John Willis, Ben Hodges

The Immune Synapse as a Novel Target for Therapy Luis Graca, 2007-12-18 This volume gives an overview on the progress in immune synapse research, from basic science to clinical trials, and the major mechanisms involved. It discusses how interfering with T cell activation may lead to immune tolerance, immune modulation, and the recruitment of regulatory T cells; the role of monoclonal antibodies in tolerance induction; and mechanisms maintaining dominant tolerance.

Animal Farm , 2005-07 In George Orwell's satire on the perils of Stalinism, the animals on a farm drive out their master and take over and run the farm for themselves. The experiment is successful, except that someone has to take the deposed farmer's place. Leadership devolves upon the pigs, who are cleverer than the rest of the animals. Unfortunately, their character is not equal to their intelligence.

Broadway's Bravest Woman , Expanding the awareness of the feminist writer's accomplishments, Broadway's Bravest Woman is a critical resource for students, scholars, and theatre artists. The collection, enhanced by six illustrations, not only offers the most complete portrayal to date of Treadwell as a significant feminist voice in modern America but also provides a glimpse into the social life and international relations of the United States in the interwar period of the twentieth century.--BOOK JACKET.

Theatre World 2005-2006: The Most Complete Record of the American Theatre John Willis, Ben Hodges, 2008-07-01 Now in its 62nd year, 'Theatre World' provides a complete statistical and pictorial record of the Broadway and off-Broadway theatre season. Euripides: Phoenician Women Thalia Papadopoulou, 2014-02-25 Phoenician Women, one of Euripides'

later tragedies, is an intriguing play that arguably displays some of his finest dramatic technique. Rich in cast and varied in incident, it is an example of Euripides' experimentation with structure. It dramatises the most fertile mythical tradition of the city of Thebes and its doomed royal family, focusing in particular on the conflict between Eteocles and Polyneices as a result of their father Oedipus' curse, which eventually leads to mutual fratricide. The play was very popular throughout antiquity, and became part of the so-called Byzantine Triad (along with Hecuba and Orestes), of plays studied in the school curriculum. Thalia Papadopoulou here offers a thorough survey of the play in its historical context, against the background of Athenian tragedy and Euripidean dramaturgy. Employing various critical approaches, she investigates the literary tradition and the dynamics of intertextuality, Euripidean dramatic technique, the use of rhetoric, characterisation, gender, the function of the Chorus, aspects of performance and the reception of the play from antiquity to modern times.

Theory Of Quantum Liquids Philippe Nozieres, 2018-03-05

This book provides a unified account of the theory of quantum liquid and discusses the mathematical theory of linear response and correlations. It is helpful for experimental physicists working in the fields of low-temperature or solid-state physics.

K-theory Michael Atiyah, 2018-03-05 These notes are based on the course of lectures I gave at Harvard in the fall of 1964. They constitute a self-contained account of vector bundles and K-theory assuming only the rudiments of point-set topology and linear algebra. One of the features of the treatment is that no use is made of ordinary homology or cohomology theory. In fact, rational cohomology is defined in terms of K-theory. The theory is taken as far as the solution of the Hopf invariant problem and a start is made on the J-homomorphism. In addition to the lecture notes proper, two papers of mine published since 1964 have been reproduced at the end. The first, dealing with operations, is a natural supplement to the material in Chapter III. It provides an alternative approach to operations which is less slick but more fundamental than the Grothendieck method of Chapter III, and it relates operations and filtration. Actually, the lectures deal with compact spaces, not cell-complexes, and so the skeleton-filtration does not figure in the notes. The second paper provides a new approach to K-theory and so fills an obvious gap in the lecture notes.

Classical Charged Particles Fritz Rohrlich, 1990 Widely-discussed in the theory of classical point charges are the difficulties of divergent self-energy, self-accelerating solutions, and pre-acceleration. This book explains the theory in the context of quantum electrodynamics, the neutral particle limit, and coherence with neighboring theories.

Time is the Mercy of Eternity Deb Margolin, 2007 Act 2: A husband and wife are left with only a picture of their son's foot after he is killed at war.
