Little Golden Books enjoy nearly 100% consumer recognition. They feature beloved classics, hot licenses, and new original stories . . . the classics of tomorrow. We publish two to three Marvel Little Golden Books each year.

W.E.B. Du Bois Elvira Basevich,2020-10-22 W.E.B. Du Bois spent many decades fighting to ensure that African Americans could claim their place as full citizens and thereby fulfill the deeply compromised ideals of American democracy. Yet he died in Africa, having apparently given up on the United States. In this tour-de-force, Elvira Basevich examines this paradox by tracing the development of his life and thought and the relevance of his legacy to our troubled age. She adroitly analyses the main concepts that inform Du Bois's critique of American democracy, such as the color line and double consciousness, before examining how these concepts might inform our understanding of contemporary struggles, from Black Lives Matter to the campaign for reparations for slavery. She stresses the continuity in Du Bois's thought, from his early writings to his later embrace of self-segregation and Pan-Africanism, while not shying away from assessing the challenging implications of his later work. This wonderful book vindicates the power of Du Bois's thought to help transform a stubbornly unjust world. It is essential reading for racial justice activists as well as students of African American philosophy and political thought.

The Lost Words ,2022-05 The Lost Words by composer James Burton takes its inspiration and text from the award-winning 'cultural phenomenon' and book of the same name by Robert Macfarlane and Jackie Morris: a book that was, in turn, a creative response to the removal of everyday nature words like acorn, newt and otter from a new edition of a widely used children's dictionary. Both the book and Burton's 32-minute work, which is written in 12 short movements for upper-voice choir in up to 3 voice parts (with either orchestral or piano accompaniment), celebrates each lost word with a beautiful poem or 'spell', magically brought to life in Burton's music. At its heart, the work delivers a powerful message about the need to close the gap between childhood and the natural world. Burton's piece was co-commissioned by the Hallé Concerts Society for the Hallé Children's Choir and the Boston Symphony Orchestra. The piano accompaniment version was premiered at the Tanglewood Festival in 2019 by the Boston Symphony Children's Choir, of which Burton is founder and director. The Hallé Children's Choir will premiere the orchestral version of the full work in Manchester, UK, post-pandemic. Vocal Score Co-commission by Boston Symphony and Hallé Concerts Society for their respective Children's Choirs. Two versions - with orchestral or with piano accompaniment. The vocal score is the same for both versions. James Burton is a composer but also a conductor. He is conductor of the Tanglewood Festival Chorus and choral director of the Boston Symphony. The book The Lost Words, exquisitely designed, has won multiple awards and is an international best-seller. The vocal score includes Jackie Morris's beautiful imagery in its cover design.

Minitel Julien Mailland, Kevin Driscoll,2017-06-23 The first scholarly book in English on Minitel, the pioneering French computer network, offers a history of a technical system and a cultural phenomenon. A decade before the Internet became a medium for the masses in the United States, tens of millions of users in France had access to a network for e-mail, e-commerce, chat, research, game playing, blogging, and even an early form of online porn. In 1983, the French government rolled out Minitel, a computer network that achieved widespread adoption in just a few years as the government distributed free terminals to every French telephone subscriber. With this volume, Julien Mailland and Kevin Driscoll offer the first scholarly book in English on Minitel, examining it as both a technical system and a cultural phenomenon. Mailland and Driscoll argue that Minitel was a technical marvel, a commercial success, and an ambitious social experiment. Other early networks may have introduced protocols and software standards that continue to be used today, but Minitel foretold the social effects of widespread telecomputing. They examine the unique balance of forces that enabled the growth of Minitel: public and private, open and closed, centralized and decentralized. Mailland and Driscoll describe Minitel's key technological components, novel online services, and thriving virtual communities. Despite the seemingly tight grip of the state, however, a lively Minitel culture emerged, characterized by spontaneity, imagination, and creativity. After three decades of continuous service, Minitel was shut down in 2012, but the history of Minitel should continue to inform our thinking about Internet policy, today and into the future.

The Lost Gospel Herbert Krosney,2006 The gripping story of the Gospel of Judas Iscariot and the Herculean efforts to conserve it and parse its meaning for future generations.

The Mystery of Roanoke, the Lost Colony Andrea P. Smith,2011-08-15 What happened to the colony at Roanoke is one of America's first unsolved mysteries. The facts that historians have pieced together are presented here in comic book format. Theories of what happened are elucidated as well, so readers can make their own judgments on what they think happened at Roanoke hundreds of years ago.

Hannah and the Lost Inside Voice Nicole Tamang,2014-02 Join Hannah on her adventure as she searches for her lost inside voice. Hannah and the Lost Inside Voice is a interactive story that aims to motivate children to love reading and the world of books. It would make a great bedtime story.

The Internet and Workplace Transformation Murugan Anandarajan,Claire Simmers,Thompson Teo,2006 The technologies of the Internet have exerted an enormous influence on the way we live and work. This book presents research on the transformation of the workplace by the use of these information technologies. It focuses on the deleterious transformations, emergence of virtual teams, and the ways the troubling transformations can be redeemed.

New Frontiers in Artificial Intelligence Takashi Washio,Akito Sakurai,Katsuto Nakajima,Hideaki Takeda,Satoshi Tojo,Makoto Yokoo,2006-06-27 This book presents the joint post-proceedings of five international workshops organized by the Japanese Society for Artificial Intelligence, during the 19th Annual Conference JSAI 2005. The volume includes 5 award winning papers of the main conference, along with 40 revised full workshop papers, covering such topics as logic and engineering of natural language semantics, learning with logics, agent network dynamics and intelligence, conversational informatics and risk management systems with intelligent data analysis.

