**Creating Adobe Acrobat Forms** John Deubert,2002 Thanks to Adobe Acrobat and the cross-platform PDF files it creates, we can all crawl out from under the mountains of paper that clutter our desktops and counters. Organizations like the IRS, which now lets you download important tax forms from its Web site instead of trudging to the post office, have discovered Acrobat's powerful ability to streamline the once tedious and time-consuming task of data collection. With Creating Adobe Acrobat Forms, you, too, can create your own electronic forms and reduce both your paper piles and workload. Creating Adobe Acrobat Forms covers everything you need to know to build an attractive, functional form, starting with the basics of form design and continuing through the data-submission process. On the design side, you'll learn how to create and arrange all the interactive items that make up an electronic form, including links, buttons, pop-up menus, and digital signatures. The book also shows you how to connect your Acrobat forms to an external server, allowing it to automatically transfer submitted data to a company database or Web site. Author John Deubert realizes that even the best designed forms are useless if you don't know what to do with them, so he also lays out how best to harness the raw data once you've collected it and even supplies form files so you can follow along as he covers the techniques.

**Adobe LiveCycle Designer, Second Edition** J. P. Terry,2013-11-11 Creating intelligent forms can be challenging. Forms have to present critical information in a compact format. Interactive forms that respond to data entry by the user require some programming. Dynamic forms also have to work seamlessly with the database that collects customer information. Plus, forms need to be designed well to eliminate confusion and entice completion by the user. As shown in this book, LiveCycle Designer addresses the many objectives of forms creation. It offers a digital handshake between the graphic designer and the data programmer. LiveCycle Designer lets form designers create more compelling and dynamic documents than is possible with Acrobat or Microsoft Word. Forms created with LiveCycle Designer automatically expand to accommodate different amounts of data and report that information back to a database. The new version of LiveCycle Designer (ES4) allows for the first time forms to be deployed in HTML5 format, so they can be used on a wider array of devices (page sizes can adjust to smaller screens) and in a wider range of software systems (no special reader or plugin needed to use them, just a Web browser). Adobe LiveCycle Designer: Creating Dynamic PDF and HTML5 Forms for Desktop and Mobile Applications shows design strategies as well as the technical underpinnings of PDF and XFA (Adobe XML Forms Architecture), the tools necessary to create intelligent forms.
