Diplomacy Games Rudolf Avenhaus,I. William Zartman,2007-05-11 In this book, leading experts in international negotiations present formal models of conflict resolution and international negotiations. It examines how the abstract concept of formal models can be made more understandable to those not trained to work with them, what can be done to encourage the use of formal methods in the real world, and ways in which politicians and diplomats can apply formal methods to the problems they are currently facing.

Ludopolitics Liam Mitchell,2018-12-14 What can videogames tell us about the politics of contemporary technoculture, and how are designers and players responding to its impositions? To what extent do the technical features of videogames index our assumptions about what exists and what is denied that status? And how can we use games to identify and shift those assumptions without ever putting down the controller? Ludopolitics responds to these questions with a critique of one of the defining features of modern technology: the fantasy of control. Videogames promise players the opportunity to map and master worlds, offering closed systems that are perfect in principle if not in practice. In their numerical, rule-bound, and goal-oriented form, they express assumptions about both the technological world and the world as such. More importantly, they can help us identify these assumptions and challenge them. Games like Spec Ops: The Line, Braid, Undertale, and Bastion, as well as play practices like speedrunning, theorycrafting, and myth-making provide an aesthetic means of mounting a political critique of the pursuit and valorization of technological control.

Internet of Things, Infrastructures and Mobile Applications Michael E. Auer,Thrasyvoulos Tsiatsos,2020-09-10 This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and

assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

The Australian Law Journal ,1927

Sports Law in Australia Andy Gibson,2023-10-25 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Australia deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that

such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Australia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Real Life in Real Time Johanna Brewer,Bo Ruberg,Amanda L. L. Cullen,Christopher J. Persaud,2023-08-22 The cultural ramifications of online live streaming, including its effects on identity and power in digital spaces. Some consider live streaming—the broadcasting of video and/or audio footage live online—simply an internet fad or source of entertainment, yet it is at the center of the digital mediation of our lives. In this edited volume, Johanna Brewer, Bo Ruberg, Amanda L. L. Cullen, and Christopher J. Persaud present a broad range of essays that explore the cultural implications of live streaming, paying special attention to how it is shifting notions of identity and power in digital spaces. The diverse set of international authors included represent a variety of perspectives, from digital media studies to queer studies, from human-computer interaction to anthropology, and more. While important foundational work has been carried out by game studies scholars, many other elements of streaming practices remain to be explored. To deepen engagement with diversity and social justice, the editors have included a variety of voices on such topics as access, gender, sexuality, race, disability, harassment, activism, and the cultural implications of design aesthetics. Live streaming affects a wide array of behaviors, norms, and patterns of communication. But above all, it lets participants observe and engage with real life as it unfolds in real time. Ultimately, these essays challenge us to look at both the possibilities for harm and the potential for radical change that live streaming presents.
