away at Natch's sanity, he faces a mutiny from his own apprentices, a legal onslaught from the government, and the return of enemies old and new. In desperation, the entrepreneur turns to some unlikely allies: a radical politician with an agenda of his own, and a childhood enemy to whom he has done a terrible wrong. Natch's struggle will take him from the halls of power in Melbourne to the ruined cities of the diss. Hanging in the balance is the fate of MultiReal, a technology that could end the tyranny of the Council forever—or give the Council the ultimate weapon of oppression.

The Office of Eve Surina Ann Jordan PhD, 2023-01-09 This book is a clarion call to women world-wide that all born females are Helpers. They are spiritually connected to God the Holy Spirit and in Christ, they are whole and more powerful than regular men. They have purpose and have gifts that Helpers need to help. How to handle this position in life is where we can see our individual fit, find fulfillment, and joy. This book examines the path of many women in the Bible and includes several meaningful stories of the author.

Food, Cuisine, and Cultural Competency for Culinary, Hospitality, and Nutrition Professionals Sari Edelstein, 2011 Food, Cuisine, and Cultural Competency for Culinary, Hospitality, and Nutrition Professionals comprehensively covers unique food traditions as they apply to health. The text explores the critical importance of cultural sensitivity and competency

in today's work setting, addresses health literacy issues of diverse client bases, and helps readers identify customer communication techniques that enable professionals to establish trust with clients of ethnicity not their own. Written and peer reviewed by experts in the culture discussed, each chapter in this groundbreaking text covers a distinct region or culture and discusses the various contexts that contribute to nutrition and health: lifestyles, eating patterns, ethnic foods, menu planning, communication (verbal and non-verbal), and more. This book is consistent with The American Dietetic Association's Cultural Competence Strategic Plan.

Geosynchron David Louis Edelman, 2010-05-01 The Defense and Wellness Council is enmeshed in full-scale civil war between Len Borda and the mysterious Magan Kai Lee. Quell has escaped from prison and is stirring up rebellion in the Islands with the aid of a brash young leader named Josiah. Jara and the apprentices of the Surina/Natch MultiReal Fiefcorp still find themselves fighting off legal attacks from their competitors and from Margaret Surina's unscrupulous heirs -- even though MultiReal has completely vanished. The quest for the truth will lead to the edges of civilization, from the tumultuous society of the Pacific Islands to the lawless orbital colony of 49th Heaven; and through the depths of time, from the hidden agenda of the Surina family to the real truth behind the Autonomous Revolt that devastated humanity hundreds of years ago. Meanwhile, Natch has awakened in a windowless prison with nothing but a haze of memory to clue him in as to how he got there. He's still receiving strange hallucinatory messages from Margaret Surina and the nature of reality is buckling all around him. When the smoke clears, Natch must make the ultimate decision -- whether to save a world that has scorned and discarded him, or to save the only person he has ever loved: himself.

Becoming An Anthropological Approach to Understandings of the Person in Java Konstantinos Retsikas, 2012-08-15 'Becoming - An Anthropological Approach to Understandings of the Person in Java' is an ethnographic monograph that examines the ways in which the peoples of a peri-urban locality in East Java, Indonesia conceive of the person, by looking at how their everyday practices relate to understandings of ethnicity, kinship, Islam and gender. The volume is also a thought experiment that aims to make a theoretical contribution to the discipline of anthropology by proposing the concept of the 'diaphoron' person and re-deploying the method of 'total ethnography'.
