Complex, Intelligent, and Software Intensive Systems Leonard Barolli,Farookh Khadeer Hussain,Makoto Ikeda,2019-06-20 This book presents scientific interactions between the three interwoven and challenging areas of research and development of future ICT-enabled applications: software, complex systems and intelligent systems. Software intensive systems heavily interact with other systems, sensors, actuators, and devices, as well as other software systems and users. More and more domains involve software intensive systems, e.g. automotive, telecommunication systems, embedded systems in general, industrial automation systems and business applications. Moreover, web services offer a new platform for enabling software intensive systems. Complex systems research focuses on understanding overall systems rather than their components. Such systems are characterized by the changing environments in which they act, and they evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents features the use of ontologies, and their logical foundations provide a fruitful impulse for both software intensive systems and complex systems. Research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is a vital factor in the future development and innovation of software intensive and complex systems.

Strategic Business Models to Support Demand, Supply, and Destination Management in the Tourism and Hospitality Industry Carvalho, Luisa Cagica,Calisto, Lurdes,Gustavo, Nuno,2019-08-30 The international tourism industry has seen increased growth in the past few years as millions of individuals continue to travel worldwide. As one of the world's largest economic sectors, creating jobs, driving exports, and generating prosperity worldwide, hospitality and tourism management needs to continually be explored in order to update best business models and practice. Strategic Business Models to Support Demand, Supply, and Destination Management in the Tourism and Hospitality Industry is an essential reference source that emphasizes emergent and innovative aspects and new challenges and issues within the industry with a particular focus on demand, supply, and destination management. Featuring research on topics such as circular economy, consumer behavior, and social networking, this book is ideally designed for business professionals, executives, hotel managers, event coordinators, restaurateurs, travel agents, tour directors, policymakers, government officials, industry professionals, researchers, students, and academicians.

Means of Control Byron Tau,2024-02-27 You are being surveilled right now. This sweeping exposé reveals how the U.S. government allied with data brokers, tech companies, and advertisers to monitor us through the phones we carry and the devices in our home. "A revealing . . . startling . . . timely . . . fascinating, sometimes terrifying examination of the decline of privacy in the digital age."—Kirkus Reviews "That evening, I was given a glimpse inside a hidden world. . . . An entirely new kind of surveillance program—one designed to track everyone." For the past five years—ever since a chance encounter at a dinner party—journalist Byron Tau has been piecing together a secret story: how the whole of the internet and every digital device in the world became a mechanism of intelligence, surveillance, and monitoring. Of course, our modern world is awash in surveillance. Most of us are dimly aware of this: Ever get the sense that an ad is "following" you around the internet? But the true potential of our phones, computers, homes, credit cards, and even the tires underneath our cars to reveal our habits and behavior would astonish most citizens. All of this surveillance has produced an extraordinary amount of valuable data about every one of us. That data is for sale—and the biggest customer is the U.S. government. In the years after 9/11, the U.S. government, working with scores of anonymous companies, many scattered across bland Northern Virginia suburbs, built a foreign and domestic surveillance apparatus of breathtaking scope—one that can peer into the lives of nearly everyone on the planet. This cottage industry of data brokers and government bureaucrats has one directive—"get everything you can"—and the result is a surreal world in which defense contractors have marketing subsidiaries and marketing companies have defense contractor subsidiaries. And the public knows virtually nothing about it. Sobering and revelatory, Means of Control is the defining story of our dangerous grand bargain—ubiquitous cheap technology, but at what price?

Hidden Champions in CEE and Turkey Peter McKiernan,Danica Purg,2013-12-11 This book presents hidden champions in Central and Eastern Europe (CEE) and Turkey that have been studied as a joint project between CEEMAN and IEDC-Bled School of Management, Slovenia. This is an outcome of extensive research undertaken by over 30 researchers and covers 15 countries from Russia to Albania; covering many contexts, political systems, cultures and infrastructures. The reader is provided with a detailed introduction to the concept of hidden champions and describes the cases studied in this project. This book is an invaluable resource providing a culmination of interdisciplinary, cross-study chapters ranging from leadership to performance drivers; from organization to culture and governance; from innovativeness to sustainability and further to the financial aspects of hidden champions business models. These meta level chapters are followed by 15 country-specific chapters which provide an overview of each country's history, economic indicators and vignettes of the cases involved in this study.

