The Hong Kong Filmography, 1977Ð1997 John Charles,2009-04-16 Thanks to the successes of directors and actors like John Woo, Jackie Chan, and Chow Yun-Fat, the cinema of Hong Kong is wildly popular worldwide, and there is much more to this diverse film culture than most Western audiences realize. Beyond martial arts and comedy, Hong Kong films are a celebration of the grand diversity and pageantry of moviemaking—covering action, comedy, horror, eroticism, mythology, historical drama, modern romances, and experimental films. Information on 1,100 films produced in British Hong Kong from 1977 to 1997 is included here.

Custom, Land and Livelihood in Rural South China Patrick H.

Hase,2013-04-01 Land was always at the centre of life in Hong Kong's rural New Territories: it sustained livelihoods and lineages and, for some, was a route to power. Villagers managed their land according to customs that were often at odds with formal Chinese law. British rule, 1898–1997, added complications by assimilating traditional practices into a Western legal system. Custom, Land and Livelihood in Rural South China explores land ownership in the New Territories, analysing over a hundred surviving land deeds from the late Ch'ing Dynasty to recent times, which are transcribed in full and translated into English. Together with other sources collected by the author during 30 years of research, these deeds yield information on all aspects of traditional village life—from raising families and making a living to coping with intruders—and evoke a view of the world which, despite decades of urbanisation, still has resonance today.

Southeast Asia and the Cold War Albert Lau,2012-07-26 The

origins and the key defining moments of the Cold War in Southeast Asia have been widely debated. This book focuses on an area that has received less attention, the impact and legacy of the Cold War on the various countries in the region, as well as on the region

itself. The book contributes to the historiography of the Cold War in Southeast Asia by examining not only how the conflict shaped the milieu in which national and regional change unfolded but also how the context influenced the course and tenor of the Cold War in the region. It goes on to look at the usefulness or limitations of using the Cold War as an interpretative framework for understanding change in Southeast Asia. Chapters discuss how the Cold War had a varied but notable impact on the countries in Southeast Asia, not only on the mainland countries belonging to what the British Foreign Office called the upper arc, but also on those situated on its maritime lower arc. The book is an important contribution to the fields of Asian Studies and International Relations.

Development Appraisal of Land in Hong Kong Ling-hin Li, 2006
This book provides the market and the profession an overall view of the land management system in Hong Kong by presenting a combination of both factual account of the system and practice as well as some academic and theoretical discussion of the application of development appraisal models. The author discusses various basic appraisal models and gives his views on the future

development of cash flow model to be applied in land. This is not only a useful guide to investors investing in Hong Kong, but also an important reference for development appraisal taking place in a similar land market, Mainland China.

Regulating Information Asymmetry in the Residential Real Estate Market Devin Lin, 2017-07-06 This book conducts a detailed examination of the current form of the Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of values including information symmetry, consumer protection, the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unconscionable sales tactics (such as selective information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order to protect the interests of stakeholders in this ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is

communicated to the prospective buyer and discusses misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in consumer protection and transparency-orientated legislation in commercialized real estate transactions, this book seeks to provide an in-depth discussion of the latest trends and directions of travel.

Spiritual, Religious, and Faith-Based Practices in Chronicity

Andrew R. Hatala, Kerstin Roger, 2021-09-08 This book explores how people draw upon spiritual, religious, or faith-based practices to support their mental wellness amidst forms of chronicity. From diverse global contexts and spiritual perspectives, this volume critically examines several chronic conditions, such as psychosis, diabetes, depression, oppressive forces of colonization and social marginalization, attacks of spirit possession, or other forms of persistent mental duress. As an inter- and transdisciplinary collection, the chapters include innovative ethnographic observations and over 300 in-depth interviews with care providers

and individuals living in chronicity, analyzed primarily from the phenomenological and hermeneutic meaning-making traditions. Overall, this book depicts a modern global era in which spirituality and religion maintain an important role in many peoples' lives, underscoring a need for increased awareness, intersectoral collaboration, and practical training for varied care providers. This book will be of interest to scholars of religion and health, the sociology and psychology of religion, medical and psychological anthropology, religious studies, and global health studies, as well as applied health and mental health professionals in psychology, social work, physical and occupational therapy, cultural psychiatry, public health, and medicine.