The Undergraduate's Companion to Arab Writers and Their Web Sites Dona S. Straley,2004-08-30 This companion provides information on the lives and works of about 150 authors who write primarily in Arabic, covering the first known works of Arabic literature in the 5th and 6th centuries A.D. to the present day. While concentrating on literary authors, writers from the fields of history, geography, and philosophy are also represented. The individuals represented were chosen primarily from the Encyclopedia of Arabic Literature. Among the major authors are Najib Mahfuz, the 1988 Nobel laureate; Nawal Saadawi, the Egyptian physician who is the leading female literary author in the Arab world and the most frequently translated into English; Abu al-Ala' al-Ma'arri, the 11th century poet whose verses are taught to every Arab schoolchild; and Avicenna, the great physician and philosopher, transmitter and interpreter of Aristotle, whose work on medicine was long the standard not only in the Middle East but also (in Latin translation) in Europe. In addition, entries will be included for the anonymous romances so common in Arabic literature, such as The

Arabian Nights, a cycle of stories perhaps even better known in the West than in the Arab world. Interest in the history and culture of the Arab world at U.S. universities has taken a quantum leap since the events of September 11, 2001. In this book, the author demonstrates that at least three major, distinct literary and cultural traditions are included within the fields of Middle Eastern and Islamic studies—Arabic, Persian, and Turkic. The Arabic tradition is the oldest, largest, and most widely dispersed. Undergraduate courses in Arabic literature and culture are now being taught at both lower- and upper-levels at many universities. Such courses are often used by undergraduates to fulfill basic educational requirements for their degrees. Students in such courses often have difficulty finding information on Arab writers, and this volume fills the void.

Caught in the Web Or Lost in the Textbook ? ,2006

The Archived Web Niels Brügger,2018-11-27 An original methodological framework for approaching the archived web, both as a source and as an object of study in its own right. As life continues to move online, the web becomes increasingly important as a source for understanding the past. But historians have yet to formulate a methodology for approaching the archived web as a source of study. How should the history of the present be written? In this book, Niels Brügger offers an original methodological framework for approaching the web of the past, both as a source and as an object of study in its own right. While many studies of the web focus solely on its use and users, Brügger approaches the archived web as a semiotic, textual system in order to offer the first book-length treatment of its scholarly use. While the various forms of the archived web can challenge researchers' interactions with it, they also present a range of possibilities for interpretation. The Archived Web identifies characteristics of the online web that are significant now for scholars, investigates how the online web became the archived web, and explores how the particular digitality of the archived web can affect a historian's research process. Brügger offers suggestions for how to translate traditional historiographic methods for the study of the archived web, focusing on provenance, creating an overview of the archived material, evaluating versions, and citing the material. The Archived Web lays the foundations for doing web history in the digital age, offering important and timely guidance for today's media scholars and tomorrow's historians.

The Lost Legacy Aria Sterling,2023-03-24 In The Lost Legacy: Uncovering the Hidden Truths of a Family's Past, Sophie sets out on a journey to uncover the secrets of her family's history. As she delves deeper, she discovers a lost legacy of stories and experiences that have been passed down from generation to generation. She uncovers clues, documents, and tangible reminders of the past, piecing together a history that has been hidden for too long. Through her research, Sophie uncovers the experiences and perspectives of her ancestors, gaining insight into their struggles and triumphs. As she continues her journey, she realizes that their legacy is not just a thing of the past, but something that continues to shape and inspire the lives of future generations. But as Sophie uncovers more about her family's past, she also learns about the present and the future. She sees the ways in which her ancestors have influenced and inspired the lives of their descendants, and she realizes that their legacy is not just a historical curiosity, but a source of motivation and inspiration for her own life. The Lost Legacy is a story of discovery, exploration, and connection. It is a reminder that the past is not just a thing of the past, but something that continues to shape and inspire our lives today. It is a call to document and preserve our own legacies, so that future generations can learn from our experiences and perspectives.

The Lost Word Evelyn Underhill,1907

The American Pressman ,1919

Web Security, Privacy & Commerce Simson Garfinkel,Gene Spafford,2002 Web Security, Privacy & Commerce cuts through the hype and the front page stories. It tells readers what the real risks are and explains how to minimize them. Whether a casual (but concerned) Web surfer or a system administrator responsible for the security of a critical Web server, this book will tells users what they need to know.

Brand New World Anna Coudenys,2017-04-18 So I'm going to save the world after all. Strange and yet all too familiar, this Brand New World of ours. History has been twisted. Just a little. Just enough. Here we meet ugly duckling Dior Darling who uncovers a plot to do away with mankind effectively. Travelling around the world in search of clues, she gets entangled in world espionage, a love affair that isn't, survives an invasion of Aliens, and uncovers a truth she wishes she hadn't. A truth that will forever change life as we know it. Destruction, creation, and personal development are at the heart of this novel, in the eerily estranging way that defines the best science fiction

Lost Books Flavia Bruni,Andrew Pettegree,2016-04-19 Questions of survival and loss bedevil the study of early printed books. Many early publications are not particularly rare, but many have disappeared altogether. Here leading specialists in the field explore different strategies for recovering this lost world of print.

Designing Web Navigation James Kalbach,2007 Provides information on basic Web design and development techniques to create effective navigation systems.

Relentless Growth Christopher Meyer,1998 Revealing the secrets of explosive Silicon Valley growth machines, this book offers a comprehensive plan which shows how to spur a company's growth while maintaining its creative edge. 10 charts & illustrations.