Designing Cognitive Cities Edy Portmann,Marco E. Tabacchi,Rudolf Seising,Astrid Habenstein,2018-09-18 This book illustrates various aspects and dimensions of cognitive cities. Following a comprehensive introduction, the first part of the book explores conceptual considerations for the design of cognitive cities, while the second part focuses on concrete applications. The contributions provide an overview of the wide diversity of cognitive city conceptualizations and help readers to better understand why it is important to think about the design of our cities. The book adopts a transdisciplinary approach since the cognitive city concept can only be achieved through cooperation across different academic disciplines (e.g., economics, computer science, mathematics) and between research and practice. More and more people live in a growing number of ever-larger cities. As such, it is important to reflect on how cities need to be designed to provide their inhabitants with the

means and resources for a good life. The cognitive city is an emerging, innovative approach to address this need.

Replikation und Erweiterung des Modells zur Bestimmung der Disruptionsreife von Wertnetzwerken Eva Maria Baumann,2018-03-16 Eva Maria Baumann führt die Forschungen zur Früherkennung disruptiver Innovationen weiter und verbindet dabei die Phänomene Disruption und Konvergenz. Im Rahmen einer erweiterten Replikation untersucht sie zwei bestehende Modelle zur Früherkennung disruptiver Innovationen im Umfeld konvergierender Märkte mithilfe der Fallstudienmethodik nach Yin (2007). Das Ergebnis ist zweigeteilt: Während eines der beiden Modelle auch für Fälle mit Konvergenz gut geeignet scheint, wird das andere für die Anwendung in konvergierenden Märkten weiter verfeinert.

Progress and New Trends in 3D Geoinformation Sciences Jacynthe Pouliot,Sylvie Daniel,Frédéric Hubert,Alborz Zamyadi,2012-10-22 The integration of the 3rd dimension in the production of spatial representation is largely recognized as a valuable approach to comprehend our reality, that is 3D. During the last decade developments in 3D Geoinformation (GI) system have made substantial progress. We are about to have a more complete spatial model and understanding of our planet in different scales. Hence, various communities and cities offer 3D landscape and 3D city models as valuable source and instrument for sustainable management of rural and urban resources. Also municipal utilities, real estate companies benefit from recent developments related to 3D applications. In order to present recent developments and to discuss future trends, academics and practitioners met at the 7th International Workshop on 3D Geoinformation. This book comprises a selection of evaluated, high quality papers that were presented at this workshop in May 2012. The topics focus explicitly on the last achievements (methods, algorithms, models, systems) with respect to 3D GeoInformation requirements. The book is aimed at decision makers and experts as well at students interested in the 3D component of geographical information science including GI engineers, computer scientists, photogrammetrists, land surveyors, urban planners, and mapping specialists.

Proceedings of the 4th Borobudur International Symposium on Science and Technology 2022 (BIS-STE 2022) Muji Setiyo,Zulfikar Bagus Pambuko,Chrisna Bagus Edhita Praja,Agus Setiawan,Fitriana Yuliastuti,Lintang Muliawanti,Veni Soraya Dewi,2023-11-08 This is an open access book.Related to the big theme of the SDGs reinforcement at our previous conference, we try to invite all academics and researchers around the world to participate in the 4th Borobudur International Symposium 2022 (4thBIS 2022). As we know, the COVID-19 pandemic and its impact on all the 17 SDGs have demonstrated how what began as a health catastrophe swiftly transformed into a human, socioeconomic and environmental crisis. The 4th BIS brought up "The Innovation Chain: A Contribution to Society and Industry" as the main theme to respond this condition. This conference is expected to support the UN Agenda. Additionally, this conference will also provide avenues for participants to exchange ideas and network with each other as well as domain experts from their fields. Overall, this event is aimed at professionals across all spheres of technology and engineering including the experienced, inexperienced, and students as well. The conference will be held virtually on Wednesday, December 21st, 2022 in Magelang, Central Java, Indonesia.

Distribution and Supply Logistics Martin Straka,2019-10-21 What is logistics? What is distribution and supply? What is supply chain management? Which elements create distribution and supply space? Which aspects affect storage design? Which information technologies are suitable for distribution and supply systems? What costs affect distribution and supply systems? These are just some of the questions explored in this book. In addition to providing theoretical analysis of the problems of distribution and supply, it practically demonstrates the many ways of using of heuristics to solve specific tasks. It brings together eight case studies to investigate facets such as designing distribution systems, location problem solving, distribution and collection of goods solutions, and inventory management solutions in particular companies. As such, it will appeal to students in the field of logistics, as well as logistics managers, designers and planners.
